EXECUTIVE COMMITTEE OF  
THE MULTILATERAL FUND FOR THE  
IMPLEMENTATION OF THE MONTREAL PROTOCOL  
Thirty-third Meeting  
Montreal, 28-30 March 2001

**BUSINESS PLAN FOR THE YEAR 2001 OF UNEP**

## COMMENTS AND RECOMMENDATIONS FROM THE FUND SECRETARIAT

### COMMENTS

1. This document presents a summary of planned 2001 activities of UNEP and highlights the changes made to UNEP's 2001 draft business plan considered at the 32<sup>nd</sup> Meeting, lists UNEP's business plan performance indicators, and provides recommendations for the consideration of the Sub-Committee on Monitoring, Evaluation, and Finance.

#### **Planned 2001 activities of UNEP**

2. UNEP is proposing a budget of US \$10,517,000 for its 2001 business plan. This budget includes US \$2.4 million for recurring clearinghouse and networking activities, US \$4.4 million for training activities, US \$513,000 for other technical assistance activities, US \$580,000 for methyl bromide activities, US \$120,000 for RMPs, and US \$30,000 for new country programme preparation. UNEP will also renew 30 institutional strengthening projects valued at US \$2.4 million, request funding for two new RMP activities, provide policy assistance through workshops and the preparation of policy documents.

3. With the approval of the full budget, UNEP would receive about US \$1.4 million in support costs.

#### **Changes from the Draft Business Plan**

4. After reviewing the draft business plan, the Executive Committee requested UNEP (Decision 32/11) to submit a final business plan to the 33<sup>rd</sup> Meeting taking into account the following requested modifications:

- (a) To ensure that, after taking into account the non-investment activities planned by the other implementing agencies, the addition of UNEP's planned activities for 2001 did not exceed the resource allocation for non-investment projects;
- (b) To remove the project "SME conversion manual" (US \$180,000) from the business plan and ensure that the proposed "Study on development of ODS phase-out strategy for SMEs" would review and provide information on the manner in which different countries have phased out ODS from SMEs in different sectors, noting the importance of avoiding any duplication of UNEP's existing project, "Training modules on management of ODS phase-out in SMEs";
- (c) To rationalise its proposed "Regional compliance workshops" and "Harmonised sub-regional ODS legislative and regulatory import mechanisms" in the light of the capacity to address these issues created through existing regional network and institutional strengthening projects;

- (d) To include the Economic Community of West African States (ECOWAS) in the list of interregional trade organisations it intends to use to carry out its sub-regional projects to improve monitoring and control of ODS consumption in the 2001 business plan;
- (e) To ensure that methyl bromide activities in countries that have not signed the Copenhagen Amendment are for non-investment projects only;
- (f) To extend the full services of the existing African regional networks to all Portuguese-speaking African countries;
- (g) To co-ordinate activities with the other implementing agencies in Yemen, taking into account that the refrigeration management plan should contain a full strategy for the refrigeration servicing sector, in order to avoid any overlaps.

5. As requested in Decision 32/11(a), the non-investment project allocation for the 2001 business plan was fully utilised, but not exceeded by UNEP together with the planned non-investment activities of other implementing agencies.

6. Pursuant to Decision 32/11(b), the SME conversion manual was removed, but the Study on the development of ODS phase-out strategy for SMEs was inadvertently included twice in the database at a value of US \$100,000 each time. UNEP indicated that it would seek only US \$100,000 for the activity.

7. UNEP addressed the rationalization of regional compliance workshops by indicating that it would meet with officials from up to six countries not expected to be in compliance following regional network meetings.

8. UNEP addressed the rationalisation through the networks or institutional strengthening in a different manner for the "Harmonised sub-regional ODS legislative and regulatory import mechanisms". It reduced the number of such activities from four activities to two.

9. Pursuant to Decision 32/43, a report will be presented to the 33<sup>rd</sup> Meeting that will examine the strategic framework for requests for funding of activities associated with national, sub-regional and regional customs training and harmonisation, as well as the implication of the commitment of the regional organisations concerned in establishing regulatory mechanisms. UNEP also indicated that subject to the outcome of the Executive Committee discussion required under Decision 32/43, it has proposed in its contingency list a new regional "umbrella" project that fosters cooperation among national customs and regulatory authorities in a specific region with the goal of adopting harmonised legislative and regulatory mechanisms for ODS imports.

10. Pursuant to Decision 32/11(d), UNEP included the Economic Community of West African States (ECOWAS) in the list of interregional trade organisations it intends to use to carry out its sub-regional projects to improve monitoring and control of ODS consumption.

11. Decision 32/11(f) requested UNEP to extend the full services of the existing African regional networks to all Portuguese-speaking African countries. UNEP indicated that “in line with Decision 32/11(f), Portuguese-speaking African countries would be invited to the existing African Regional Networks as has been done until now”.

#### Other changes from the draft business plan

12. UNEP did not add any activities to its portfolio since the draft business plan although the “Development of tracking systems for ODS and ODS based equipment” project was included in the Draft Business Plan, it was incorrectly listed in the tables under the “Approved 2000” column. It is now listed under “Request for 2001”. Similarly, “RMP formulation for Mauritania” was included in the Draft Business Plan under “CP formulation”. It is now under “RMP formulation”.

#### **Performance indicators**

13. A summary of UNEP’s performance indicators is provided below in Table 1. UNEP’s weighted performance indicators are the same as was presented in its draft business plan.

Table 1

#### **Non-Investment Performance Indicators**

<b>ITEMS</b>	<b>2001 Targets</b>
<b>Weighted Indicators</b>	
Number of Projects to be Completed	60% of total projects approved
Funds Disbursed (US\$)	73% of approved funding
Speed of delivery until first disbursement (months from approval)	6 months
Speed of delivery until project completion (months from approval)	17 months
<b>Non-weighted indicators</b>	
Appropriate and timely policies initiated by countries as a result of networking, training, information exchange, country programme development and/or institutional strengthening (number of countries)	10 countries
Reduction in ODS consumption over and above that effected by investment projects (ODP tonnes)	40

