اللجنة التنفيذية للصندوق المتعدد الأطراف
لتنفيذ بروتوكول مونتريال
الاجتماع الرابع والخمسون
مونتريال، 7-11 أبريل / نيسان 2008

خطة أعمال 2008-2010 لمنظمة الأمم المتحدة للتنمية الصناعية (يونيدو)
تعليقات وتوصيات من أمانة الصندوق المتعدد الأطراف

1. تعرض هذه الوثيقة موجزاً للأنشطة المخططة لمنظمة الأمم المتحدة للتنمية الصناعية (يونيدو) من أجل إزالة مواد مستندة للأوزون خلال فترة السنوات الثلاث 2008-2010. وهي تورد أيضاً مساحات الأداء لشريان الأعمال يونيدو، وتوصيات وتقارير عامة لتنظير فيها اللجنة التنفيذية. وشريان أعمال يونيدو وارد في المرفق I لمحة الوثيقة.

الأنشطة المخططة لـ 2008-2010

الأنشطة المخططة لعام 2008

3. بالنسبة لعام 2008 تبلغ القيمة الإجمالية للمشروعات التي تخطط يونيدو لتقديمها 58.61 مليون دولار أمريكي. (بما في ذلك تكاليف الاستثمار) مما سيتفرع عن إزالة 3.036 طن من قدرات استنفاد الأوزون. وتتضمن شريان الأعمال:

(a) شرائح متعلقة بتسعة عشر اتفاقاً من الاتفاقات المتعددة السنوات من أجل إزالة على صعيد القطاع والمواد، تقترر بمجموع 9.1 مليون دولار أمريكي تصرف عن إزالة 2.063 طن من قدرات استنفاد الأوزون، لدى تنفيذها;

(b) اثنين وثلاثين اتفاقاً جديداً من الاتفاقات المتعددة السنوات في الشريان الإجمالي 35.4 مليون دولار أمريكي عام 2008 (مجمعة 92.6 مليون دولار أمريكي لفترة السنوات الثلاث) مع إزالة ملمحة لمادة مستندة للأوزون لعام 2008 قدرها 705 أطنان من قدرات استنفاد الأوزون (مجمعة 1.772 طن من قدرات استنفاد الأوزون لفترة السنوات الثلاث);

(h) مستوى اتفاقات استثمارية جديدة تقترر بـ 3.61 مليون دولار أمريكي;

(d) إعداد مشروعات بـ 1.88 مليون دولار أمريكي;

(g) خمسة وأربعين من مشروعات المساعدة التقنية تقترر بـ 5.24 مليون دولار أمريكي;

(h) خمسة مشروعات تعزيز مؤسسي تقترر بـ 724.500 دولار أمريكي;

(i) تكاليف وحدة أساسية بقيمة 1.86 مليون دولار أمريكي.
الأنشطة المخططة لعام 2009

4. عام 2009 تعتزم يونيدو تقديم مشروعات قيمتها الإجمالية 56.6 مليار دولار أمريكي ومع إزالة ملحة قدرها 2.025 طن من قدرات استعداد الأوزون. ويشمل هذا المجموع 12.8 مليار دولار أمريكي لأنشطة ضرورية للاستئنال، وفقًا للنموذج الموجة أمتاليًا، و23.2 مليار دولار أمريكي لأنشطة هيدرو كلورو فلورو كربون و11.1 مليار دولار أمريكية للتخلص من مواد مستندة للأوزون، و6 ملايين دولار أمريكي لإزالة معجزة لبروميد الميثيل ومشروعات غير استثمارية، و1.2 مليون دولار أمريكي لجهة استثمارية مزودة بمقياس للجرعات غير مطلوبة من النموذج الموجة أمتاليًا ولITTLE 1.2 مليار دولار أمريكي لغير طرف.

الأنشطة المخططة لعام 2010

5. عام 2010 تعتزم يونيدو تقديم مشروعات قيمتها الإجمالية 59.4 مليار دولار أمريكي مع إزالة ملحة قدرها 981 طن من قدرات استعداد الأوزون. ويشمل هذا المجموع 14.8 مليار دولار أمريكي مطلوبة للاستئنال، و23.1 مليار دولار أمريكي لأنشطة هيدرو كلورو فلورو كربون، و18 مليون دولار أمريكي للتخلص من مواد مستندة للأوزون، و2.5 مليار دولار أمريكي لإزالة معجزة لبروميد الميثيل، و1.1 مليار دولار أمريكي لجهة حالية من غير الطرف.

الجمع

بلغ مجموع تمويل الموارد 58.6 مليون دولار أمريكي عام 2008. وفي خطة أعمال يونيدو هناك 27.3 مليون دولار أمريكي للأنشطة المطلوبة للامتثال و31.3 مليون دولار أمريكي للأنشطة غير المطلوبة للامتثال. والأنشطة التي ليست مطلوبة للامتثال تشمل أنشطة هيدرو كلورو فلورو كربون (25.5 مليون دولار أمريكي)، والأنشطة بروميد ميثيل (3.8 مليون دولار أمريكي) وأنشطة أجهزة استيانق مزودة بمقياس للجرعات (1.3 مليون دولار أمريكي). ومنشورات هالونات (318.000 دولار أمريكي)، ومنشورات لغير الأطراف في تعديل كوبنهاجن (256.000 دولار أمريكي).
8. إن معظم الأنشطة في خطة أعمال يونيدو لفترات 2009 و2010، كما ذكر أعلاه، ليست مطلوبة للامتثال. ومستوى التمويل الإجمالي ليونيدو على مدى السنوات الثلاث القادمة استنادًا إلى خطة أعمالها، سيكون نوعًا ما ثابثًا على 56.6 مليون دولار أمريكي عام 2009 و59.4 مليون دولار أمريكي عام 2010. وقد أفادت الوكالة عن أنشطة تقدر بـ 39.36 مليون دولار أمريكي بعد 2010، يوجه معظمها نحو أنشطة مواد هيدرو كلورو فلورو كربون.

