EXECUTIVE COMMITTEE OF THE MULTILATERAL FUND FOR THE IMPLEMENTATION OF THE MONTREAL PROTOCOL Twenty-eighth Meeting Montreal, 14-16 July 1999

WORLD BANK PROGRESS REPORT

This document includes:

- The Comments and Recommendations of the Fund Secretariat
- The Annual Progress Report on World Bank Implemented Montreal Protocol Operations (January December 1998)

COMMENTS OF THE FUND SECRETARIAT

Status of Implementation

- 1. During the reporting period (1997 1998), the Bank completed 78 projects, phased out over 31,639 tonnes of ODS, and disbursed US \$55 million.
- 2. Cumulatively, the World Bank has completed 44 per cent (169 projects) of the 387 investment projects approved for its implementation through 1998. It has phased out 70 per cent (62,812 tonnes) of the ODP to be phased out from its portfolio of approved projects. The Bank has disbursed 56 per cent (US \$184 million) of the resources approved by the Fund for it through 1998 (US \$328 million) and it plans to disburse 41 per cent (US \$59 million) of the balance by the end of 1999.
- 3. The Bank had a balance of US \$1.3 million from unused project preparation funds at the end of 1998 and the Committee approved an additional US \$1.2 million for project preparation at its first meeting in 1999. The Bank has completed 81 per cent of its non-investment projects.

Continued use of CFCs despite near or total equipment replacement

- 4. The Bank noted that ongoing monitoring uncovered what appeared to be the continued use of CFCs in some enterprises despite near or total equipment replacements. In some cases, CFCs were continued to be used after alternative equipment was installed.
- 5. The Bank has allowed some plants to continue to use equipment that produces CFC using products for some projects. The Bank is allowing the Interclima company (ARG/REF/15/INV/15) to respond to existing demand where three car models produced in Argentina continue to use CFC-12. The Bank indicates that the rationale for this is that the enterprise is only responding to existing demand and is not benefiting additional from the ongoing production and the enterprise will convert once the demand no longer exists. In this case, the Executive Committee may wish to opine if this view is consistent with the objectives of the Fund to provide for an early phase out if in fact the equipment is provided without a resulting early phase-out.
- 6. The Aero Pharma aerosol project in India (INS/ARS/11/INV/10) was approved in November 1993. This project is planned to be completed 27 months late. Although the Bank has disbursed 95 per cent of the \$62,520 approved for this project, the project had not been completed because of a lack of HAP supply. This project was first reported to be ready for final disbursement as at the end of 1996. Then the project was reported to have been completed by the end of 1997 and the completion report was being finalized. Now the project is to be completed in June 1999. The Bank informed the Secretariat that although the enterprise had received the full capital investment allocation under the grant and switched some lines to hydrocarbon, the company continues CFCs in applications for personal product lines. The Bank indicated that India has engaged in active dialogue with foreign manufactures to find a solution for cosmetic grade hydrocarbons. India is addressing the issue of appropriate duty exemptions to encourage the use of imports of hydrocarbons. However, the fact remains that a company that

has received support from the Fund continues to use CFCs and the Executive Committee may wish to consider such circumstances.

CFC recovery and recycling project in Brazil

7. The Bank, UNDP, and the Government of Brazil have requested that the funds for the "CFC-12 collection, recycling and conservation programme for household refrigerator maintenance and repair shops" in Brazil should be transferred to UNDP. This project was approved at the 7th Meeting of the Executive Committee in June 1992 in the amount of US \$2 million. This project was classified as a project with an implementation delay, last year. Moreover, it was up for consideration for cancellation at the last meeting of the Executive Committee. The Committee decided, at that meeting, to request the World Bank to report on this project to the Sub-Committee on Monitoring, Evaluation and Finance at its next meeting (Decision 27/9 (d)). The Committee may wish to consider the request for a transfer based on the report it mandated from the World Bank and in the light of guidance developed by the Executive Committee on the pre-requisites of successful recovery and recycling projects since 1992.

Implementation delays

8. The World Bank appended two lists containing 54 projects with implementation delays to its progress report. 12 projects are classified under both categories of implementation delays and were included in both lists. The Bank noted that it had canceled six of these projects and 20 of the remaining 48 projects are now underway. 20 projects in the list were approved in May 1997.

Discrepancies in the number of projects with implementation delays

9. The Secretariat compared its list of implementation delays with the list appended to the World Bank's progress report. The Secretariat identified 63 investment projects, 4 project preparation projects, three technical assistance and 2 institutional strengthening projects that were not included in the World Bank's lists. The number of projects with implementation delays is important because implementing agencies must then continue to report on these projects to the next Executive Committee meeting.

Delaying project implementation until markets improve to allow beneficiaries to pay off financial obligations

- 10. The Bank indicates in its remarks that it is allowing the beneficiaries to delay project implementation until markets improve. This is being done to allow beneficiaries to pay off financial obligations incurred mostly during recent economic difficulties in their countries. This applies to the following refrigeration projects in Argentina:
- Mirgor (ARG/REF/14/INV/17),
- Adzen (ARG/REF/19/INV/43), and
- Simon Cachan (ARG/REF/15/INV/16).
- 11. Two of these three projects were approved in December 1994, but the economic down turns are related to problems in 1999. These projects had other difficulties that have been

resolved, including difficulty in getting tax exemption and agreements/sub-agreements signed. In the case of Mirgor, the Bank reported to the Secretariat that a grant agreement would be signed by July 1999. In the case of Adzen, last year's progress report indicated a tax issue. Now the Bank indicates that the tax issue was only a part of a bigger debt problem and the company is expected to "start" repaying its debt in the "near future". The Bank indicates that a May/June mission will address these issues.

- 12. The Executive Committee may wish a status report on these projects at its July meeting.
- 13. In the case of the Piragua refrigeration projects in Argentina (ARG/REF/18/INV/26), the beneficiary is being allowed additional time to pay off its debt. Therefore, the Bank has not completed a sub-grant agreement with the beneficiary of this project that was approved in November 1995. The Bank indicates that this project should not be cancelled because an Argentine justice has determined the amount of the company's debt and gave the company the legal right to maintain the project plan "up and running" and the beneficiary has expressed its desire to sign the sub-grant agreement.
- 14. The Committee has addressed the issue of the economic condition of the enterprise in previous decisions. In the context of obtaining counterpart funding (Decision 22/63), the Committee has requested agencies to carry out some preliminary screening of the financial viability of companies when preparing project proposals. In the context of its decision on bankruptcy (Decision 25/3), the Committee requested the agencies to carry some preliminary screening of the financial viability of companies when preparing project proposals. However, in the case of the Lobato San Luis refrigeration project in Argentina (ARG/REF/23/INV/69) that was approved in November 1997, the financial viability of this company has not yet been determined even though it was approved after the Committee's decision on counterpart funding.
- 15. Concerning the Geltec refrigeration project in Brazil (BRA/REF/18/INV/35), the current remarks indicate that the firm has yet to install the foaming equipment. However, the Bank's last report indicated that the foaming equipment was ordered and is under production by manufacturer. Now that the firm is in financial difficulties (bankruptcy). FINEP was supposed to assess the situation. 59 per cent of the total approved funds of \$228,250 have been disbursed and now the beneficiary is in bankruptcy proceedings. The Bank informed the Secretariat that the financial assessments were completed in February 1996, but the company began to experience difficulties due to last year's financial crisis in Brazil.