14. UNEP’s specific non-investment performance indicators are the same as presented in its draft business plan.

Table 2

**UNEP-Specific Non-Investment Performance Indicators**

<b>ITEMS</b>	<b>2001 Targets</b>
Number of newsletters	3 newsletters
Number of joint/regional activities which Network members are involved	2 per region
Improvement over previous years in data reporting and enacting the legislation and policies for ODS phase-out in Networking and institutional strengthening countries	80 per cent of all Network member countries
The extent of awareness-raising activities initiated by the countries as a result of UNEP's publications	UNEP stated that this indicator is qualitative but can be expressed in the number of brochures, awareness raising products produced by the countries
The extent to which experience achieved through UNEP's activities is used in the adoption and adjustment of ODS phase-out strategies by Network countries	UNEP stated that this indicator is qualitative
The extent to which the networks are used by the Agencies and the Secretariat in developing their work or explaining new policies	UNEP stated that this indicator is qualitative

**Policy issues**

15. As mentioned above, UNEP developed a contingency list of projects that could be submitted to replace other projects in UNEP's business plan that might not be approved due to some policy issue. UNEP's contingency list was valued at US \$708,000 (about 7 per cent of UNEP's total budget). UNEP agreed to remove its contingency list since the current practice does not allow contingency list for non-investment projects, but instead allocates recurring resources for UNEP's clearinghouse and networking functions. UNEP agreed to remove its contingency list from its business plan but requested that the issue should be raised for the Committee's consideration.

**RECOMMENDATIONS**

The Fund Secretariat recommends that the Monitoring, Evaluation, and Finance Sub-Committee consider:

1. Recommending to the Executive Committee to endorse the 2001 business plan of UNEP, while noting that endorsement did not denote approval of the projects identified therein nor their funding levels.
2. Recommending to the Executive Committee to approve the performance indicators for UNEP set out in Tables 1 and 2 of the Fund Secretariat's comments.

<b>TABLE 1: BUSINESS PLAN TABLE .....</b>	<b>25</b>

### Introduction

### *Priorities*

UNEP's 2001 Business Plan reflects the following priorities:

- Countries that have not yet met the CFC freeze urgently require focused non-investment support to enable them to achieve compliance.
- Countries that have already achieved the freeze need assistance to ensure that the successes already achieved are sustained and their phase-out momentum is maintained.
- Nearly all Article 5 countries require activities to help them prepare for compliance with the control measures in 2002 for halons and methyl bromide, and 2005 for CFCs and CTC.

Section C (page 8 to 12) of this document provides details UNEP's strategy to address these priorities.

### *Mechanisms*

This Business Plan had been developed in light of the discussions at the 32<sup>nd</sup> Executive Committee meeting and Decision 32/11.

The non-investment services that UNEP proposes to undertake to meet these priorities will be closely related to design, development and enforcement of policies, legislation and regulations. Regionalized public awareness, education and information exchange programmes and the training of the stakeholders will serve as essential support mechanisms to implement the prioritized programme. Through such "people's empowerment campaigns" UNEP proposes to help sustain compliance and maintain the momentum of the phase out.

### *Approach*

Regionalisation is the first step towards building country ownership of the phase-out process. Eight regional and sub-regional Networks of more than 100 National Ozone Units (NOUs) will be the principal mechanisms through which UNEP delivers assistance to Article 5 countries. Completion of Country Programmes (CPs) in 75 countries, continuation of the Institutional Strengthening (IS) projects in 70 countries, initiation of Refrigerant Management Plans (RMPs) in 45 countries, operation of an information clearinghouse on a global basis, and training programmes in almost every Article 5 country have provided UNEP's OzonAction Programme under the Multilateral Fund an opportunity to continue to strengthen the capacity of NOUs and, through them, the governments in Article 5 countries to plan and strategize their national commitments under the Montreal Protocol. Through the NOUs and using various communication media, including Internet and e-mail, UNEP outreaches these services to other key national target groups, such as industry, industry associations, and the general public. With such enabling services and encouragement and guidance provided by UNEP, the NOUs and principal stakeholders are empowered to make technological choices and to undertake the policy actions required to phase out ODS in an expeditious and sustainable manner.

UNEP designs and implements its “enabling” services based on the needs of Article 5 countries and through a Logical Framework Approach (LFA)<sup>1</sup> and Result Management Module (RMM). These services complement and support the investment and technical assistance projects of the other Implementing and Bilateral Agencies<sup>2</sup>. Complimentarity, synergy and cooperation with the activities of these agencies continue to be the key criteria for UNEP in developing its Business Plan and implementing the projects contained therein.<sup>3</sup>

UNEP’s services for Article 5 countries are organized as follows:

- Clearinghouse activities and Regional Networks of NOUs.
- Country-specific and regional support activities.

## **I. Multilateral Fund Targets**

### **A. Context of Strategic Planning and the draft three year Business Plan (2000-2002)**

Unlike previously, the Multilateral Fund has emphasized long-term strategic planning term rather than a 3-year business planning cycle.

Developing countries are at a critical stage in their implementation of the Montreal Protocol. The need to shift the focus from individual projects to integrated sectoral and terminal concepts will be key to ensuring overall compliance. This will be the underpinning theme of the proposed strategic planning<sup>4</sup>. *Compliance is achieved when a Party demonstrates through its reported data that it fully meets a specific legal obligation under the Protocol according to the agreed timetable.*

In line with the emerging outcomes of the on-going strategic planning exercise in the Executive Committee, a country-driven needs analysis was conducted in August-September 2000 by all Implementing Agencies, in co-operation with Multilateral Fund Secretariat and the Regional Network Coordinators (RNCs)<sup>5</sup>. Though the exercise was done in limited time, it has been most

---

<sup>1</sup> For example, see “Regional Networks” in *UNEP’s 2001 Work Programme*.

<sup>2</sup> This also includes complimentarity with ozone-related Global Environment Facility (GEF) activities, Finnish Trust Fund, Swedish Trust Fund and support from the Governments of the Netherlands and Italy which are over and above the contributions to the Multilateral Fund.

<sup>3</sup> Sources consulted or invited to submit need-based activities for inclusion in this Business Plan include, *inter alia* ! discussions at the 32<sup>nd</sup> Executive Committee meeting and Decision 32/11 ! *Comments on Potential Activities for Inclusion in the 2001/2002 Business Plans* (Multilateral Fund Secretariat, as per ExCom Decision 30/57) ! feedback from NOUs collected through the Regional Network Coordinators ! inputs from Implementing and Bilateral agencies ! the latest TEAP and TOC assessment reports ! Decisions of the Meetings of the Parties and the Implementation Committee ! reports of the following meetings held in 2000: Regional Networks of ODS Officers, national and regional training workshops, UNEP’s Informal Advisory Group, Executive Committee.