التخطيط والمساعدة على الامتثال

9. في خطة أعمالها لفترة 2008-2010 أدخلت يونيدو قسماً عن المبادرات لضمان الامتثال، يدعمه مرفق وصفي منظم حسب البلد. وأفادت الوكالة أنها ستسعى أن توفر بصورة منتظمة بعثات إلى وحدات الأوزون الوطنية، حيث لديها مشاريع جارية مستقلة. وهي تحضر اجتماعات الفروع التنظيمية وجلال العمل الورقة بها، ونشرت موظفين تعزيز تمثيلها في المكاتب الحكومية الإقليمية، بما فيهم موظف في الصين. وتشرح خطة الأعمال المساعدة التي ستقدمها يونيدو لبلدان في وضع عدم امتثال أو معرضة لعدم الامتثال.

10. خلال فترات السنوات الثلاث 2008-2010 تتعزز يونيدو إزالة 9.943 طن من قدرات استفاد الأوزون بواسطة مشروعات جارية وإتفاقات معهد السنوات. إضافة إلى ذلك أفادت الوكالة أن إزالة 4.73 طن من قدرات استفاد الأوزون ستتم بواسطة مشروعات ستقدم للحصول على موافقة خلال فترة السنوات الثلاث.

تعليقات عامة

11. تعالج هذه التعليقات العامة قضايا غير مطلوبة للامتثال وفقاً للنموذج الموجه امتباليًا، وتتضمن مجالات عن تداخل ممكن للمشروعات.

أنشطة غير مطلوبة للامتثال

أنشطة هيدرو كلورو فلورو كربون

13. أدخلت يونيدو في خطة أعمالها لعام 2008 مشروعات هيدرو كلورو فلورو كربون استثمارية قدرت بـ 19.8 مليون دولار أمريكي. وقد استناد تقدير التمويل إلى خبرة مترامية في أنشطة مماثلة وإليكيف أفاد عنها مقدمو التكنولوجيا. ولكن يونيدو أفادت أن المبلغ المعلن هو فقط تدير لأغراض التخطيط، وأن التكليف قد تتقلب استنادًا إلى عوامل عدة، بما فيها القطاعات والتكنولوجيا المختارة وقرارات الإنتاج والمنطقة. وجدت التكليف لمشروعات هيدرو كلورو فلورو كربون الخاصة ليونيدو تتراوح بين 100 دولار أمريكي/كغ و300 دولار أمريكي/كغ، ولكنها تقرر بنحو من 150 دولار أمريكي/كغ بالنسبة لمعظم المشروعات. وأفادت يونيدو أن تقولها يعكس قيمتها لمعدل كلفة تقريبية متحفظة استنادًا إلى معلومات متواخرة، ومع مراعاة قطاعات الخدمات وغير هذه القطاعات.
14. لم توضح يونيدو أنشطة الهيدرو فلورو كروب فلورو كروب هيدرو كروب نسبياً، حسب المادة الكيميائية. وأفادت الوكالة أن ليس
ثمة بيانات متوافقة وعميقة عنها، حسب المادة الكيميائية، وأن تحديثاً كهذا غير ممكن من دون دراسة
مسحية/استراتيجية محدثة وخط أساس ثابت.

15. فضلاً عن ذلك، ولن ينصح تطبيق خطط إدارة إزالة المواد البترول كروب فلورو كروب كروب كروب من الأنشطة
التمهيدية، فليس هناك أي إزالة متوافقة لعدد من خطط إدارة إزالة المواد البترول كروب فلورو كروب كروب.
وبهذا، توفرت الكمية للأمان، كان ذلك بالنسبة للمشروعات الاستراتيجية. وفي تلك الحالات كان ممكن تقدر إزالة
استدامة إلى مجموعة استهداف هيدرو كروب فلورو كروب كروب المبلغ عن (أو المحدث) زائد نسبة نمو ممكنة. وفي بلدان
الآرمن، بالإضافة إلى بهاء، و芦بيا، ومالزيا، حيث تستنثف أكثر من وكالة واحدة، أخذت حصة يونيدو
بالحسبان. ومتطلبات كمية الأطنان المضمّنة في خطة أعمال 2008 كانت مستندة إلى الاستهلاك لعام 2006،
واعتباراً من عام 2007، إن تحتل هذا الوضع ليونيدو أن تقدر المبلغ
الضروري لمساعدة البلدان على الالتزام بهدف التجديد.

16. إن التكاليف الخاصة بإعداد خطط إدارة إزالة المواد البترول كروب فلورو كروب كروب كروب هي دلالة فقط. وبعد
الموافقة على خطط إدارة إزالة المواد البترول كروب فلورو كروب كروب كروب ستتمكن يونيدو من تزويد أمانة الصندوق
المتعدد الأطراف بتقدير أكثر دقة لتكاليف إعداد خطط إدارة إزالة المواد البترول كروب فلورو كروب كروب كروب.

17. تلتقت يونيدو طلبات لمشاريع استثمار أو مساعدة تكنولوجية لتمييز مواد مستندة للأوزون من البلدان التالية:
أكشان، الأرجنتين، اليونان، البرتغال، سلوفاكيا، الصين، جمهورية كروب الشعبية الديمقراطية، إثيوبيا، جورجيا،
جمهورية إيران الإسلامية، فيرغزستان، الجماهيرية العربية الليبية، مدغشقر، المغرب، نيكاراغوا، غامان،
الصين، سوريا، جنوب أفريقيا، السودان، الجمهورية العربية السعودية، جمهورية كروب مقدونيا اليوغسلافية السابقة،
جمهورية فنزوئلا البوليفاريا واليمن.

