EXECUTIVE COMMITTEE OF  
THE MULTILATERAL FUND FOR THE  
IMPLEMENTATION OF THE MONTREAL PROTOCOL  
Thirty-fifth Meeting  
Montreal, 5-7 December 2001

**Addendum**

**PROJECT PROPOSALS: BOLIVIA**

This addendum is issued to add the draft agreed conditions for phase-out of methyl bromide in Bolivia as referred to in paragraph 22 of document UNEP/OzL.Pro/ExCom/35/29.

**AGREED CONDITIONS FOR PHASE-OUT OF METHYL BROMIDE  
IN BOLIVIA (DRAFT)**

1. The Executive Committee agrees to approve, in principle, US \$221,032 as the total funds that will be available to achieve the phase-out of methyl bromide (MB) used for all purposes in Bolivia, excluding quarantine and pre-shipment applications, subject to the following understandings and considerations.

2. As reported to the Ozone Secretariat, and consistent with information in the project document presented to the Executive Committee, the MB baseline for compliance for Bolivia is 0.6 ODP tonnes and the consumption reported in 2000 was 0.41 ODP tonnes of controlled use. However, the average consumption of MB in the 12 months preceding project preparation (July 2000-July 2001) was 1.5 ODP tonnes of controlled use. Bolivia will therefore, have to reduce its consumption of MB by at least 0.92 ODP tonnes to achieve compliance with the Montreal Protocol's 2002 freeze obligation, and by at least 1 ODP tonne to achieve compliance with the Protocol's 20 per cent reduction in 2005. However, the Government of Bolivia commits to stabilising consumption in 2002 through import restrictions and other policies deemed necessary to control its MB consumption and achieve a complete phase-out by 2006.

3. The Government of Bolivia will have flexibility in organising and implementing the project components which it deems more important in order to meet its phase-out commitment noted above. UNDP agrees to manage the funding for this project in a manner designed to ensure the achievement of the specific MB reductions agreed for the sector.