Beneficiary delays

- 16. The Bank's remarks mention problems with suppliers for the Multi Karya Makmu foam project in Indonesia (IDS/FOA/15/INV/20) as having led to the delay for this project that is 24 months late. The Bank informed the Secretariat that the delay was also due to financial crisis, the company continued to delay project implementation. However, at the moment the problem is with the supplier.
- 17. In the case of the PT Candi Swadaya Sentosa aerosol project in Indonesia (IDS/ARS/22/INV/61) was approved in May 1997 for about \$1.2 million, the enterprise was under financial performance appraisal a year ago according to the Bank's last progress report.

Now the enterprise feels insecure with the current economic situation and apparently is delaying providing ownership certificate (which should not take any time) and will not submit a renewal of the working capital loan. The Bank informed the Secretariat that P.T. Candi does not believe it is in a position to undertake its share of the investment costs. The Bank has asked for an implementation schedule by July 1999. The Executive Committee may wish to inquire of the status of this project at its 28th Meeting.

- 18. In the case of the Supercold Refrigeration project in India (IND/REF/20/INV/105) which was approved in October 1996, the Bank has not disbursed any of the funds for the project. The appraisal has not been completed. The sub-grant agreement has not been signed. The project is already classified as a project with an implementation delay of 20 months. The remarks indicate that there has been an inordinate delay in getting information from the company. At this point in time, the Government of India's letter authorizing implementation of the project has expired and the company will have to approach the Government for a revalidation.
- 19. The Hindustan refrigeration project in India (IND/REF/22/INV/123) was approved in May 1997 is already classified as a project with an implementation delay of 18 months. The Bank states that the reason for this is that the company has been slow to come forward with the required information.
- 20. The Refrigerators and Home Appliance refrigeration project in India (IND/REF/22/INV/124) was approved in May 1997 and is 15 months late. The Bank's remarks indicate that the enterprise was late in providing financial data. There seems to be a trend when this occurs. The Bank was asked if there were consequences for slow responses. The Bank stated that many of the enterprises are not necessarily willing participants in the programme, but have been made to agree to accept grants. The Committee may wish to consider if grant funds should be provided when the beneficiary does not agree to accept the grant.

Possible cancellation

- 21. The Executive Committee may wish to consider the following projects for possible cancellation after hearing a report from the World Bank updating their status at the time of the Executive Committee meeting.
- 22. The Randon Implementos foam project in Brazil (BRA/FOA/18/INV/31) is planned to be completed 12 months late and has not disbursed any funds since its approval in November 1995. This project was classified as a project with an implementation delay last year because it did not disburse 18 months after approval. At the 27th Meeting, the Bank indicated that it was discussing a lease arrangement to resolve an issue related to the ownership of the injection machine. There is no mention of this arrangement in the remarks about the project submitted to the 28th Meeting. Now, there is another issue of counterpart funding. The Bank indicated that it informed the Ministry of Environment of the situation and is seeking advice regarding cancellation. The Bank also indicated that the Ministry had sent letters to Randon and other companies in similar situations warning them of the cancellation risk.
- 23. The Bank reported in its progress report a year ago that all foaming equipment had been delivered and was awaiting installation for the Recrusal foam project in Brazil

(BRA/FOA/18/INV/32). The Bank is reporting again that the foaming equipment is awaiting installation after a delay of one year. No additional funds were disbursed in 1998. In its progress report, the Bank indicates that installation is dependent upon the availability of a mounting line in a new building which the firm delayed to construct due to financial constraints. Now the company wants to delay until June for installation. The Bank informed the Secretariat that if there is no progress in the equipment installation by June, the Ministry of Environment will advise the Bank on cancellation.

- 24. The Bank notes that PT Irc Inoac Indonesia does not intend to continue with the project (IDS/FOA/23/INV/75). The Fund approved US \$412,900 for this project in November 1997 and no funds have been disbursed yet. The Bank informed the Secretariat that Inoac is having a dispute with the supplier. However, the Bank also indicated that the beneficiary is under financial pressure where they could not afford self-financing the remaining costs of US \$93,000. The Bank stated that no progress could be expected until July 1999.
- 25. The financial intermediary in Indonesia issued a warning of impending cancellation of sub-grant if no progress in 30 days for the beneficiary, PT Sea Horse Maspion Indonesia (IDS/FOA/23/INV/76). The Bank's remarks in its database indicate that the beneficiary will not provide the information needed to begin the project. The project was approved in November 1997 at a cost of US \$532,200.
- 26. Sree Precoated Steels foam project (IND/FOA/17/INV/44) is planned to be completed 17 months late. This project was approved in July 1995. The grant agreement was signed a year ago. The only progress in 1998 was the opening of a letter of credit. Now this project is expected to be completed in June 1999. When the Bank was asked to clarify the situation on this project, the Bank informed the Secretariat that the project has not been able to move forward and it appears that the project will have to be cancelled. The financial intermediary is to conduct a new financial appraisal and to confirm the enterprise's financial health by the end of June 1999. The remarks do not indicate what progress will occur during the six months until project completion.
- 27. JIPCO aerosol project in Jordan (JOR/ARS/20/INV/26) was approved in October 1996. The beneficiary does not agree with the level of grant the Committee approved for the project. The Bank reported the fact of this beneficiary's disagreement with the Committee's decision as the status of the project at the end of 1996, at the end of 1997, and now at the end of 1998, the beneficiary is still being allowed to explore options. The Executive Committee has already been asked to review the project for additional funds. The Committee decided against any additional funds for the project based on its second review. The enterprise was informed that they needed to raise the counterpart funding or the project would be cancelled. The enterprise plans to have the situation resolved by August.
- 28. The Indurnor refrigeration project in Uruguay (URU/REF/15/INV/12) was approved in December 1994. This project was classified as a project with an implementation delay last year. It is now expected to be completed 19 months late. None of the \$448,140 approved for this project four years ago has been disbursed. At the 27th Meeting, the Bank reported ongoing discussion to seek a solution. Delays were also reported at the previous meetings. The Bank

informed the Secretariat that the project has been cancelled because the company is being liquidated.

Adjustments

- 29. The Bank reported the return of \$2,179,109 in project cancellations and remaining unspent balances from financially completed projects. None of the projects have been noted as cancelled in previous Executive Committee meeting reports. The Bank noted that the following projects had been cancelled:
- Everest refrigeration (BRA/REF/19/INV/51)
- Embraer phase out of CFC-113 and MCF used in vapor degreasers to clean aircraft parts (BRA/SOL/18/INV/38)
- BKJ in Thailand (THA/SOL/19/INV/53)
- Congresso de la Republica in Venezuela (VEN/REF/08/INV/11)
- 30. The Bank has three projects that are listed as closed but there are remaining balances in the progress report. One of the projects, Siam Stainless Steel refrigeration project in Thailand was reported canceled and funds returned to the 27th Meeting, after the progress reporting period. The other two project balances equal US \$352,558 (JOR/FOA/07/INV/06 and TUR/FOA/24/INV/33). The Bank indicated that the balance from the Jordanian project is part of a line of grant that will be used for other activities. The Bank's report to the Committee at the 28th Meeting might address these funds and their disposition.
- 31. Subsequent to its submission of its revised progress report, the World Bank and the Secretariat met to address inconsistencies between the Bank's progress report and the Inventory of Approved Projects and the Treasurer's Report on the Accounts of the Fund. The Executive Committee may wish to receive a report on the additional adjustments needed to correct these inconsistencies.