18. خصصت يونيدو 29 مليون دولار أمريكي لخطوم أعمال السنوات القادمة من دون أي إشارة إلى حجم
أطنان قدرات استناد الأوزون، أو أي إشارة إلى الفائدة الممكنة على طبقة الأوزون أو التغيير المناخي. فضلًا
عن ذلك، لم تضمّن الوكالة إعداد مشروعات تكنولوجية هذه المشروعات للتخلص من المواد المستندة للأوزون.
وافقت على المستوي الغالب غير واضحة وأمانة ستسعى في العام 2008، أن تنظر في كلمة التكنولوجيا
وتوضيح الإزالة بالأمان، المصنفة بنسبات التمويل. وافدت يونيدو أيضاً أنها ستكون في وضع يمكنها من توفير
أرقام معترنة لعام 2009 وما بعد، وأن خطة أعمالها لعام 2008 تعكس بكل سهولة طلب البلدان فيما يتعلق
بالمشروعات التكنولوجية لتمييز المواد المستندة للأوزون.

هالوتات غير مطلوبة من النموذج

19. إن حجم أحدث استهلاك للهالوتات هو صفر في الكوين والمغرب. ولم يحصل أي من البلدين على
مشروع لإنزه هالوتات. ولدى الكوين خط أساس قدره ثلاثة أطنان من قدرات استناد الأوزون، وخط الأساس
للمغربي هو سبعة أطنان من قدرات استناد الأوزون، ويعتبر على المفرزات 18 و44/8 يستطاعة الجنة
التنفيذية أن تنتج مشروعات بنوك هالوتات لبلدان لها خطوط أساس صفر، وكذلك تلك البلدان التي لديها مستوى
منخفض من الطاقة العامة.
بروميد الميثيل (إزالة معلقة)

20. أدخلت يونيدو في خطة أعمالها لفترة 2008-2010 مشروعات بروميد ميثيل قدرت بـ 11.91 مليون دولار أمريكي لبلدان سبع وقعت مساعدته من الصندوق المتعدد الأطراف لإثارة امتثالها لتخفيض بنسبة 20% من حقل الأسماك. وتمكنت المشروعات التالية من أوتخدام كميات بروميد الميثيل بين هالألين:

(أ) مشروعات إزالة/استئصال بروميد ميثيل للجزائر (6.3 طن من قدرات استنفاد الأوزون)، والأرجنتين عام 2010 (270.9 طن من قدرات استنفاد الأوزون)

(ب) مشروع إزالة بروميد ميثيل متعدد السنوات لمكسيك عام 2008 (722.6 طن من قدرات استنفاد الأوزون)

(ج) مساعدة تقنية لبروميد الميثيل للسودان (1.3 طن من قدرات استنفاد الأوزون) عام 2008

(د) مشروع إزالة بروميد ميثيل لمصر (180 طن من قدرات استنفاد الأوزون) عام 2008

(ه) مشروعات إزالة بروميد ميثيل لغواتيمالا (522.8 طن من قدرات استنفاد الأوزون) عام 2009.

21. بالنسبة لعامي 2008 و2009 أدخلت يونيدو إعداد مشروعات وتقديمات مشروعات لبلدان لم تصل إلى تدخل كوبنهاگن، وعلى وجه التحديد نيجيريا (3.4 طن من قدرات استنفاد الأوزون) وتركمانستان (3.4 طن من قدرات استنفاد الأوزون) فص هي مماثلة، وقد وضعت هذه المشروعات في خطة الأعمال المتبقية لتصديق المحتمل تلك البلدان على تدخل كوبنهاگن.

22. أدخلت يونيدو أيضًا مشروعات بروميد ميثيل غير استئصالية لمنطقة، بما في ذلك "مساعدة تقنية لبلدان لديها إزالة أعائد برمجتها، الأرجنتين وأوروجواي (6.5 طن من قدرات استنفاد الأوزون) ولأمريكا اللاتينية والمنطقة الكاريبية (218.000 دولار أمريكي) عام 2008 و" خيارات بيئية ممتلكة لبروميد الميثيل في تبخير اللحم، الجزائر، تونس ومصر" للمنطقة الأفريقية (272.500 دولار أمريكي) عام 2009. وافادت يونيدو أن استثمار بروميد الميثيل في الجزائر متعلق بالقطاع الصناعي مرتفعة الرطوبة، التي مازالت تعتبر من الصناعات مناسبة. وبمثاقب مقرر اجتماع الأطراف 12/12 تعترف بالوكالة تقديم مشروع تدليلي متوازن.

23. عام 2010، تميزت يونيدو بتقييم شرائح 2010-2014 لإزالة استهلاك وإنتاج بروميد الميثيل في الصين.

وهذا المقررة مستند إلى إزالة مبكرة تخطيط لها حكومة الصين.

/جهزة استئصال مزودة بمقياس للجرعات

24. يتضمن النموذج الموجه انتقالاً لأشكال أجهزة استئصال مزودة بمقياس للجرعات لبلدان مازالت لديها أهلية للتمييز المغذي لمشروعات كلورو فلورو كربون وفقاً للمباني 57/35/1985/بلدان المادة 5 التي تتبع لجهزة استئصال مزودة بمقياس للجرعات، مثلاً بروموش بروموش ينبع ينبع من بروموش بروموش لعام 2008 تحتضن 12 استراتيجية إقليمية لجهزة الاستئصال المزودة بمقياس للجرعات قدر قيمة كل منها بـ 30,000 دولار أمريكي (زياد تكاليف الوكالة) واستراتيجيات أجهزة الاستئصال المزودة بمقياس للجرعات لبلدان التي لديها حاليًا إمكانيات متعددة للاستهلاك، بما فيها من كلورو فلورو كربون، بفضل خطط وإدارة إزالة نهائية لألابانيا، البرتغال، المجر، روسيا، وناميبيا، ولمشروعات كلورو فلورو كربون للبلدان التابعة من غير بلدان
الاستهلاك المنخفض: جمهورية كوريا الشعبية الديمقراطية، ليبيا، مقدونيا، المغرب، نيجيريا، صربيا، السودان، وتونس.