<sup>4</sup> *Report of the 30<sup>th</sup> Meeting of the Executive Committee* (UNEP/OzL.Pro/ExCom/30/41), paragraph 87.

<sup>5</sup> In accordance with the Decision 30/57 and 31/46

valuable in assisting UNEP to produce its 2001 Business Plan based strongly on the priority compliance needs of Article 5 countries.

Non-investment projects have now attained a prime role in ensuring that Article 5 countries achieve compliance, specifically because:

- *For large countries:* The cost-effective implementation of approved investment projects can be expedited, and compliance can be facilitated and sustained, by the application of integrated policy frameworks that embrace both investment and non-investment projects.<sup>6</sup>
- *For small countries:* The majority of the countries have no (or an insignificant number of) investment projects. Hence, the path to compliance and total ODS phase out for these countries will be through non-investment initiatives.

The importance of non-investment activities, in particular policy assistance and development, was highlighted by the Multilateral Fund Secretariat in its paper *Strategic Planning and the draft three-year business plan for the Multilateral Fund*<sup>7</sup>. UNEP will assist the Fund Secretariat and the Executive Committee, if requested, to “correlate the impact of approved non-investment projects on the status of compliance of Article 5 countries” as mentioned in Decision 32/76.

## **B. Context of Resource Allocation (2000-2002)**

The Parties have agreed on an allocation of US\$ 475.7 million for the replenishment of the Multilateral Fund for 2000-2002<sup>9</sup>. For business planning purposes, the total allocation for the draft 2001 Business Plans is US\$ 170 million. Of this amount, US\$ 15.1 million has been allocated for non-investment projects for 2001 (this includes US\$ 4.6 million earmarked for the IS projects undertaken by all Implementing Agencies)<sup>10</sup>.

As per Executive Committee Decision 32/11(a), UNEP’s 2001 Business Plan includes activities to the total value of US\$ 10,517,000<sup>11</sup> of which US\$ 2,429,000 is required by UNEP for Institutional Strengthening projects. In addition, projects to the value of US\$ 708,000 have been mentioned in a ‘contingency list’ and may be put forward for the consideration of the Executive Committee later in the year in case there are opportunities to fund such activities requested by the countries.

### *UNEP's Performance: Completion and Disbursement*

<sup>6</sup> TEAP “Supplementary Report”, pg. 35, and TEAP “Corrigendum to the Supplementary Report” (September 1999), pg. 1 and the Multilateral Fund Secretariat in ExCom/31/Inf5.

<sup>7</sup> UNEP/OzL.Pro/ExCom/32/38

<sup>8</sup> Ibid., pg. 35

<sup>9</sup> Decision XI/7

<sup>10</sup> 28 July 2000 fax from the Multilateral Fund Secretariat to Implementing Agencies.

<sup>11</sup> UNEP has consulted UNDP, UNIDO and the World Bank and they have confirmed the amounts they are requesting for non-investment projects in their final 2001 Business Plans. They have indicated a combined request of US\$ 3,114,934.

UNEP has completed fifty-eight percent (58%) of all activities approved between 1991-1999, with a disbursement ratio<sup>12</sup> of sixty-eight percent (68%)<sup>13</sup>.

## 1. Clearinghouse activities and Regional Networks

Following Executive Committee Decision 21/14, UNEP's Work Programme activities are divided into two categories:

- "Recurring" activities include information exchange<sup>14</sup> and Networking of ODS Officers. These are "capped" each year at a specific funding level, plus up to 5% to allow for inflation.<sup>15</sup> On an annual basis, UNEP re-prioritizes its activities within this budget based on feedback it receives through the Regional Networks, the Executive Committee, its Informal Advisory Group (IAG) and other sources (see footnote 3).
- "Non-recurring" activities are projects submitted for the consideration of the Executive Committee on the basis of country specific need-based proposals.

In line with the agreed "cap", the proposed level of funding remains unchanged, with an increase of 2.5% for inflation. Within this total, the re-prioritisation in 2001 will make more funding available directly to the regions, through Regional Networks, for region-specific and country-specific awareness raising and support activities.

The Business Plan includes amounting to US\$ 2,662,000 for re-prioritized recurring clearinghouse and Networking activities (plus travel, advisory group meetings, outreach and support to national activities). Details on the individual project proposals appear in *Section II, Planned Business Activities*.

## 2. Country-specific and regional support activities

In 2001 UNEP will:

- Implement the training components of RMPs, and assist countries in their review of RMPs as per Executive Committee Decision 31/48.
- Assist Article 5 countries that are facing difficulties in the establishment of the policy and regulatory frameworks needed to fulfill their commitments under the Montreal Protocol.

<sup>12</sup> "Disbursement ratio" is the total of funds disbursed as a percentage of funds approved. This is calculated for all approved activities, both completed and ongoing. More recent figures will be available in UNEP's 2000 Progress Report.

<sup>13</sup> *UNEP Progress and Financial Report* (1 January-31 December 1999), UNEP/OzL.Pro/ExCom/31/11), pg. 2.

<sup>14</sup> Collection of sectoral data from worldwide sources; updated OAIC Database; dissemination of information materials; direct query response service; maintenance of contact database of experts and mailing list of OzonAction programme publications; halon bank management clearinghouse services; publication of the OzonAction newsletter and special supplements.

<sup>15</sup> The specific items most susceptible to inflation are staff costs and travel.

- Address specific training needs identified by Article 5 countries through sub-regional consultative workshops and other training services, as explained in the *Special Initiatives* section.

UNEP's 2001 Business Plan includes projects in the above categories that amount to US\$ 7,855,000. Details on the individual project proposals appear in *Section II, Planned Business Activities*.<sup>16</sup>

### 3. Summary

The total cost of the activities in UNEP's 2001 Business Plan is US\$ 10,517,000 as itemized in the table below. For reference purposes, the levels of funding provided to UNEP in 2000 are also provided for comparison.