Completed projects with outstanding balances

- 32. The World Bank has 21 projects that were completed over one year ago but have remaining balances. The total remaining balances of these 21 projects is \$1,946,006 (excluding agency fees). The Bank indicated that the remaining balances for the following projects approved in 1992 were part of a line of grant, so the funds will be used for other projects in Turkey:
- "Technical assistance and demonstration of non-CFC technology in rigid and flexible foam production (TUN/ARS/07/TAS/04),
- "Maintenance of domestic, commercial and industrial refrigeration systems" (TUN/REF/07/TAS/05), and
- "Technical assistance for development of HFC-134a-based domestic refrigerators" (TUN/REF/07/TAS/05).
- 33. The Executive Committee may wish to consider whether remaining balance of lines of grants approved in 1992 could be used for new or other activities.

Project reclassified as retroactive after approval

34. The Bank informed the Secretariat that the Alcan Nikkei Thai Aluminum Company project in Thailand (THA/FOA/23/INV/72) is a retroactive project and therefore it is physically complete, but is not yet disbursing. The Bank indicated that the funding type has been changed in the Bank's database to retroactive. However, the project document did not indicate that the project was retroactive. This project was approved in November 1997 at a cost of US \$84,300 to phase out 43.5 ODP tonnes.

RECOMMENDATIONS

The Executive Committee may wish to consider:

- 1. If any action should be taken for those beneficiaries that have continued to use CFCs after near or total equipment replacement.
- Interclima company (ARG/REF/15/INV/15)
- Aero Pharma aerosol project in India (INS/ARS/11/INV/10)
- 2. The report on the World Bank on the CFC recovery and recycling projects in Brazil as requested in Decision 27/9(d) and then decide if the project should be transferred to UNDP or should a new proposal be submitted prepared according to the current guidelines for recovery and recycling projects when the pre-requisites for success are in place.
- 3. Requesting the World Bank to provide reports on all of the projects with implementation delays that were identified by the Secretariat in accordance with the Committee's procedures concerning projects with implementation delays.
- 4. For how long should agencies delay project implementation to allow for market conditions to improve as this has pertinence to the following World Bank projects:
- Mirgor refrigeration project in Argentina (ARG/REF/14/INV/17),
- Adzen refrigeration project in Argentina (ARG/REF/19/INV/43),
- Simon Cachan refrigeration project in Argentina (ARG/REF/15/INV/16),
- Aurora refrigeration project in Argentina (ARG/REF/18/INV/35)
- Piragua refrigeration project in Argentina (ARG/REF/18/INV/26),
- Lobato San Luis refrigeration project in Argentina (ARG/REF/23/INV/69),
- Geltec refrigeration project in Brazil (BRA/REF/18/INV/35), and
- the Gansu Changfeng Baoan Industry refrigeration project in China (CPR/REF/20/INV/176).
- 5. For how long implementing agencies should allow the beneficiaries to delay projects as this has pertinence to the following World Bank projects:
- Multi Karya Makmu foam project in Indonesia (IDS/FOA/15/INV/20),

- PT Candi Swadaya Sentosa aerosol project in Indonesia (IDS/ARS/22/INV/61),
- Supercold Refrigeration project in India (IND/REF/20/INV/105),
- Hindustan refrigeration project in India (IND/REF/22/INV/123), and
- Refrigerators and Home Appliance refrigeration project in India (IND/REF/22/INV/124).
- 6. The possible cancellation of the following projects after considering the report of the World Bank at the meetings of these projects (to be noted in the report of the Executive Committee):
- Randon Implementos foam project is Brazil (BRA/FOA/18/INV/31),
- Recrusal foam project in Brazil (BRA/FOA/18/INV/32),
- PT Irc Inoac foam project in Indonesia (IDS/FOA/23/INV/75),
- PT Sea Horse Maspion Indonesia (IDS/FOA/23/INV/76),
- Sree Precoated Steels foam project (IND/FOA/17/INV/44),
- JIPCO aerosol project in Jordan (JOR/ARS/20/INV/26), and
- Indurnor refrigeration project in Uruguay (URU/REF/15/INV/12).
- 7. The Bank noted that the following projects had been canceled and the Report of the Executive Committee should note the cancellation of the following projects:
- Everest refrigeration (BRA/REF/19/INV/51)
- Embraer phase out of CFC-113 and MCF used in vapor degreasers to clean aircraft parts (BRA/SOL/18/INV/38)
- BKJ in Thailand (THA/SOL/19/INV/53)
- Congresso de la Republica in Venezuela (VEN/REF/08/INV/11)
- 8. Requesting a report from the World Bank on closed projects with remaining balances of \$352,558 (excluding agency fees) for the following two projects:
- Phase out of CFC use in flexible foam at International Foam Industries Co. Ltd. (JOR/FOA/07/INV/06) and
- Conversion from CFC-11 into all-water and HCFC-141b for integral skin foam at Polifleks Sentetik Maddeler Sanayii Ve Ticaret A. S. (TUR/FOA/24/INV/33).
- 9. Requesting the World Bank to present additional adjustments to correct data inconsistencies between the Bank's progress report and the Inventory of Approved Projects and the Treasurer's Report on the Accounts of the Fund.
- 10. For how long should remaining balances exist after project completion before the agencies' should return the remaining balances to the Fund.
- 11. Whether remaining balances from lines of grants approved in 1992 could be used for new or other activities. This is pertinent to the following Bank projects:
- "Technical assistance and demonstration of non-CFC technology in rigid and flexible foam production (TUN/ARS/07/TAS/04),

- "Maintenance of domestic, commercial and industrial refrigeration systems" (TUN/REF/07/TAS/05), and
- "Technical assistance for development of HFC-134a-based domestic refrigerators" (TUN/REF/07/TAS/05).
- 12. Requesting a report from the World Bank on the reclassification of the Alcan Nikkei Thai Aluminum Company project in Thailand (THA/FOA/23/INV/72) as a retroactive project and any action that should be taken in that regard.

I. PROJECT APPROVALS AND DISBURSEMENTS

A. Annual Summary Data

- 1. During the twelve months from January-December 1998, implementation of the World Bank Multilateral Fund activities has shown exceptional progress. Actual ODP phaseout has reached 62,938 metric tons (MT) --70 percent of the total ODP to be phased out under the World Bank portfolio and an increase of over 31,000 tons from 1997. Disbursements to enterprises increased by US\$56.3 million in 1998 (not including agency fees). Project performance for the Multilateral Fund for the Implementation of the Montreal Protocol (MFMP) activities since the inception of the program in 1991, are summarized in Table 1.1. Performance is based on the year in which the activity was approved. The total number of approvals has increased from 52, in 1991, to 695 to date. In the same time period, the total of funds disbursed in implementing these activities has increased to US\$184,924,266. Total disbursement of the portfolio now stands at 56 percent.
- 2. The performance target for ODP phaseout for 1998 was 30,000 MT plus 1,186 tons of shortfall from the previous year. With phaseout of 31,765 MT, the World Bank has exceeded its ODP phaseout target for 1998 by 579 tons. Phaseout of over 70 percent of ODP under the portfolio has now been achieved. The World Bank's disbursement target for 1998 was US\$59.7 million. This target was increased by decision of the Executive Committee to US\$70.7467 million (70 percent of all approvals, including agency fee through 1997). The World Bank disbursed US\$56.3 million in 1998. If we include the agency fee as directed by the Executive Committee, total disbursements for 1998 equal US\$61.93 million. This means that the World Bank exceeded its own target for 1998 and achieved 85 percent of the target set by the Executive Committee.