25. بالنسبة لمشاريع الاستثمار/المشاريع التقنية للاستثمار المزودة بمقياس للجرعات وإعداد المشروعات في الجزائر والأردن والجمهورية العربية السورية وجمهورية فنزويلا البوليفارية، تتناول الاتفاقات المعقدة مع اللجنة التنفيذية استهلاك كلوور فلورو كربون بكامله، وبالتالي، واستنادًا إلى المقر 57/35، ليست هناك أية تمويل متبقية لهذه الأنشطة. وقد ترغب اللجنة التنفيذية في البحث عنًا إذا كان يجب الإبقاء على هذه الأنشطة في خطة الأعمال.

غير مؤهل/غير طرف حالياً

26. تحتوي هذه الفئة على أنشطة ليست مؤهلة حالياً لإعداد مشروعات أو مشروعات استثمارية. وهي تشمل أيضًا إعداد مشروعات وتفعيل خطة وطنية لإزالة مواد مستنفدة للأوزون للعراق (2.3 مليون دولار أمريكي) عامي 2009 و2010.

أنشطة مركز البيئة العالمية

27. أدخلت يونيدو نشاطين في إطار القائمة العامة "أنشطة مركز البيئة العالمية" لتركمانستان، تتضمن إعداد خطة إدارة إزالة نهائية (25 دولار أمريكي)، وتتم في حدود ديسمبر/كانون الأول 2009 ولتنفيذ خطة إدارة إزالة نهائية (161,000 دولار أمريكي)، وتتم في حدود ديسمبر/كانون الأول 2010. وبعدما لحظت اللجنة التنفيذية التقرير المرحل، بشأن تنفيذ البرنامج القطري/خطة إدارة غازات التبريد لتركمانستان، وأن تركمانستان تلقى تمويل قدره 399,220 دولار أمريكي من مركز البيئة العالمي من أجل إزالة كاملة لإنتاجها مواد مستنفدة للأوزون، قررت في اجتماعها السادس والأربعين "لا تقدم المعالجة من الصندوق المتعدد الأطراف في المستقبل لإزالة المواد المستنفدة للأوزون في تركمانستان غير أنشطة التدريب المؤسسي" (المقرر 21/46، ج) وهذا الموضوع معالج أيضًا في خطة أعمال يونيدو (9/10).

تداولات محتملة

28. خلال اجتماع التنسق في يناير/كانون الثاني 2007، طلبت الأمانة بأن توجه كافة الوكالات المعنية رسائل بالمرجعية للأنشطة حيث يمكن أن يكون فيها تداولات محتملة. وأظهرت يونيدو كافة الرسائل ذات الصلة باستثمار رسائل من إندونيسيا ونيجيريا وتركيا. وفي غياب الرسائل، بقي هناك تلك تداول محتمل لأنشطة مخططة مع وكالات أخرى.

مؤشرات الأداء

29. في الجدول 2 أدناه موجز لمؤشرات أداء يونيدو عمال بالمقررات 47/49 و47/51 و47/49 (د):
الجدول 2

30. وضعت يونييدو هدفاً لتقديم مساعدة سياسة عامة لنسبة بلدان عام 2008. وهذه البلدان هي: البوسنة والهرسك، جمهورية الكونغو الديمقراطية، هندوراس، مصر، الجمهورية العربية الليبية، باكستان، أوغواي، الجبل الأسود وصربيا.

النصائح

31. قد ترغب اللجنة التنفيذية في النظر في:

المصادقة على خطة أعمال يونييدو لفترة 2008-2010 كما وردت في الوثيقة UNEP/OzL.Pro/ExCom/54/10 للموارد لعام 2010 وما بعد. مع الملاحظة بأن المصادقة لا تعتبر لا على الموافقة على المشروعات المبتدئة ضمنها ولا على مستويات تمويلها، وأن المصادقة هي مع أية تعديلات مرتبطة على مراعاة الأنشطة التالية:

(1) أنشطة هيدرو كلورو فلاوروكربون;
(2) أنشطة أجهزة الاستنشاق المزودة بقياس للجرعات في بلدان سبق وتلتقت مشروعات إزالة كاملة.
(3) أنشطة تخلص من المواد المستنفدة للأوزون؛

(4) أنشطة خطة إدارة إزالة نهائية في تركمانستان على ضوء المقرر 46/21؛

(ب) مطالبة يونيتيو بأن يبلغ الاجتماع الرابع والمخمس عن مجالات التداخل المحتمل في أنشطة مع خطط أعمال وكالات أخرى، وأخذ العلم بالمعلومات بالطريقة المناسبة؛ و

(ج) الموافقة على مؤشرات الأداء ليونيديو المبكرة في الجدول 2 من تعليقات أمانة الصندوق المتعدد الأطراف، كما وردت في الوثيقة 10/10.

UNEP/OzL.Pro/ExCom/54/10
EXECUTIVE SUMMARY

The 2008 Business Plan of UNIDO together with the forecast for 2009 and 2010 represents the Three-year Rolling Business Plan of Montreal Protocol activities of the Organization. It was prepared based on the previous three year rolling business plan, taking into consideration the approvals and experience of previous years, the requests received from Article 5 countries, priorities established by the Executive Committee and the decisions taken, particularly decisions 53/3, 53/4, 53/5 and 53/10. It also reflects the discussions held in Montreal during the Inter-agency Coordination Meeting on 29-30 January 2008, whereby an analysis of the HCFC compliance situation (freeze targets) provided valuable information. It is largely inspired from the 19th Meeting of the Parties, which took place in Montreal last September agree to accelerate the phase-out of HCFC.