Activity		Business Plan Costs (US\$ 1000)	
		2000	2001 (proposed)
<b>Recurring activities</b>			
Recurring Clearinghouse and Network activities		2,370	2,427 <sup>18</sup>
Travel, meetings, outreach		235	235
<b>Subtotal</b>		2,605	2,662
<b>Non-recurring activities</b>			
Information exchange		620	278 <sup>19</sup>
Training		1,814	4,418 <sup>20</sup>
Methyl bromide		750	580
<b>Subtotal</b>		3,184	5,276
Country Programmes		230	30 <sup>21</sup>
Institutional Strengthening	New	470	796
	Renewal	1,497	1633 <sup>22</sup>
Refrigerant Management Plans		210	120
Halon Management Plans		175	0

<sup>16</sup> In the event that the Contingency list is favorably considered, UNEP will continue to provide assistance for the development and implementation of strategies for the management of halons at the national and regional levels, consistent with the Parties' Decision X/7. A special focus in 2001 will be on data reporting for halons, to verify that the means of data collection result in accurate and verifiable information.

<sup>17</sup> A list of contingency projects is attached (Table 2) in the event that there is scope for more non-investment projects in the 2001 Business Planning.

<sup>18</sup> The recurring costs are 2.5% more than last year to meet the inflationary cost over the last two years in personnel, travel and materials.

<sup>19</sup> This includes the first tranche (US\$ 200,000) of a multi-year project (2001-2005) on "Global public awareness and education campaign to sustain the phase out".

<sup>20</sup> This includes the first tranche (US\$ 300,000) of a multi-year project (2001-2004) for China on "Policy training for local authorities".

<sup>21</sup> Additional costs for CPs for countries that become Parties in 2001 will be provided to the Executive Committee in 2001.

<sup>22</sup> Provision for up to 29 countries, based on estimated completion dates of their initial IS projects.

Activity	Business Plan Costs (US\$ 1000)	
	2000	2001 (proposed)
Total Phase Out Management Plans	25	0
<b>Subtotal</b>	2,607	2,579
<b>Total</b>	5,791	10,517

## C. Special Initiatives and New Focus

### 1. Regionalization

During 2001, UNEP will take steps to regionalise more of the programme, including delivering more activities through the regional networks. This will include regional public awareness activities, funded through a re-prioritisation of the core clearing house activities i.e.

- facilitating region specific awareness tools by engaging the countries in its concept & development;
- utilizing the existing Regional Ministerial Forums to discuss the implementation issues and to mainstream the National Ozone Unit in national policy;
- Explore opportunities to involve ExCom members & UNEP Regional Directors in the Regional Ministerial Meetings.

UNEP will also undertake a feasibility study of delivering training and IS assistance through its Regional Offices and local training centres.

### 2. Re-prioritization

In the context of the Strategic Planning exercise, and consistent with and continuing its work in regional capacity building, UNEP proposes through the activities identified in this Business Plan to make resources available to the regions for country-driven awareness raising activities and provision of mutual assistance between Article 5 countries ("South-South support").

In line with the current emphasis on country-driven need assessments, the specific activities to be undertaken will be identified as priorities at the regional level and agreed through the Regional Networks. Countries will be informed of the funds available early in 2001 through the Regional Networks and will be requested to identify the activities they wish to undertake and how they wish to implement them. Funds will be sub-allocated to the regions and countries in line with the decisions taken by each of the Networks. Regions will be requested to prepare reports on their use of the funds and the results achieved and UNEP will compile these reports for submission to the Executive Committee in 2002.

The implications of this re-prioritisation include the following:

- Information dissemination costs will be reduced in response to the increased dissemination of materials through the Regional Network meetings, as well as the use of e-forums and other Internet tools.
- The OzonAction newsletter will be produced on a trimester basis, and no special supplements will be produced in 2001.
- UNEP will continue to provide support for halon banking through recurring clearinghouse activities including Networking, web site, sourcing sectoral data.
- The role of Internet will be emphasised for information exchange and data sourcing activities and to support Networking activities
- National support activities will now be administered through the Regional Networks and based on priorities agreed by the participating NOUs .

### **3. Assistance for countries experiencing compliance problems**

Through the Multilateral Fund Secretariat's status of compliance document developed in the context of the strategic planning exercise, the Regional Networks and UNEP's *Trends Analysis*, UNEP will identify the countries facing difficulties with meeting specific compliance targets and provide special assistance to devise appropriate action plans and mobilize any additional assistance required to meet those challenges.

In addition to in-depth consultations with policy experts and/or RNCs and subject to funds being available from the regular Networking budget, UNEP will organize a series of small regional workshops for up to 6 countries in each region that are not (or expected not to be) in compliance. UNEP would work intensively with them for 2 days to define a "compliance action plan". This plan would be presented to the next meeting of the Executive Committee for priority attention and funding consideration. The workshops will be held back-to-back with meetings of the Regional Networks and would involve NOUs and also senior government officials. Specific Regional Ministerial Forums will be used to raise high level awareness.

### **4. Sub-regional projects to improve monitoring and control of ODS consumption**

Subject to the outcome of the Executive Committee discussion required under Decision 32/43, UNEP has proposed in its contingency list a new regional "umbrella" project that fosters cooperation among national customs and regulatory authorities in a specific region with the goal of adopting harmonized legislative and regulatory mechanisms for ODS imports.

By using existing infrastructure, these projects will enhance compliance with the control measures contained in the Montreal Protocol by building upon existing inter-regional trade ties within associations such as the Andean Pact and MERCOSUR (Latin America), CARICOM and OECS (the Caribbean), ASEAN (South East Asia), ECOWAS (West Africa) and COMESA and SADC (English-speaking Africa). The activities under this initiative will benefit the countries in Latin America, the Caribbean, South East Asia and English-speaking Africa in developing, adopting and implementing harmonized sub-regional ODS legislative/regulatory import

mechanisms, as well as customs training curricula. They will be conducted by UNEP in cooperation with the sub-regional economic and trade associations active in the regions.

Building upon existing inter-regional economic and trade ties, the projects will encourage the development and adoption of coordinated sub-regional codes of practice for ODS monitoring and control activities, as well as harmonized on-going and future customs training programmes. When combined with continued national customs training, this will enhance national compliance measures implemented or underway in participating countries, as well as support the efforts of the sub-regional associations to implement standardized control policies across the board. Additionally, the project will help implement the Decision taken by the Parties under Article 4 of the Montreal Amendment to the Montreal Protocol that states that each Party should establish and implement an import/export licensing system for new, used, recycled and reclaimed controlled substances in Annexes A, B, C and E.

Issues of common interest to be explored include, *inter alia*:

- Confirming the status of legislative/regulatory regimes in the member states;
- Identifying procedures to initiate and adopt appropriate harmonized legislative/regulatory ODS regimes;
- Instituting a coordinated system for monitoring and control of ODS imports/exports; and,
- Managing national consumption requirements within a sub-regional market context.