Table I.1: Annual Summary

Year Approved/Imple- mentation Characteristic	Number of Approvals	Number Com- pleted	% Completed	ODP to be Phased Out	ODP Phased Out	Per Cent of ODP Phased Out	Approved Funding (US \$)	Adjustment (US \$)	Funds Disbursed (US \$)	Per Cent of Funds Disbursed	Balance (US \$)	Planned Commitment in Current Year (US \$)	Administrative Support (US \$)
Disbursement	after Comple	tion											
1991	15	15	1.00	589	627	1.07	4,180,000	(126,208)	4,053,792	1.00	-	-	285,436

^{* -} Does not include projects that were implemented before Executive Committee approval.

Note 1: Agency and National implementation is not distinguished in this table.

Note 2: Retroactive projects and time-sensitive accounts are provided for all years as one cumulative figure (not included in annual data).

Note 3: 3% Agency Fee for Projects Approved before Nov 1995 included in Approved Amount.

Note 4: Administrative support for Projects Approved before Nov 1995 includes only central administrative functions. Supervision is recorded with project preparation and is exhibited here.

Note 5: Adjustments include both subsequent approvals for existing projects and funds returned on approved projects.

Note 6: Cancelled and transferred projects have been removed from both approved and completed projects columns.

`B. Interest

3. The total interest earned on Multilateral funds held by the Bank for the reporting period (January 1, 1998 to December 31, 1998) was US\$5,280,746. As of 12/31/98 the cumulative interest earned was US\$23,373,808.

C. Summary Data by Project Type (CPG, DEM, INS, INV, PRP, TAS, TRA)

4. Table I.2 summarizes the entire portfolio of World Bank project approvals, adjustments and disbursements by type of project or activity. As can be seen from the table, the major proportion of the Bank's approved funding to date has gone for investment projects, US\$291,151,924. In contrast to investment projects, the amounts allocated for institutional strengthening, US\$1,930,940 and country program development, US\$1,452,732 have decreased in relative proportion as ODS phaseout programs mature in Article 5 countries and their capacity for their own management improves.

Table I.2: Summary Data by Project Type

Туре	Number of Approvals	Number Completed	Per Cent Completed	Approved Funding (US\$)	Adjustment (US\$)	Funds Disbursed (US \$)	Per Cent of Funds Disbursed	Balance (US\$)	Planned Commitments in Current Year (US\$)

D. Sector Phaseout by Country

5. Table I.3 presents a summary list of sectors, which have received Multilateral Fund support through the Bank, by country and amount of ODS phased out. At the present time, the World Bank's portfolio of ODS phaseout projects has resulted in 62,938 MT in 16 countries.

Table I.3: Sector Phaseout by Country

Country	Aerosols	Foams	Halons	Multi-sector	Other	Production	Refrigeration	Solvents	Total

II. PROJECT COMPLETIONS SINCE LAST REPORT

6. Projects completed during this reporting period (January 1, 1998 to December 31, 1998) are highlighted in Table II.1 below.

A. ODP Phased Out Since Last Report

7. The total quantity of ODP phased out in association with the 83 projects completed during the reporting period amounts to 5,568 MT ODP and are 0.82 percent disbursed, leaving a current balance of US\$6,746,386. Additional phaseout of 26,197 ODP MT was achieved through projects which are ongoing. This includes 21,678 MT of phaseout achieved through implementation of the 1998 Halon Sector annual program. The 1998 annual program is fully complete, but the sector phaseout itself is, of course, ongoing. Total ODP phased out for 1998 reached 31,765 MT about 102 percent of the Bank's 1998 Business Plan target.

B. Non-Investment Project Completions Since Last Report

- (a) <u>Country Programs</u>: The World Bank has completed none Country Programs since the last report.
- (b) <u>Technical Assistance</u>: The World Bank has completed three technical assistance projects since the last report.
- (c) <u>Training</u>: The World Bank supports through its administrative fees ongoing training of its Financial Agents and other local executing agencies. The Bank held its third workshop for financial agents in October 1998. The workshop focussed on applying the lessons learned through Financial Agent (FA) experience to improve implementation. For example, FAs for South East Asia discussed some of the challenges of working under the Asian financial crisis and solutions they had developed. In addition, recognizing the importance of quality completion reports for the work of the Multilateral Fund, an interactive training session was held on the new format for completion reporting.

III. GLOBAL AND REGIONAL PROJECT HIGHLIGHTS

A. Global Projects

8. The World Bank has no outstanding global projects.

B. Regional Projects

9. The World Bank has no outstanding regional projects.

IV. PERFORMANCE INDICATORS

A. Agency Business Plan Performance Goals

10. Table IV.1 summarizes the World Bank's performance relative to indicators established for the business planning process.

WORLD BANK PERFORMANCE INDICATORS Indicator Measure Unit 1991 1992 1993 1994 1995 1997 1998 Overall Delivery Speed Mos. 20 Signing 48 40 31 26 17 10 First Disb Mos. 20 26 Last Disb Mos 57 52 38 28 20 45 ODP Phaseout Amount % age 107% 124% 89% 79% 47% 16% 78% 1% 70% Speed Mos. 55 35 40 6 10.54 Cost Effective Average \$ per Kg 7.10 1.16 4.00 8.02 7.92 2.11 2.40 3.22 ODP

Table IV.1: World Bank Business Plan Performance Goals

B. Cumulative Completed Investment Projects

11. Since 1991, the World Bank's cumulative total of completed investment projects has grown to 171, resulting in 62,938 MT of ODP phaseout (including phaseout from partially completed projects). Out of a total of US\$102,750,797 of approved Multilateral Fund financing for completed projects, 87 percent of funds has been disbursed. The average number of months from approval to first disbursement has been 28, the average number of months from approval to completion has been 37, at an average cost-effectiveness of US\$2.28/kg. These averages include projects prepared both before and after initiation of the Umbrella Grant Agreement approval process. Table IV.1 illustrates the improvements made in these indicators over the past two years.

^{1.} Projects approved in 1996 (at the 19th meeting) were not funded until after the reporting period was completed. Therefore, implementation of these projects did not begin until after June 30, 1996.

^{2.} Prior to November 1995, a Financial Intermediary fee of 3 percent (on average) was included in the cost of the project.

Table IV.2: Cumulative Completed Investment Projects

C. Cumulative Completed Non-Investment Projects

12. Since 1991, the World Bank's cumulative total of completed non-investment projects has grown to 221. Out of a total of US\$29,031,259 of approved Multilateral Fund financing, 100 percent of funds has been disbursed. As these are non-investment projects, funds are usually made available very quickly, thus the average number of months from approval to first disbursement has been 5, the average number of months from approval to completion has been 16.