In 2008, UNIDO plans to prepare and submit for approval to the Executive Committee, two (2) halon technical assistance projects, five (5) institutional strengthening activities, seven (7) methyl bromide/fumigants projects, twenty-six (26) project preparation activities including eighteen (18) for HCFC, six (6) for CFC and two (2) for methyl bromide, twenty-two (22) technical assistance projects for HCFC, one CFC national phase out plan and seven (7) TPMPs, nineteen (19) MDI activities for seventeen (17) countries which include three (3) phase out plans, and twelve (12) MDI transitional strategy activities

Extensions for institutional strengthening projects for five countries for US$ 724,500, technical assistance activities for the phase-out of halons for two countries for US$ 318,00 as well as methyl bromide technical assistance activity for two country for US$ 281,00 are also included in UNIDO's 2008 Business Plan.

Funds for project preparation will be requested for an amount of US$ 1,827,250.

The forward commitments amount to a total of US$ 9,910,095 for 2008. All above-mentioned figures include agency support costs.

Finally, in accordance with ExCom's decision 38/68, as modified by decision 46/35, in 2006, US$ 1,857,636 has been allocated for funding of the 2008 core unit at UNIDO.

The total amount foreseen in UNIDO's 2008 Business Plan, including forward commitments, new investment and non-investment activities, and funding of core unit is US$ 58,507,645, including support costs and with an impact of 3,087 ODP tonnes (based on average cost effectiveness).
For the second and third year of the Three-year Rolling Business Plan, US$ 50,051,336 worth of projects was included for the year 2009 with a planned phase-out of 2,087 ODP tonnes and US$ 59,914,344 worth of projects were earmarked for 2010 with an impact of 1033 ODP tonnes.
A. MULTILATERAL FUND TARGETS

1. CONTEXT

UNIDO prepared its 3-year rolling business plan for 2008 to 2010 based on ExCom decision 53/3, 53/4, 53/5, 53/10 on the 3-year phase-out plan, model three year plan, compliance-oriented model, and the status/prospects in achieving compliance prepared by the Multilateral Fund Secretariat, the annual tranche submission delays, as well as the Government requests received from Article 5 countries. An interagency coordination meeting was held on 29-30 January 2007. Considering the business plans received by all implementing agencies and the compliance-oriented model, the Secretariat identified the countries that are in need of immediate assistance in order to comply with the various phase-out schedules (HCFCs, CFCs, Halons, CTC, Methyl Bromide and Methyl Chloroform) for which no activities were included in the business plans of implementing agencies and pointed out cases where a duplication of activities occurred among the various implementing agencies.

During the preparation of the Business Plan, we had to take into consideration our experience and information collected in several countries which shows that part of the eligible for funding remaining consumption cannot be addressed only by investment activities. During the preparation of projects, the remaining data discrepancies, if any, will be clarified. The current Business Plan, however, reflects only those phase-out targets, which according to our present information, can be realistically addressed through investment and non-investment activities. For HCFCs the estimation was based on the accumulated experience in similar activities and the cost provided from the technology providers. However, the indicated amount is only optimistic forecast for planning purposes. The fluctuation of possible costs is very high depending on sector, selected technology, production capacities and region.
2. RESOURCE ALLOCATION

In 2008, UNIDO will submit 10 TPMPs (Burundi, Côte d'Ivoire, Republic of Congo, Eritrea, Guinea, Honduras, Myanmar, Niger, Sao Tome and Principe, Turkmenistan), 2 TPMP project preparation (Myanmar, Turkmenistan), 4 fumigant Phase-out Plan (Egypt, Mexico, Morocco, Turkmenistan), 1 fumigants technical assistance project (Sudan) and 2 fumigant project preparation (Ethiopia, Zambia). In addition, for the MDI sector UNIDO planned 12 MDI Transitional Strategy (Albania, Bosnia and Herzegovina, Croatia, Korea DPR, Libya, Macedonia, Morocco, Nigeria, Oman, Serbia, Sudan and Tunisia), 2 MDI project preparation (Algeria, Syria) and 3 MDI phase-out Plan (China, Jordan, Venezuela). For the halon sector, 2 halon technical assistance projects (Kuwait, Morocco) are programmed. Furthermore, UNIDO will submit 5 Institutional strengthening projects (Egypt, Libya, Montenegro, Oman, Syria).

Regarding HCFCs, UNIDO received requests for project preparation (Algeria, Argentina, Cameroon, China, Egypt, Eritrea, India, Indonesia, Jordan, Malaysia, Mexico, Morocco, Nigeria, Pakistan, Saudi Arabia, Serbia, Syria, Tunisia, Uruguay, Venezuela, Yemen.), HCFC investment activities (Venezuela, Yemen, Syria, Tunisia, Serbia, South Africa, Pakistan, Saudi Arabia, Nigeria, Morocco, Malaysia, Mexico, India, Indonesia, Jordan, Egypt, Eritrea, Cameroon, China, Algeria, Argentina) and HCFC Phase-out Management Plan (Albania, Algeria, Bosnia & Herzegovina, Cameroon, Croatia, Egypt, Eritrea, Honduras, Jordan, Korea, DPR, Libya, Macedonia, Moldova, Montenegro, Morocco, Nicaragua, Niger, Nigeria, Oman, Pakistan, Senegal, Serbia, South Africa, Sudan, Syria, Tunisia, Turkmenistán, Venezuela, Yemen).

The total budget amount for 2008 for the above activities is 58,507,645 US$, plus 1,857,636 of UNIDO core units.