## **5. Methyl bromide**

The methyl bromide freeze will come into effect for Article 5 countries in 2002. This brings a greater sense of urgency in ensuring that UNEP's activities in the methyl bromide sector are designed specifically to assist countries to comply with this control measure.

The methyl bromide sector will thus continue to require concentrated non-investment activities for 2001. New and strategic actions are required to respond to the urgent needs expressed by most developing countries to meet the 2002 freeze and subsequent reductions. These activities are especially important in those countries that require urgent assistance to prevent future growth in methyl bromide consumption, especially where a country has not yet ratified the Copenhagen Amendment.

Based on these needs, the focus in 2001 will be on:

- Disseminating the results of demonstration projects in strategic cooperation with other implementing agencies (i.e. UNIDO) and bilateral agencies (i.e. GTZ) that are closely involved in implementing such projects, with a view to faster development of phase-out projects and strategies;
- Conducting awareness-raising activities to educate farmers and other methyl bromide users about methyl bromide alternatives using local institutes and non-governmental organizations (NGOs) in their countries.

- Assisting countries in fully complying with the data reporting requirements for methyl bromide consumption, including QPS.
- Promoting the adoption of national action plans and training strategies to meet the compliance targets.

Existing partnerships with FAO and network of local agricultural institutes and environmental non-governmental organizations that are currently working with UNEP in its methyl bromide communication programmes will be strengthened.

In 2001, assistance will be provided to Article 5 countries to develop and implement strong policy measures to prevent growth in methyl bromide consumption for new uses and encourage the adoption of alternatives. The focus of such assistance will be more on how national action plans prepared by the countries can ensure compliance with the methyl bromide freeze (i.e. follow up to the workshops in Senegal and Chile held in 2000).

Active assistance and encouragement will continue to be given to Article 5 countries to ratify the Copenhagen Amendment, and target such information more to Ministries of Agriculture, Pesticide Control Authorities and other relevant government agencies that regulate methyl bromide use in Article 5 countries. Methyl bromide will be one of the main focuses of the Regional Network meetings to further assist countries with addressing this issue.

In line with Decision 32/11(e), UNEP has proposed only non-investment in the methyl bromide sector.

Details of specific projects following the above approach to be submitted for consideration by the Executive Committee will be included in UNEP's 2001 Work Programme.

## **6. Pacific Island Countries (PICs)**

The small island countries of the Pacific region are not yet fully in the mainstream of the Montreal Protocol for several reasons, including their relatively late ratification of the Protocol and the priority of other environmental issues (e.g. climate change). Consequently, UNEP will intensify its assistance to these countries and conduct a regional implementation of the Montreal Protocol in the PICs in close association with South Pacific Regional Environment Programme (SPREP), which is assisting these countries in implementing other multilateral environmental agreements. UNEP is cooperating with the Government of New Zealand to expedite the formulation of a regional strategy and action plan. Under this innovative approach, UNEP will deviate from the “business as usual” sequential formulation of CP, IS and project activities and propose a TPMP for the region. At present, the approach will continue without seeking extra funds unless additional non-Party countries ratify the Protocol.

## **7. Global ratification and compliance (“Project 2002”)**

In cooperation with its Regional Offices and the Ozone Secretariat, UNEP will reach out to the remaining 18 non-Parties to expedite their ratification of the Montreal Protocol by 16 September 2002 (i.e. the International Day for the Protection of the Ozone Layer) at the latest. The implementation activities will then be undertaken without resorting to the usual project-by-project sequence, and instead total ODS phase out will be sought in one project package. At present, UNEP is not requesting any additional funding to carry out these activities.

## **8. Global public awareness and education campaign to sustain the phase out**

Resources of over US\$ 1 billion to date have been obligated under the Multilateral Fund for ensuring that the Montreal Protocol objectives are met by Article 5 countries. However, there are a number of new risks that could put this substantial investment at risk in the next few years:

- “Back sliding” to ODS use due to various factors, including ODS dumping, the prices of ODS relative to alternatives, etc.
- Potential of enterprises to establish manufacturing facilities that use ODS in order to realize short-term gains.
- Prolonged and unexpected increase in the use of transitional substances.

Until now, national and global public awareness activities have delivered general messages about the science and health effects of ozone depletion, and the promotion of alternative technologies and products, but they have not specifically addressed the "risk" issues. To minimise these risks and ensure compliance through 2005, the Parties would benefit from the availability of refined and targeted public awareness messages about these issues. Accordingly, UNEP proposes to develop and deliver *on a regional basis* a long term and sustained public awareness and education campaign with the help of internationally renowned communication specialists and the countries in the regions. The experiences of the World Health Organization in its global campaign to eradicate diseases and UNICEF in its campaign against poverty issues with children will be used to design and implement these campaigns.

## **II. Planned Business Activities**

### **A. Clearinghouse activities and Regional Networks of ODS Officers**

During 2001, recurring clearinghouse and Regional Network services will be provided as follows:

#### **1. “Recurring clearinghouse” activities**

The following activities (including both continued and newly prioritized activities) will be undertaken *within the approved project funding*:

Need	Expressed by	Response to need
Encourage ratification	Parties IX/1, IX/2, XI/11	Through "Project 2002", promote ratification of the Protocol and amendments (including Copenhagen) by all Article 5 countries, through awareness raising at Ministerial and regional meetings, etc.
Promote compliance	11 <sup>th</sup> MOP; Implementation Committee	Assist with data reporting to establish and verify the freeze baselines and current consumption in Network countries, and communicate the results to the international ozone protection community. Identify problems in countries related to compliance with the 2002 halon and methyl bromide freezes, and assist those countries to identify solutions.
Encourage South-South cooperation on ODS phase out	Reprioritization by UNEP	Support the "hands-on" exchange of experience and information between experienced and less-experienced NOUs in a region, based on priorities identified through the Networks.
Examples of technical and policy case studies	IAG	As part of the sourcing of sector data, technical and policy case studies related to meeting the CFC reduction target and the 2002 freeze target for halons and methyl bromide will be collected and disseminated.
Promote awareness and action among high-level officials	Regional Networks, IAG	Use regular Network meetings to publicize and promote ozone layer protection to senior government officials and parliamentarians.
Address new ODS	Parties X/8, XI/19	Collect and disseminate to NOUs information related to new substances with ozone depleting potential, including any available alternatives.
Support policy development and enforcement	IAG, Parties IX/8	Support the development of domestic policies in Article 5 countries and their enforcement, to help the countries meet their obligations under the Protocol. This will be done through the Regional Networks of ODS Officers and the Policy Mentor Programme.
Increase awareness at the regional level based on region-specific needs	Reprioritization by UNEP	Provide assistance to countries in a region to undertake awareness-raising activities identified as priorities through the Networks.
Promote policy mentoring	IAG, Regional networks	Implement the "Policy Mentor Programme" to promote direct consultation on policy setting and enforcement between NOUs and their peers in developed and developing countries.