Table IV.3: Cumulative Completed Non-Investment Projects

D. Cumulative Ongoing Investment Projects

13. Since 1991, the World Bank's cumulative total of ongoing investment projects has grown to 219. Out of a total of US\$188,401,126 of approved Multilateral Fund financing, 34 percent of funds has been disbursed. The average number of months from approval to first disbursement has been 26, the average number of months from the end of the reporting period to current expected completion is 11, with an average cost-effectiveness of US\$3.43/kg.

E. Cumulative Ongoing Non-Investment Projects

14. Since 1991, the World Bank's cumulative total of ongoing non-investment projects has grown to 34. Out of a total of US\$8,840,770 of approved Multilateral Fund financing, 24 percent of funds has been disbursed. The average number of months from approval to first disbursement has been 27, the average number of months from the end of the reporting period to current expected completion is 10.

V. STATUS OF AGREEMENTS AND PROJECT PREPARATION (WHERE APPLICABLE), BY COUNTRY

A. Agreements to be Signed/Executed/Finalized and When They Will be Ready for Disbursing

15. The table below lists the Grant Agreements waiting to be signed/executed/finalized when they will be ready for disbursing.

Table V.1: Status of Agreements

Country	MP Project	Type of Grant	Amount	Planned/Actual	Planned Signing	
		Agreement	(US\$ million)	RVP Approval		
Turkey	Izopoli (IFC)	Individual	1.1415	December 1998	December 1998	

B. Project Preparation by Country, Approved Amount, and Amount Disbursed

16. A list of active World Bank project preparation activities is presented in the table below. Total funds approved for these projects is US\$2,907,138 and total funds disbursed to date amount to US\$1,438,910, or 47 percent of total approved funding plus adjustments to date. Planned additional commitments for these projects during the current year are US\$1,205,000.

Table V.2: Active Project Preparation

Region		Project	Numl	ber		Title	First Disbursement Date	Approved Funding (US \$)	Adjustment (US \$)	Funds Disbursed (US \$)	Per Cent of Funds Disbursed	Balance (US \$)	Planned Commitments in Current Year (US \$)

9th Meeting of the Parties

Table VI.1: MP Meetings Attended by World Bank Staff

B. Implementing Agency and Other Cooperation

Egypt

18. The World Bank cooperates with other Implementing Agencies and with national governments to coordinate ODS phaseout in countries in which it is active. In 1998, the Bank worked closely with governments in helping to develop policies and new approaches to aid them in achieving their targets under the Montreal Protocol. An example of this is the Bank's work with China and India in developing the program for phasing out CFC production. The Bank worked with UNEP on activities in 1998, cooperating with them closely on the Refrigeration Management Plan Workshop and providing needed data for their work on recovery and recycling projects. In 1999, we look forward to developing a stronger relationship with UNEP working to assist in the development of a methyl bromide policy in China. In addition, as the Bank is the pioneering agency in developing national CFC phaseout strategies, we will be assisting in the development of a national CFC phaseout program for the Bahamas.

C. Adjustments

11/16 - 11/20

19. This table summarizes the savings (including cancellations and transfers) for the period of January 1, 1998 to December 31, 1998 of which US\$2,179,109 has already been reported and returned to the Multilateral Fund.

D. Other Issues

- 20. There were a number of activities undertaken in 1998 which bear highlighting. First among these is the successful completion of the 1998 annual program under the Sector Program for Phaseout of Halons in China. The excellent implementation of the annual program achieved a phaseout of over 21,000 ODP MT in the halon sector. The enterprises and government agencies involved worked quickly and efficiently to implement the plan and we look forward to similar performance in 1999.
- 21. In implementing the 1998 plan, China exceeded its production target by 1.6% which resulted in additional phaseout of halon in the production sector by about 100 MT. In the consumption sector, China had a small shortfall of about 2% of its target or 149 MT. However, China exceeded their export target by 33.7% resulting in additional savings of 269 MT; 120 MT more than the shortfall in the consumption sector. Therefore, despite the 2% shortfall in the consumption sector, China achieved, and in fact exceeded, its overall objectives of their 1998 annual plan.
- 22. The numbers above reflect the baseline information provided in the 1998 annual plan. In fact, the baseline numbers proved to be considerably higher (see audit report to ExCom). The achievement reported in the above paragraph may actually underestimate the true success and impact of the 1998 annual plan. Using the actual baseline numbers for 1997, the impact of the 1998 annual plan was even greater than expected, equaling a total phaseout of 22,824 ODP MT -- almost 2,000 ODP MT higher than planned.
- 23. Significant progress was also made in the development of new and innovative programs in 1998. First among these is the Thailand Chiller Replacement Program which is the first large-scale concessional lending project to be funded under the Multilateral Fund for the Implementation of the Montreal Protocol (MFMP) and approved in 1998. The project will utilize funds from the both the MFMP and the Global Environment Facility (GEF) as a concessional loan to finance the replacement of CFC chillers with high-efficiency, non-CFC chillers. It is expected that within seven years the initial funding of US\$5 million will have been re-paid to the lenders by the Electricity Generating Authority of Thailand.
- 24. In addition, 1998 saw significant progress in the development of CFC production sector phaseout programs in China and India. These programs aim to phase out 70 percent of CFC production capacity in developing countries. The Bank looks forward to possible approval of these programs in 1999.
- 25. Finally, with phaseout of 31,776 MT ODP this year the World Bank has achieved its greatest annual phaseout to date. Over 70 percent of ODP to be phased out in the portfolio has now been achieved.
- 26. Issues of delay for a few countries in particular presented challenges in 1998. A few enterprises in Argentina have experienced on-going delays due to financial difficulties. Two of these projects have now been cancelled, but a few are still awaiting action. The Bank has some concerns about merely canceling these projects because of the potential for:
 - (a) the enterprises to recover financially and start-up and continue use of CFCs after cancellation; and

- (b) the enterprises selling the CFC equipment as a remaining asset or under bankruptcy rulings after cancellation.
- 27. Similar issues apply in Indonesia where some companies have faced financial pressure due to the financial crisis there.
- 28. A possible solution to this problem is to "buy-out" the CFC-using equipment for an agreed sum and then cancel the project and return any unused funds to the MFMP. The process would include verification of destruction of CFC-using equipment and remove the danger of the equipment's continued use either by the initial enterprise or through entry into the marketplace. Some enterprises in Argentina have expressed interest in discussing this possibility and with guidance from the Committee we could move forward to develop a demonstration of the approach. Should it be successful, this approach could provide a valuable tool for dealing with some of the bankruptcy cases which have arisen over the past few years in several countries.
- 29. Other issues concern ongoing problems with the CFC Recycling project in Brazil. This project continued to experience problems throughout 1998. However, with recent elections, there appears to be a renewed interest on the part of the government of Brazil to work in resolving outstanding issues related to non-implementation. With regard to the fumigants demonstration project in Chile, it has proved necessary to amend the grant agreement because of the "demonstration" status of the project. The letter amending the agreement has been sent to the *Contraloria* (the responsible government body) and a response is expected within a month.
- 30. Finally, 1998 saw some problems with a few companies implementing projects in China. On-going monitoring uncovered what appeared to be continued use of CFCs in some enterprises despite near or total equipment replacement. This problem appears to be related to enterprise reluctance to move given current market forces at play in these sectors. This problem should be resolved soon in the MAC sector with the upcoming implementation of the MAC sector approach. For those projects in the foam sector, once identified SEPA agreed to take immediate action and to develop procedures to ensure sustainable phaseout.
- 31. It should be emphasized that this is a rare case which has only occurred at very few enterprises in China. The World Bank has policies in place which in almost every case prevent this type of action from occurring. Close monitoring discovered the problem which is being dealt with by the Government of China in cooperation with the World Bank and its financial agents. The Bank believes it is important to make note of this in the progress report, because even when agencies have appropriate guidelines/policies in place, close monitoring is essential to ensure that they are followed.