3. GENERAL OVERVIEW ON ASSISTANCE TO COUNTRIES IN NON-COMPLIANCE (this part is complete for BP 2008-2010)

UNIDO’s three year-rolling Business Plan for 2008-2010 is driven by the compliance needs of Article 5 Countries. In 2007, the implementation of UNIDO’s ongoing activities supported by the Multilateral Fund in countries with decisions on non-compliance such as Bosnia and Herzegovina, Guatemala, Islamic Republic of Iran, Libyan Arab Jamahiriya, Honduras and Uruguay succeeded in bringing some countries back into compliance or sustaining the compliance of other countries.

Through the presented business plan, the Organization focuses on providing assistance to countries in non-compliance as well as those in potential non-compliance with regard to their obligations towards the Montreal Protocol. The 19th meeting of the Parties addressed non-compliance by countries being assisted by UNIDO namely by Saudi Arabia. It also addressed Countries that were noted to be in non-compliance during prior meetings of the parties and are now in compliance. UNIDO’s ongoing and newly planned activities in those countries for 2008 are described below:

Albania

Albania reported ozone-depleting substances data for CFC consumption of 15.2 ODP-tonnes. The reported data for 2006 was consistent with Albania’s commitment contained in decision XV/26 in which the party committed to reduce CFC consumption to no greater than 15.2 ODP-tonnes. The reported figure of 15.2 ODP tonnes represents an increase in CFC consumption relative to 2005, for which Albania reported CFC consumption of 14.3 ODP-tonnes but keeps Albania in advance of its obligations.

UNIDO is currently implementing an National phase out plan in Albania. The third tranche was released by the 50th ExCom in Nov 2006. The implementation of this project is expected to bring Albania to comply with its obligations to fully phase out CFCs by the January 2010.

Bosnia and Herzegovina

Bosnia and Herzegovina submitted its ODS data for 2006, reporting 32.6 ODP tonnes and zero consumption of methyl bromide and methyl chloroform. That data continues to place the Party in advance of both its commitments. BHE had adopted the legal instruments necessary to establish an ODS licensing and quota system and introduce the ban on the import of ODS and ODS containing equipment, which are in line with its time-specific benchmarks.

UNIDO is currently implementing an ODS phase out management plan in BHE. The final tranche of this project was approved by the 52nd meeting of the Executive Committee in
July 2007. The implementation of the ODS phase out management plan is expected to bring Bosnia and Herzegovina to fully comply with its obligations to fully phase out CFCs, CTC and methyl chloroform.

**Democratic Republic of Congo**

The Democratic Republic of Congo exceeded its maximum allowable consumption of carbon tetrachloride and methyl chloroform in 2005. In 2006, Congo DR reported an annual consumption for the controlled substances in Annex B, group II, (carbon tetrachloride) and group III (methyl chloroform) for 2006 of 16,500 ODP tonnes and 4,000 ODP tonnes respectively. The Democratic Republic of Congo thus maintained its 2005 consumption levels as required in the action plan adopted through Decision XVIII/21. Therefore the Party returned to compliance in 2006.

UNIDO in cooperation with the Government of Italy prepared and presented to the 51st meeting of the Executive Committee, a terminal umbrella project on behalf of the Democratic Republic of Congo addressing the consumption of ODSs in the solvents sector. The project addresses the use of CTC, TCA as well as CFC-113 and contains a phase out schedule that is in line with the plan of action adopted by the meeting of the Parties to aid the Government of the Democratic Republic of Congo in fulfilling its obligations.

**Guatemala**

Under decision XVIII/26 of the meeting of parties, a revised plan of action for Guatemala’s return to compliance with control measures for methyl bromide consumption was considered. Under the plan Guatemala intended to reduce its methyl bromide consumption of 709.4 ODP tonnes in 2002 to 400.7 ODP tonnes in 2006. Guatemala reported methyl bromide consumption data for 2006 of 333.4 ODP tonnes, which places the country in compliance with its obligations contained as in decision XVIII/26.

A project on the national phase out of methyl bromide planned the phase out 502.6 ODP tonnes and will be complete in December 2008.

**Honduras**

Honduras has submitted its ozone-depleting substances data for 2006, reporting methyl bromide consumption of 284.6 ODP-tonnes. Based on this data, Honduras continued to be in advance of its methyl bromide consumption reduction commitment contained in decision XVII/34 and therefore maintained its progress toward compliance.

The first tranche of phase II for the phase out of methyl bromide, which was released by the 50th ExCom in November 2006, is nearly complete, and a report for the second tranche has been submitted to the Executive Committee.
Islamic Republic of Iran

In 2005, the Islamic Republic of Iran reported a consumption of 13.64 ODP tones for Annex B, Group II substances (CTC). This consumption was in excess of the Party’s maximum allowable consumption level of 11.550 ODP tonnes for that controlled substance for that year. The Islamic Republic of Iran was therefore requested through decision XVIII/27 to provide an explanation for this deviation along with a plan of action. In 2006, The Islamic Republic of Iran submitted the required clarification explaining that the excess consumption was for laboratory and analytical uses. The Party also submitted a plan of action to return to compliance with the Protocol’s carbon tetrachloride control measures, in which the Party committed itself to reducing consumption to no greater than 11.6 ODP-tonnes in 2007 and zero ODP-tonnes in 2008, excluding essential uses. The Islamic Republic of Iran also committed to monitoring its existing system for licensing imports and exports of ozone-depleting substances including import quotas.

In 2006, The Islamic Republic of Iran reported data which places it back in compliance with its obligations under the control measures of the Montreal Protocol for carbon tetrachloride consumption.