Need	Expressed by	Response to need
Improving the effectiveness of the OzonAction newsletter	Newsletter Review Board, Readers, UNEP	As a result of the Programme's re-prioritization of its recurring costs, there will be no special supplements to the OzonAction newsletter although it will continue to be published at least at trimestrial frequency. Because of this, every effort will be made to ensure that the content of the newsletter remains relevant and responsive to the needs of the Article 5 countries to help them meet their commitments under the Protocol.
Promote environmentally-sustainable solutions	Regional Networks, Parties' Decision on Ozone Layer & Climate Protection interface	Promote environmental options that maximize multiple environmental benefits (e.g. Ozone Layer Protection & Climate mitigation) by including components on such topics in information, training and Networking services to be undertaken in 2001.
Improve communication	Need expressed in Network meetings	Further improve the delivery of existing electronic ozone protection publications to NOUs via the Internet, expand the use of electronic media to promote improved communication between UNEP and NOUs and among NOUs, and disseminate existing information more widely, quickly and in a more cost-effective manner.

## 2. "Non-recurring" activities

UNEP proposes to undertake the following activities in 2001, which will be submitted as *individual projects* to the Executive Committee for consideration and funding approval:

Need	Expressed by	Response to need
Sustain the phase out and maintain momentum to ensure compliance up to 2005	IAG, Regional Networks	Develop intensive global public awareness-raising and education campaigns with the help of communication experts and countries in the region.
Inconsistent and/or unreliable data on methyl bromide consumption, and difficulties in distinguishing between QPS and non-QPS	Revised Executive Committee Strategy and Guidelines for projects in the methyl bromide sector	Creation of a data reporting booklet for methyl bromide

Need	Expressed by	Response to need
Disseminate the results of demonstration projects to promote the adoption of methyl bromide alternatives and encourage ratification of the Copenhagen Amendment	Methyl bromide workshops, Regional Networks	In cooperation with UNIDO and other agencies, conduct workshops and other dissemination activities to communicate widely the results of the demonstration projects. This activity will target countries that have not ratified the Copenhagen Amendment and/or are experiencing difficulties in meeting the freeze.
Encourage China to ratify the Copenhagen Amendment	China NOU	Conduct a workshop showing effective methyl bromide alternatives for China
Increased awareness among methyl bromide users, trainers and agricultural organizations about the phase out and availability of alternatives	Regional Networks	Conduct a series of national communication programmes on methyl bromide using the expertise of agricultural organizations and NGOs.
Technical information on methyl bromide alternatives in the horticultural sector	Methyl bromide workshops	Produce a manual describing alternatives in this sector and how they can be adopted.

### 3. Regional Networks of ODS Officers

#### Primary focus:

During 2001, the primary focus of the regional networks will be to work with the Ozone Officers in NOUs to promote compliance. The priorities in this regard include:

- Convening regional and sub-regional meetings with ministers and senior officials from network countries to raise awareness of high level, review implementation problems, review reported data, trends in production and consumption and compliance status, in order to agree action plans to achieve and sustain compliance and to ratify the amendments.
- Assisting Ozone Officers to understand and play a full role in the country-driven strategic planning activities of the Executive Committee.
- Reviewing with the countries methods and results of data collection, verification and reporting and assisting countries to ensure the availability of accurate and consistent data as a basis for assessing compliance.

- Assisting countries to review ongoing RMPs under the terms of Decision 31/48 to update RMPs, produce an evaluation and status report, consumption forecasts and to identify future requirements for assistance in the refrigeration sector to achieve and sustain compliance.
- Providing and facilitating exchange of information within and between networks on illegal trade and monitoring and enforcement issues.
- Promoting greater contact and co-operation between Ozone Officers and RNCs between network meetings by promoting the use of existing and new e-mail fora.

#### Assistance in Strategic Planning and Business Planning:

The country-driven long-term Business Planning exercise will be assisted through the Network mechanism. In association with the Implementing Agencies and Multilateral Fund Secretariat, the Networks are expected to play a key role in achieving an interactive and participatory planning.

Networks are the primary means by which the national Ozone Officers are provided with the information, advice, support and knowledge they require to work effectively. Building the capacity of Ozone Officers through the networks and facilitating their access to national decisions makers is one of the most effective means available to the Executive Committee to enable compliance.

#### Portuguese-Speaking African Countries

In line with Decision 32/11(f), Portuguese-speaking African countries will be invited to the existing African Regional Networks as has been done until now.

### **B. Country-specific and regional support activities**

#### **1. CPs, RMPs, TPMPs and IS projects**

UNEP proposes to undertake the following projects in 2001:

	Activity	Number of projects	Countries covered
Country Programmes <sup>23</sup>	New CPs (Parties)	No new projects	N/A
	New CPs (non-Parties) <sup>24</sup>	3-14	Annex A.7
	Monitor on-going CPs	13	Annex A.1
Institutional Strengthening	Monitor on-going projects	69	Annex A.3
	Renewals	44	Annex A.4

<sup>23</sup> Per ExCom Decision 22/24, RMPs will be included in all new CP formulation projects.

<sup>24</sup> Subject to their ratification of the Montreal Protocol.

Activity		Number of projects	Countries covered
Refrigerant Management Plans	New	2	DPR Korea, Mauritania
	Continue developing RMPs <sup>25</sup>	17	Annex A.5
	Monitor on-going RMPs <sup>26</sup> and implement associated training components	50	Annex A.6

Requests that may arise during 2001 for assistance in updating CPs and RMPs are not taken into account in the above costs. Such project proposals would be presented to the Executive Committee during 2001 for consideration above and beyond UNEP's approved 2001 Work Programme.

UNEP will review ongoing IS projects to streamline activities undertaken in various sectors, compile the results and improve our guidance and assistance to countries (especially related to the upcoming freeze and reduction targets). Additionally, UNEP will seek to ensure that IS projects respect the terms and reflect the intentions of Executive Committee Decision 30/7.