PROGRESS AND FINANCIAL REPORTING DATABASE

Global Environment Division, Environment Department

The World Bank

World Bank: Projects with Implementation Delays (1998)

Attached please find the Annex to the World Bank's 1998 Progress Report on "Projects with Implementation Delays." The World Bank currently has 54 projects which fall under the definition for projects with implementation delays, i.e., either projects which have not been completed within 12 months of planned completion date (per proposal or 22nd meeting) and projects with no disbursement 18 months after approval. Twelve of the 54 projects have delays under both categories. (The 55th project in the list, Ajax Refrigeration of Zimbabwe is actually now part of Commercial Refrigeration. Please see status.)

Of the total projects listed in the table, 6 projects have been cancelled. (These projects were on-going as of 12/98 and the Bank was asked to include them in the report. Funds for 5 of these projects have been returned to the ExCom as of the 28th meeting. Funds from the remaining cancelled project will be returned to the 29th meeting.

Given the World Bank's practice of disbursing funds on a reimbursement basis, a significant number of the remaining 48 projects are actually well along in implementation (as shown by bids completed, contracts signed, letters of credit opened, equipment procured and installed, etc.). Twenty projects are actively underway -- with actions taken as listed above or having already begun disbursements in 1999.

The remaining 28 projects represent 4 % of the World Bank's active portfolio.

1	World Bank: Projects with Implementation Delays												
Country	ID	Title	Туре	Status	Sector	Approval Date	Funding	Appraisal Date	Signing Date	Remarks			
Argentina	214	Fribe La Rioja Plant. Conversion of a domestic refrigeration plant. Replacement of CFC-11 used as blowing agent with cyclopentane and CFC-12 used as refrigerant with HFC-134a	INV	ONG	Refrigeration : Domestic	Dec/94	1,488,127			Project cancelled due to bankruptcy. Funds returned at 27th meeting.			
Argentina	216	Fribe Buenos Aires Plant. Conversion of a domestic refrigeration plant. Replacement of CFC-11 used as blowing agent with cyclopentane and CFC-12 used as refrigerant with HFC-134a	INV	ONG	Refrigeration : Domestic	Dec/94	1,822,750			Project cancelled due to bankruptcy. Funds returned to 27th meeting.			

Argentina	218	McLean S.A. Conversion of a domestic refrigeration plant Replacement of CFC-11 used as blowing agent with cyclopentane and CFC-12 used as refrigerant with HFC-134a	INV	ONG	Refrigeration : Domestic	Dec/94	2,440,570	Subgrant Agreement signed in July 1997. Company underwent ownership change. New allocation of resources bending a guarantee from a comercial bank because foam equipment is subject to a lien. Update: A commercial bank has issued a guaranty bond to back the eligible retroactive funding corresponding to the foaming equipment bought in 1994. The company has experienced changes in its capital structure. It is now only 25.8% eligible. An amendment to the Subgrant Agreement will be signed within a month, to start disbursement and continue with the project.
Argentina	221	Mirgor S.A. Conversion of the production of CFC-12 hoses for MAC to HFC-134a refrigerant	INV	ONG	MAC	Dec/94	35,632	Subgrant Agreement not yet signed. Company has been unable to advance the project due to a difficult market butlook. Update: Company has procured planned equipment and is planning to start up its non-ODS production as soon as the conversion is fully complete; the enterprise is expected to sign the subgrant agreement within a month and the Government is clearing the information on capital composition.

Argentina	326 Aurora S.AElimination of CFCs in domestic refrigerator production plants.		ONG	Refrigeration : Domestic	Nov/95			Subgrant Agreement unsigned yet due to unstable economic condition of enterprise. The company has not issued the information required to make a proper evaluation of the project status. Update: AURORA has received from the responsible Argentinean authority a temporary debt payment waiver. The justice has already determined the amount of the debt and will establish the repayment schedule. The consideration of cancellation by The Ex Com should be postponed because (i) company is still producing, (ii) the Argentinean justice gave them the legal right to maintain the production plant up and running, and iii) the company still expresses desire to sign the subgrant agreement. The June mission will visit the plant and make a decision about the project viability.
Argentina	321 Neba, S.AElimination of CFCs in the manufacturing plant of domestic refrigerators.	IIIV	ONG	Refrigeration : Domestic	Nov/95	686,370	Decisi	HFC-134a equipment purchased. The order for the foaming equipment has been placed and disbursement has begun. A weak market outlook forced the company to delay the completion of this project.

Argentina	325	Piragua S.A., and Piragua San Luis Elimination of CFCs in 2 domestic refrigerator manufacturing plants.		ONG	Refrigeration : Domestic	Nov/95	1,040,264	to unstable enterprise. issued the i make a pro	greement unsigned yet due economic condition of The company has not information required to per evaluation of the us. Update: See update for
Argentina	327	Adzen S.A.C.I.F.	INV	ONG	Refrigeration : Domestic	May/96	356,970	to unstable enterprise.1 issued the i	greement unsigned yet due economic condition of the company has not not more action of the core evaluation of the is.
Brazil	5	Recovery, recycling and reclamation project Sao Paolo pilot project and soft drink bottlers project	TAS	ONG	Refrigeration	Jun/92	2,000,000	and a "sale been warne disburseme cancelled. F expected so and will be	oroblems related to import is type" tax. Ministry has did that without int project may be further progress is soon given recent elections reported at the upcoming Jpdate: Project to be

Brazil	332 Randon Implementos S.A. substitution of CFC-11 by HCFC-141b in the manufacture of polyurethane foams	INV	ONG	PU Foams : Rigid	Nov/95	92,180	Apr/97	Delays caused by Injection machine ownership issue which continues undefined plus hesitation from the firm about investing their counterpart in the project. If progress is not shown project might be cancelled. Update: The company has not moved to implement the project. The World Bank has informed the Ministry of Environment of this situation seeking its advise regarding cancellation. We understand that letters from the Ministry were sent to this and other companies in similar situation warning them of the cancellation risk. We will update the situation by the end of June.
Brazil	334 Refrigeracao Parana S.A. Curitiba elimination of CFC-11 and CFC-12 in the manufacture of commercial chest freezers	INV	ONG	Refrigeration : Commercial	Nov/95	1,557,613	Jan/97	The firm went ahead with its own funds and completed one line (vertical freezers) in July 97; and the other line (horizontal freezers) in Nov. 98. FINEP will reimburse the firm retroactively for capital costs; operating costs need further documentation before disbursement.