The 50th meeting of the Executive Committee held in December 2006 approved a project for the Islamic Republic of Iran, which addresses the phase out of CTC and TCA consumption in the solvent sector. The implementation of the project activities in 2007 and 2008, will enable the Party meet its obligations for the phase out of CTC.

Libyan Arab Jamahiriya

In 2007, The Libyan Arab Jamahiriya fulfilled its commitments pursuant to decision XV/36, in which it was expected to establish, by 2004, a system for licensing imports and exports of ODS, including quotas. The Libyan Arab Jamahiriya had a licensing system for controlling the import and export of ozone-depleting substances in place since 1999. The country is expected to establish an ozone-depleting substances quota system by the end of January 2006 and was implementing an interim import permit arrangement in the meantime. The Libyan Arab Jamahiriya informed the Ozone Secretariat of this information.

The 2006 consumption data for the Libyan Arab Jamahiriya was not available for consideration at the 39th meeting of the Implementation Committee. In the meantime, the Party submitted its 2006 data making the country in compliance with its obligations under the plan of action adopted by the Parties.

UNIDO is currently implementing a halon management plan, a national CFC phase out plan as well as a methyl bromide phase out project. The implementation of the various project activities is expected to allow the Party complies with its phase out obligations as stipulated in the plans of actions.
Mexico

Decision XVIII/29 of the Meeting of the Parties approved the request of Mexico to change its baseline data for the controlled substance in Annex B, group II (carbon tetrachloride) to 62.5 ODP tones. Decision XVIII/30 adopted Mexico’s plan of action to ensure the Party’s prompt return to compliance with the Protocol’s CTC control measures. The plan of action requires Mexico to reduce the CTC consumption to 9.376 ODP tonnes in 2008 and to zero ODP tonnes in 2009.

In 2006, Mexico reported an annual consumption for the Annex B, group II, controlled substance (carbon tetrachloride) of 0.1 ODP tones. This consumption places Mexico in compliance with its carbon tetrachloride obligations.

The 52nd meeting of the Executive Committee held in July 2007, approved an umbrella project for terminal phase-out of CTC for implementation by UNIDO in Mexico. The implementation of the project will allow the Government of Mexico to sustain its current compliance with its CTC phase out obligations.

Montenegro

Through the support and assistance received by UNIDO and UNEP’s CAP programme and UNIDO, Montenegro completed its data reporting obligations on time.

Consequently, on 27 October 2006, Montenegro reported its outstanding baseline and base year data as was required following its ratification of all the Montreal Protocol amendments. Therefore, Montenegro submitted all outstanding data in accordance with its data-reporting obligations under the Protocol. The data submitted by Montenegro confirmed that the Party is operating under Article 5, paragraph 1, of the Montreal Protocol.

Consequently the 53rd meeting of the Executive Committee approved a Terminal Phase Out Management Plan, which will allow Montenegro to meet its phase out obligations. An institutional strengthening project was also approved by the 51st meeting of the Executive Committee in March 2007.

Pakistan

Decision XVIII/31 adopted Pakistan’s plan of action to ensure the Party’s prompt return to compliance with the Protocol’s CTC control measures. The plan of action requires Pakistan to reduce the CTC from 148.500 ODP-tonnes in 2005 to 41.800 ODP-tonnes in 2006.

Pakistan has submitted its ozone-depleting substances data for 2006, reporting carbon tetrachloride consumption of 41.8 ODP tonnes. That data both returns the Party to compliance
with the Protocol’s control measures for that substance in 2006, and places it in advance of those control measures. The Party also reported that from 28 May 2007, Pakistan banned the import of carbon tetrachloride.

**Uruguay**

Uruguay has submitted its ozone-depleting substances data for 2006, reporting 8.5 ODP tonnes consumption of methyl bromide. The reported data shows that Uruguay continues to be in advance of both its commitments under decision XVII/39 and its methyl bromide phase-out obligations under the Montreal Protocol. UNIDO is implementing a methyl bromide project in Uruguay which is expected to enable Uruguay to continue to meet its obligations contained in decision XVII/39.

### 4. PROGRAM EXPANSION

In the years 2008 to 2010 UNIDO aims to enhance its assistance to Article 5 countries by strengthening its project portfolio through new approvals and particular attention will be given to the implementation of already approved in principle multi-year agreements, as it was the case in the previous year.

The main objective of this Business Plan is to assist Article 5 countries in meeting their obligations under the Montreal Protocol. It is expected that tonnages to be eliminated through forward commitments, ongoing and planned activities will meet the Montreal Protocol reduction targets of 2007, 2010 and in the cases of accelerated HCFCs and methyl bromide phase-out activities the 2015 reduction target as well.

The analysis of the activities of our Business Plan reveals the following main trends:

- The major share of UNIDO’s MP project portfolio consists of HCFC Management plans and project preparations for HCFC investment activities;
- Consumption sector (investment projects excl. MeBr) incl. forward commitments covers 67% of UNIDO’s 2008 Business Plan;

In 2008, UNIDO will continue to cover all the regions (Latin America and the Caribbean, Africa, Asia and Pacific, Europe) with planned activities in various sectors and countries (including non-investment activities and project preparation).

The following section summarizes the activities contained in UNIDO’s 2008 Business Plan sorted by region and country.
Africa

In Africa, forty eight (48) activities in twenty one (21) countries, with a value of US$ 11,134,000 will be submitted in 2008. Among these, seven Terminal phase-out management plans (TPMPs), two fumigant project preparations, two fumigants phase-out plans, one fumigants technical assistance activity, two institutional strengthening project, and several initiatives towards HCFC phase out including seven project preparations, eight investment activities and twelve phase out management plans are planned. In addition, MDI activities including one project preparation and five transitional strategies, and one technical assistance activity on halons are intended.