In addition to the above project activities, UNEP will undertake the following activities *within existing resources*:

Need	Expressed by	Response to need
Implement RMP decision	ExCom 31/48	Review RMPs with the countries and provide advice and information on future possible actions.
Improve the reliability of data reporting	Parties IX/28, XI/23	Within CP and IS projects, continue to support timely and reliable data reporting by Article 5 countries, encourage data verification, and help those countries that produce poor or late data to improve.
Promote compliance	Parties IX/8	Support the development of ODS import /export licensing and monitoring systems as per the Montreal Amendment and efforts to reduce illegal trade.

## 2. Training

UNEP will undertake the following training activities in 2001:

<sup>25</sup> Project preparation previously approved by the Executive Committee.

<sup>26</sup> RMP documents already approved by the Executive Committee.

Need	Expressed by	Response to need
Train local authorities in China on Montreal Protocol policy	Policy training strategy for China, NOU request	Follow up to the policy training strategy approved by the Chinese Government, in which training activities for the years 2001 to 2004 are proposed for local authorities (including customs, auditors, industrial and commercial agency, economic and trade department to assist China in complying with the Protocol. In this Business Plan, the first tranche (US\$ 300,000) is being requested, out of a total project cost of US\$ 1.350 million.
Assist India with compliance in the solvent sector	India NOU	Develop an integrated training and non-investment strategy to support India's commitment to phase out ODS solvents for the 2005 target. The project will complement the investment projects being implemented by other Implementing Agencies in this sector.
Tracking imports of ODS and ODS-based products	Bahrain NOU	In cooperation with the World Customs Organization, support identification and tracking of such imports in regions by developing software and providing assistance to help countries implement quota systems.
Sub-regional harmonization	NOUs (multiple countries)	Training projects as described in <i>Special Initiatives and New Focus</i> section 4.
RMP Implementation	NOUs (multiple countries)	Includes (as per country need) one or more of the following training activities: policy/ legislation assistance or workshop, refrigeration training in different sub-sectors, customs training.
Train customs officers	Philippines NOU	Customs training

### III. Performance Indicators

UNEP adopted the following agreed performance indicators and will continue to use them during 2001:<sup>27</sup>

#### A. Weighted Performance Indicators

Performance indicator ( <i>weight</i> )	Target set by UNEP
The number of non-investment projects completed, expressed in percentage of total approved projects ( <i>50 percent</i> )	60 percent of total approved projects

<sup>27</sup> Executive Committee Decision 26/5

Performance indicator ( <i>weight</i> )	Target set by UNEP
Disbursement, expressed in US\$ million (30 percent)	73 percent of approved funding
Speed of first disbursement, expressed in number of months (10 percent)	6 months after approval of project
The speed of project completion, expressed in number of months (10 percent)	17 months <sup>28</sup>

### **B. Non-Weighted Performance Indicators**

Performance indicator	Target set by UNEP
Reduction in ODS consumption over and above that effected by investment projects	40 MT ODS
Appropriate and timely policies initiated by countries either as a result of networking, training, information exchange, country programme development and /or institutional strengthening	10 countries to adopt policies during 2001

### **C. Other Performance Indicators**

UNEP will also continue to use the following performance indicators in view of its unique mandate for non-investment projects.

Performance indicators	Target set by UNEP
Number of newsletters	Three
Number of joint/regional activities in which Network members are involved	2 per region
Improvement over previous years in data reporting and enacting the legislation and policies for ODS phase-out in Networking and IS countries	80 percent of all Network member countries
The extent of awareness-raising activities initiated by the countries as a result of UNEP's publications	Qualitative, but can be expressed in the number of brochures, awareness raising products produced by countries
Extent to which experience achieved through UNEP's activities is used in the adoption and adjustment of ODS phase-out strategies by Network Countries	Qualitative
The extent to which the networks are used by the Implementing Agencies and the Ozone Secretariats in developing their work or explaining new policies.	Qualitative

<sup>28</sup> CPs - 15 months to complete the CP from the date of approval; RMPs - 12 months to complete after approval; Training Activities - 24 months after approval; Other non-investment projects – 12 months after approval of projects.

#### **IV. Complimentarity with Implementing and Bilateral Agencies**

In 2001 UNEP is continuing on-going collaboration with UNDP on RMP-related training, with UNIDO on methyl bromide and with the World Bank on chiller sector training and project management assistance. UNEP's collaboration with bilateral agencies has been planned in 2001 as follows:

- With Japan: on projects in Asia and South East Asia.
- With France: on a workshop on technology transfer
- With Canada: on RMP-related training.
- With Germany: on African countries and in India servicing sector.
- With Sweden: on projects in South East Asia and the Pacific.

#### **V. Policy Issues**

In order to respond to the needs of Article 5 countries more effectively, UNEP suggests that the Executive Committee may wish to address the following policy issues in 2001:

- Increasingly, countries are requesting UNEP to provide training related to the safe and effective use of HFC alternatives in refrigeration<sup>29</sup>. Delay in such assistance may have an adverse impact on the phase out of CFCs and subsequent compliance.
- The Strategic Planning and Business Planning exercise for the 2001 Business Plan was done by directly involving NOUs. However, the time allowed for feedback and interaction was limited. A more participatory approach is needed to further improve this country-driven exercise. UNEP, in cooperation with the Multilateral Fund Secretariat and the other Implementing Agencies, could develop guidelines in which Regional Networks and NOUs could be most effectively used to this end.

#### **VI. Administrative and Financial Matters**

There are no administrative or financial matters.

---

<sup>29</sup> UNEP has not included hydrocarbons in this policy issue on the basis of confirmation from the Multilateral Fund Secretariat that there exists Executive Committee precedents for funding hydrocarbon safety-related training.

## Annex A

All data in this annex are as of 31 January 2001.