Chile	458	CONAMA MP implementation program Phase II first tranche	INV	ONG	Multi-sector	May/96	1,000,000			Update: About \$226,000 have been disbursed for project CHI/MUS/19/INV/14 so far. The balance has been committed and is expected to be disbursed in 2000. Projects undertaken within the auction program win the bid and then implement. While the auctions have been completed for the first part of the auction program, conversions will be on-going through May 2000.
China	349	Conversion to CFC-free technology in the manufacture of flexible (slabstock) polyurethane foam at Qingyang Chemical Corp.	INV	ONG	Foams : Flexible	May/96	362,000	Jun/97	Oct/97	Implementation has been very slow. In order to speed up implementation, the financial agent obtained a technology consultant to assist the plant on technology transfer issues. Now bidding documents have been delivered to 3 bidders.
China	484	Conversion of manufacturing facilities from CFC-11 foaming agent to cyclopentane at Shanghai Shuanglu Electrical Appliance Co. Ltd.	INV	ONG	Domestic Refrigeration (PU Foams part)	Oct/96	1,899,230	Nov/97	Dec/97	Project cancelled. Company bankrupt. Funds returned at 27th meeting.
China	482	Conversion to CFC-free technology in the manufacture of flexibe (slabstock) polyurethane foam at Chengdu Plastics No. 7	INV	ONG	Foams : Flexible	Oct/96	301,000			The factory decided to switch technology to LCD. Delays caused by lengthy ExCom deliberations on LCD guidelines. ExCom approved revised project summary in March 98. Appraisal report is under preparation.

China	570	Conversion of CFC-12 small open type refrigerating compressor production at Ningbo Refrigerating Machinery Factory	INV	ONG	Commercial Refrigeration : Compressor	May/97	1,786,949	Mar/98	May/98	The subgrant agreement was signed in 5/98. The technology transfer contract was signed in 5/98, and approved in Dec. 1998. The contract for machining center was signed in Nov. 1998 with DMG German, and will be implemented from January 1999.
China	569	Conversion of CFC-12 medium open type refrigerating compressor at Chongqing Bingyang Refrigerating Machine Co.	INV	ONG	Commercial Refrigeration : Compressor	May/97	1,805,370	Jul/98	Aug/98	The subgrant agreement was signed in 8/98. The technology transfer contract was signed with HKT in July 1998 and approved in Dec.
China	568	Conversion of CFC-12 small and medium open type refrigerating compressor production at Zhejiang Chunhui Company (Group) (ZCC)	INV	ONG	Commercial Refrigeration : Compressor	May/97	3,200,394	Jul/98	Aug/98	The subgrant agreement was signed in 8/98. Technology transfer contracts were signed with HKT and Blissfield USA in July 1998 and approved in Dec.
China	567	Conversion of CFC-12 small open- type and semi-hermetic refrigerating compressor to HCFC-22 refrigerating compressor at Zhenjiang Refrigerating Equipment Factory (ZREF)	INV	ONG	Commercial Refrigeration : Compressor	May/97	1,048,286			Machining center delivered and procurement for imported equipment is complete.
China	566	Conversion of CFC-12 medium open type refrigerating compressor at Wuhan New World Refrigeration Industrial Co. Ltd.	INV	ONG	Commercial Refrigeration : Compressor	May/97	1,459,871	Dec/98		Appraisal reports just approved, and the subgrant agreement will be signed in January 1999. Update: Subgrant agreement was signed on January 10, 1999. The enterprise has already negotiated and signed a contract for the technology transfer with HKT. Wuhan has also initiated the procurement of the machining center, and hopes to sign a contract by June 1999.

China	565	Conversion of CFC-12 small open- type refrigerating compressor to HCFC-22 refrigerating compressor at Subei Refrigeration Machinery Factory	INV	ONG	Commercial Refrigeration : Compressor	May/97	1,806,908	Dec/98		Appraisal reports just approved, and the subgrant agreement will be signed in January 1999.
China	564	Conversion of CFC-12 medium open-type refrigerating compressor to HCFC-22 compressor at Guangzhou Refrigerating Machinery Factory	INV	ONG	Commercial Refrigeration : Compressor	May/97	1,904,769	Jul/98	Aug/98	The subgrant agreement was signed in 8/98. The technology transfer contract was signed with HKT in July 1998 and approved in Dec.
India	283	Karnataka	INV	ONG	Foams : Flexible	Jul/95	253,200	Jul/96	Mar/98	Delays in bidding. Orders now placed for equipment; L/Cs being opened.
India	289	Sree Precoated Steel	INV	ONG	PU Foams : Rigid	Jul/95	224,000	Jul/96	Feb/97	Update: The enterprise has not been able to move forward at all, and it appears that the project will have to be cancelled. This project was reviewed with the enterprise management and the FI on May 24, 1999. Other divisions of the company have suffered substantial setbacks. The FI has been asked to conduct a fresh financial appraisal and to confirm the enterprise's financial health by the end of June 1999, after which appropriate recommendations will be made.
India	356	Real Value Appliances Ltd.: Conversion from halon 1211 to ABC dry chemical power (ABC-DCP) and carbon dioxide (CO2) in portable extinguishers	INV	ONG	Halons	Nov/95	251,736			Production phased out. No disbursements can take place until financial situation of company improves.

India	488	Supercold Refrigeration Systems	INV	ONG	Refrigeration : Commercial	Oct/96	133,770			Appraisal being scheduled. There has been inordinate delay in getting information from company. Update:The appraisal report was received in May 1999. However, the Government of India's letter authorizing implementation of the project has meanwhile expired, and the company has been asked to approach the Government for revalidation.
India	486	Godrej Phase 1	INV	ONG	Refrigeration : Domestic	Oct/96	2,691,570	Sep/98	Nov/98	Start-up was delayed for completing International competitive bidding procedure. Now bidding and contracting underway. Subgrant Agreement signed. Update: An amount of US\$228,146 has already been disbursed this year to the enterprise, and letters of credit in excess of \$1 million are to mature in June 1999.
India	550	Elimination of CFCs in the manufacture of domestic refrigerators at Maharaja International Ltd.	INV	ONG	Refrigeration : Domestic	May/97	510,000	Oct/97	Sep/98	SGA signed. Equipment being procured.
India	551	Conversion of domestic refrigerator manufacture to cyclopentane blowing agent and either R-600a or HCF-134a refrigerant at Voltas Ltd.	INV	ONG	Refrigeration : Domestic	May/97	2,724,378	Dec/98		Appraisal completed for Hyderabad unit. SGA being signed.

India	540	Attarwala and Co. Pvt. Ltd. aerosol conversion, Bombay	INV	ONG	Aerosols	May/97	134,250	Nov/97		Appraisal under way. Suppliers being identified. Project was delayed because company could not finalize site for implementing the project and wanted to withdraw, but was persuaded to explore further and has now found a safe location.
India	539	My Fair Lady aerosol conversion, Delhi	INV	ONG	Aerosols	May/97	113,975			Company has not yet provided information for appraisal and may have to be cancelled; to be reviewed in next supervision mission in 6/99.
India	538	Accra Pack India Pvt. Ltd. aerosol conversion	INV	ONG	Aerosols	May/97	129,690	May/98	Jun/98	Delay in subgrant agreement signing. Subgrant agreement now signed and equipment installation in progress. Completion expected by June 1999.
India	548	Elimination of CFCs in the manufacture of commercial refrigeration equipment at Refrigerators and Home Appliances P. Ltd.	INV	ONG	Refrigeration : Commercial	May/97	147,300	Sep/97	Feb/98	Delay in providing financial information for appraisal and consultations/evaluaion of domestic equipment manufacturer has delayed start-up. However, SGA has now been signed. LCs being opened.
India	547	Elimination of CFCs in the manufacture of commercial refrigeration equipment at Hindustan Refrigeration Industries	INV	ONG	Refrigeration : Commercial	May/97	132,320			Appraisal completed and SGA being signed. Delay by company in providing financial information delayed start-up.
India	552	Conversion of refrigerator manufacture to cyclopentane foam blowing agent and to HCF-134a refrigerant at Videocon Appliances Ltd.	INV	ONG	Refrigeration : Domestic	May/97	1,835,115	Dec/98		Appraisal completed.

India	544	Elimination of CFCs in the manufacture of commercial refrigeration equipment at Refrigeration Components and Accessories	INV	ONG	Refrigeration : Commercial	May/97	125,370	Sep/97	Nov/97	Delay in providing financial information for appraisal has delayed start-up. However, SGA has now been signed. LCs being opened.
Indonesia	251	Reduction of CFC-12 emission during service of MAC units	TAS	ONG	MAC	Dec/94	327,000			There are two candidates to take over Nippondenso as the project caretaker namely: Dasa Windu Agung and Swisscontact. Work programs have been submitted to MoE for selection.
Indonesia	256	PT. Markindo Theco Conversion of metal cleaning processes from 1,1,1 TCA to aqueous cleaning	INV	ONG	Solvents	Nov/95	83,200	Apr/97	Jun/97	CANCELLED. Funds returned to 27th meeting.
Indonesia	492	Toha Kencana Mas	INV	ONG	PS/PE Foams : Rigid	Oct/96	109,930			The recipient is no longer in business. Project is cancelled. Funds returned to 28th meeting.
Indonesia	571	Conversion and aerosol filling center at PT Candi Swadaya Sentosa	INV	ONG	Aerosols	May/97	1,175,340			Subgrant Agreement not yet signed. Enterprise to to submit: i) valid and authentic ownership certificate and ii) renewal of working capital loan of enterprise. Enterprise feels insecure with current economic situation. Enterprise informed that it must begin implementation as of 6/99 or risk cancellation.

Jordan	494	Jordan Industrial Petrochemical	INV	ONG	Aerosols	Oct/96	102,855			With the ExCom's recent decision not to increase funding for this project, the entreprise is exploring other options in order to proceed within the funding level originally approved by the Fund. Update: The enterprise has been informed that they must either act and raise necessary counterpart funding or project will be cancelled.
Jordan	563	Conversion to CFC-free technology in the manufacture of flexible slabstock PUF (box foam) at Baybars	INV	ONG	Foams : Flexible	May/97	112,500	Mar/97	Nov/97	Sub-grant agreement signed in November 1998. Bids pending due to Government new regulation. If Government resolves problems in procurement, expects to complete project in 12/99.
Jordan	562	Conversion to CFC-free technology in the manufacture of extruded polysterene at Al Hussam	INV	ONG	PS/PE Foams : Rigid	May/97	347,855	Mar/97		Sub-grant agreement signed in November 1998. Invitation to bid was issued in 11/98. Pending due to new government regulation
Malaysia	380	Conversion of correction fluid manufacturing process from 1,1,1 TCA to non-ODS solvent at Mondial Sdn. Bhd.	INV	ONG	Solvents	Nov/95	144,447	Feb/98		Project delayed due to changes in management policy. Physical conversion is underway.
Malaysia	383	Penang Trading	INV	ONG	PU Foams : Rigid	May/96	71,500	Sep/97	Oct/97	Equipment supplier already chosen. Arrangements for issuance of LC and Direct Payment are underway.
Malaysia	382	Transfreeze	INV	ONG	PU Foams : Rigid	May/96	71,500	Sep/97		Further delays experienced in procurement, but now equipment supplier chosen. Arrangements for issuance of LC and Direct Payment are underway.

Pakistan	303	4 plants: Master Enterprises Ltd., Durafoam Ltd., Khyber Plastic and Polymer Industries Ltd., Procon: Phaseout of CFC-11 in the manufacture of flexible PUF molded and integral skin at Master Group	INV	ONG	Foams : Flexible	Jul/95	1,247,330	Nov/97	Apr/98	Some delay in subgrant agreement signing. Subgrant agreement signed 4/98. Purchase Order for equipment placed on December 11, 1998; LC opened on December 31, 1998; Shipment of equipment is awaited.
Pakistan	385	Razi Sons: Phaseout of CFC-11 in the manufacture of molded and rigid PUF	INV	ONG	Foams	Nov/95	493,262	Nov/97	Apr/98	Delay in Subgrant agreement signing. Subgrant Agreement signed 4/98. Purchase Order for equipment placed on September 8, 1998; LC opened on October 27, 1998; Shipment of equipment is awaited.
Pakistan	435	Domestic Appliances Limited - Conversion of domestic refrigerator manufacturer to non-ODS substances	INV	ONG	Refrigeration : Domestic	May/96	257,650			The project is currently on hold as the company is undergoing a change in management. Action on this project will be taken after March 31, 1999. Update: Enterprise has been given until end 6/99 to conclude partnership discussion with 3 interested parties.
Thailand	102	CFC recycling in MAC	TAS	ONG	MAC	Jun/92	900,000		Jul/98	Subgrant Agreement signed. Waiting for submission of implementation sched. and comments on TORs from ICF by end of Feb. 99. Additional delay is due to the Gov's request to change the project design. Instead of distributing all R&R machines in one shot, R&R machines will be distributed in several tranches.

Thailand	101	Technic Foam	INV	ONG	PU Foams : Rigid	Jun/93	174,000	Dec/98	Delays in finalizing the subgrant agreement as the enterprise's financial status was unsound. Only after the financial status of the enterprise improved in January 1999, the subgrant agreement was signed. Purchasing of equipment underway.
Uruguay	211	Indunor S.A. Conversion of a domestic refrigeration plant Replacement of the CFC-11 used as blowing agent with cyclopentane and the CFC-12 used as refrigerant with HFC-134a	INV	ONG	Refrigeration : Commercial	Dec/94	448,140		Delays in subgrant agreement signing related to company's negotiation of a possible acquisition continue. Update: The project has been cancelled because the company is being liquidated.
Zimbabwe	501	Ajax Refrigeration	INV	ONG	Refrigeration : Commercial	Oct/96	61,966		Company taken over by Commercial Refrigeration and now treated as 2nd production line at Commercial. Project combined with that of Commercial Refrigeration as approved. Future reporting will be combined under Commercial Refrigeration.

Zimbabwe	502 Commercial Refrigeration	INV	ONG	Refrigeration : Commercial	Oct/96	156,636	Mar/97	Some installation and conversion has taken place, but economic difficulties in Zimbabwe (including local currency devaluation) has delayed progress significantly. Barring further deterioration in Zimbabwe's economic situation, project is expected to be completed during CY99. (Purchased Ajax and will be phasing out all ODS from both companies.)
Zimbabwe	503 Ref-air Refrigeration	INV	ONG	Refrigeration : Commercial	Oct/96	43,382	Mar/97	This project was mistakenly listed as completed in the last progress report because on a partial completion. CFC-11 portion completed 6/96, but because of the economic difficulties in Zimbabwe (including significant local currency devaluation), not much progress was made during CY98. Barring further deterioration in Zimbabwe's economic situation, project is expected to be completed by end CY99