### 1. On-going CP formulation projects

Year	Number of projects		Multilateral Fund	GEF <sup>30</sup>
	MF	GEF		
1995	3		Kiribati, Solomon Islands, Vanuatu	
1997	2	1	Marshall Islands, Tuvalu	Armenia
1999 <sup>31</sup>	2		Liberia, Laos	
2000	6	1	Albania, Angola, Djibouti, Haiti, Kuwait, Suriname	Kyrgyzstan
Total	13	2		

### 2. CPs completed by UNEP and approved by the Executive Committee to date

Year	Number of projects		Multilateral Fund	GEF
	MF	GEF		
1992	2		Zambia, Ghana	
1993	10		Algeria, Burkina Faso, Cameroon, Fiji, Guatemala, Maldives, Mauritius, Panama, Senegal, Syria	
1994	11		Barbados, Botswana, Cote d'Ivoire, Malawi, Mozambique, Niger, Seychelles, Sudan, Swaziland, Uganda, Zimbabwe	
1995	11		Benin, Bolivia, Central African Republic, Congo, Dominican Republic, Guinea, Malta, Namibia, Peru, Saint Lucia, Togo	
1996	14	2	Bahamas, Bahrain, Croatia, Ethiopia, Gambia, Honduras, Jamaica, Lebanon, Lesotho, Morocco, Pakistan, Papua New Guinea, Tanzania, Vietnam	Latvia, Lithuania
1997	11		Comoros, Cyprus, El Salvador, Gabon, Georgia, Guyana, Korea DPR, Nicaragua, Paraguay, Saint Kitts & Nevis, Western Samoa	

<sup>30</sup> GEF projects in this annex are included for information purposes only.

<sup>31</sup> The countries listed under the Multilateral Fund for 1999 and 2000 under the Multilateral Fund also include RMPs.

Year	Number of projects		Multilateral Fund	GEF
	MF	GEF		
1998	10	3	Antigua and Barbuda, Brunei Darussalam, Burundi, Chad, Dominica, Mali, Moldova, Nepal, St. Vincent & Grenadines, Yemen	Azerbaijan, Turkmenistan, Uzbekistan
1999	4	2	Belize, Congo DR, Mongolia, Myanmar	Estonia, Kazakhstan, Tajikistan
2000	1		Grenada	
<b>Total</b>	74	8		

### 3. On-going IS projects

Year Approved	Number On-going		Multilateral Fund (I = first phase of the IS project, II = second phase, III= third phase)	GEF
	MF	GEF		
1993	8		Algeria (II), Burkina Faso (III), Cameroon (III), Guatemala (II), Mauritius, Panama (II), Senegal (II), Zambia	
1994	13		Barbados (II), Botswana, Cote d'Ivoire (II), Fiji (II), Malawi (II), Maldives, Mozambique, Niger (II), Seychelles, Sudan (II), Swaziland, Uganda, Zimbabwe (II)	
1995	9		Benin (II), Bolivia (II), Central African Republic (II), Congo Brazzaville, Dominican Republic (II), Guinea (II), Namibia, Peru (II), Vietnam (II)	
1996	11		Bahamas, Bahrain, Croatia (II), Ethiopia (II), Gambia, Honduras, Jamaica (II), Lesotho, Morocco, Papua New Guinea, Tanzania	
1997	12		Comoros, DPR Korea, El Salvador, Gabon, Georgia, Guyana, Nicaragua, Paraguay, St Kitts and Nevis, St Lucia, Togo, Western Samoa	
1998	10	4	Antigua & Barbuda, Brunei Darussalam, Burundi, Chad, Dominica, Mali, Moldova, Nepal, St. Vincent & Grenadines, Yemen	Azerbaijan, Latvia, Lithuania, Turkmenistan
1999	5	1	Belize, Congo DR, Madagascar <sup>32</sup> , Mongolia, Myanmar	Uzbekistan

<sup>32</sup> With the Government of France.

Year Approved	Number On-going		Multilateral Fund (I = first phase of the IS project, II = second phase, III= third phase)	GEF
	MF	GEF		
2000	1	3	Grenada	Estonia, Kazakhstan, Tajikistan
<b>Total</b>	69	8		

#### 4. IS renewals

Year Approved	Number	Countries
1997 <sup>33</sup>	4	Burkina Faso, Cameroon, Guatemala, Senegal
1998	6	Barbados, Bolivia, Central African Republic, Cote d'Ivoire, Malawi, Niger
1999	17	Algeria, Benin, Burkina Faso, Cameroon, Croatia, Dominican Republic, Ethiopia, Fiji, Guinea, Jamaica, Lesotho, Panama, Peru, Senegal, Sudan, Vietnam, Zimbabwe
2000	17	Bahrain, Comoros, Congo Brazaville, DPR Korea, El Salvador, Gabon, Gambia, Georgia, Honduras, Malawi, Namibia, Nicaragua, Panama, Paraguay, Seychelles, St. Lucia, Zambia
<b>Total</b>	44	

#### 5. RMPs under development

Year Approved	Number	Countries
1997	1	Vietnam
1998	2	Bolivia, Senegal
1999	8	Central African Republic, Comoros, Chile, Laos, Liberia, Morocco, Myanmar, Yemen
2000	6 <sup>34</sup>	Albania, Angola, Djibouti, DR Congo <sup>35</sup> , Haiti, Togo
<b>Total</b>	17	

<sup>33</sup> Included second renewal for Burkina Faso, Cameroon and Senegal.

<sup>34</sup> With the exception of the RMPs for DR Congo and Togo, all of these RMPs are being done within the CPs.

<sup>35</sup> No funds were approved for RMP preparation for DR Congo and Mongolia.

## 6. RMPs under implementation

Year Approved	Number	Countries
1997	5	Bahamas, Georgia, Guyana, Trinidad and Tobago, St. Lucia
1998	26	Antigua & Barbuda, Bahrain, Burundi, Cote d'Ivoire, Dominica, Dominican Republic, El Salvador, Gabon, Moldova, Nicaragua, St Vincent & Grenadines, St. Kitts  <i>Regional project with GTZ:</i> Botswana, Ethiopia, Kenya, Lesotho, Malawi, Mauritius, Mozambique, Namibia, Seychelles, Swaziland, Tanzania, Uganda, Zambia, Zimbabwe
1999	14	Bangladesh, Belize, Burkina Faso, Chad, Fiji, Gambia, Guatemala, Jamaica, Mali, Nepal, Panama, Peru, Syria, Uruguay
2000	7	Benin, Congo Brazaville, Guinea, Mongolia, Western Samoa
Total	50	

## 7. Non-Party developing countries

The only nations not Party to the Montreal Protocol are the following 14 countries (those expected to ratify during 2001 are underlined):

Afghanistan, Bhutan, Cambodia, Cape Verde, Equatorial Guinea, Eritrea, Guinea Bissau, Iraq, Nauru, Palau, Rwanda, Sao Tome and Principe, Sierra Leone, Somalia.