The following projects are planned to be prepared and submitted in 2007:

Algeria
Funds will be requested for HCFC project preparation, an HCFC phase out management plan and an HCFC investment project are planned for Algeria. MDI project preparation is planned.

Burundi
Funds will be requested for a Terminal Phase-out Management Plan.

Cameroon
Funds will be requested to prepare HCFC project preparation, phase out management plan and investment activities.

Congo DR
Funds will be requested for a Terminal Phase-out Management Plan.

Cote d’Ivoire
Funds will be requested for a Terminal Phase-out Management Plan.

Egypt
An extension of the CFC institutional strengthening project is planned, a funding request for the preparation of an HCFC project preparation, phase-out management plan and investment activities will be requested. A methyl bromide fumigants phase out plan is also planned.

Ethiopia
An methyl bromide, fumigants project preparation is planned.

Eritrea
Funds will be requested for a Terminal phase out management plan as well as HCFC project preparation, phase out management plan and investment activities.
Guinea Conakry
A TPMP is planned and will contain an MDI transitional strategy.

Libya
Funding will be requested for an MDI transitional strategy, an institutional strengthening investment project, HCFC phase out management plan.

Morocco
Three technical assistance activities will be submitted in the halon, MDI and HCFC sectors. An HCFC project preparation, phase out management plan and investment activities are planned as well as one fumigants phase out plan.

Niger
Funds will be requested for a Terminal Phase out Management Plan and to prepare an HCFC phase out management plan.

Nigeria
An MDI transitional strategy is planned. In addition funds for HCFC project preparation, a phase out management plan and investment activities will be requested.

Sao Tome & Principe
Funds will be requested for a Terminal Phase out Management Plan.

Senegal
Funds will be requested to prepare an HCFC phase out management plan.

South Africa
Funds will be requested to prepare an HCFC phase out management plan and investment activities.

Sudan
Technical assistance activities will be submitted in the methyl bromide and MDI sectors. In addition technical assistance for an HCFC phase out management plan will be requested.

Tunisia
Funding will be requested for an MDI transitional strategy and HCFC phase out management plan and investment activities.

Zambia
Funding will be requested for methyl bromide fumigants project preparation.
Asia

In Asia, thirty nine (39) activities in seventeen (17) countries, with a value of US$ 27,625,000 will be submitted in 2008. Among these, there are one National CFC phase-out plan, two Terminal phase-out management plans (TPMPs) and two project preparations for these TPMPs, one technical assistance project for halons, and MDI activities including two transitional strategies, one MDI project preparation project, and two MDI phase-out plans. In addition two institutional strengthening projects, one methyl bromide fumigants phase out plan and several initiatives towards HCFC phase out including nine project preparations, nine investment and seven phase out management plan are planned.

The following projects are planned to be prepared and submitted in 2008:

China

A national MDI phase-out plan is under preparation, which will address the CFC consumption in the MDI sector. In addition an ODS waste disposal investment project is planned as well as HCFC project preparation and investment activities.

India

Funding will be requested for HCFC project preparation and investment activities.

Indonesia

Funding will be requested for HCFC project preparation and investment activities.

Jordan

Project preparation fund will be requested to prepare a national MDI phase-out plan as well as for the actual phase out plan. In addition, funds will be requested for HCFC project preparation, a phase out management plan and investment activities.

DPR Korea

Funding will be requested for an MDI transitional strategy and an HCFC phase out management plan.

Kuwait

Technical assistance for halons is planned and will address the remaining consumption in the country.

Malaysia

Funding will be requested for HCFC project preparation and investment activities.
Myanmar

Project preparation funds will be requested, to prepare a TPMP jointly with UNEP. The TPMP is also planned and will contain an MDI transitional strategy.

Oman

Funds for an MDI transitional strategy and a phase out management plan will be requested. In addition, an ODS waste disposal investment project, and an institutional strengthening project are planned.

Pakistan

Funds will be requested for HCFC project preparation, investment activities and a phase out management plan.

Saudi Arabia

Funding will be requested for HCFC project preparation and investment activities.

Syria

The extension of the institutional strengthening project and a funding request for the preparation for an MDI phase out plan will be requested. HCFC project preparation, investment activities and a phase out management plan are planned.

Turkey

Funding for a HCFC phase out management plan and an investment project for a methyl bromide fumigants phase-out plan will be requested.

Turkmenistan

Funding for an investment project for a methyl bromide fumigants phase-out plan will be requested. CFC project preparation, and a Terminal Phase out Management plan are also planned. In addition an HCFC phase out management plan is intended.

Yemen

The National CFC phase-out plan will be submitted to address the total phase-out of all remaining CFC consumption in the country. This plan will include an MDI transitional strategy. In addition funds for HCFC project preparation, investment activities and a phase out management plan are requested.
Europe

In Europe, nineteen (17) activities in nine (9) countries, with a value of US$ 1,173,000 will be submitted in 2008. Among these, there are five MDI transitional strategies, a number of HCFC initiatives including one investment activity, seven phase out management plans and one project preparation activity. In addition, one institutional strengthening project, is planned.

The following projects are planned to be prepared and submitted in 2008:

Albania
Funding will be requested for an MDI transitional strategy and an HCFC phase out management plan.

Bosnia and Herzegovina
Funding will be requested for an MDI transitional strategy and an HCFC phase out management plan.

Croatia
Funding will be requested for an MDI transitional strategy and an HCFC phase out management plan.

Macedonia
Funding will be requested for an MDI transitional strategy and an HCFC phase out management plan.

Moldova
Funds will be requested to prepare an HCFC phase out management plan.

Montenegro
Funds will be requested for institutional strengthening and HCFC phase out management plan.

Serbia
Funding will be requested for an MDI transitional strategy, HCFC project preparation, investment activities and a phase out management plan.

Latin America and the Caribbean

In Latin America and the Caribbean Region, thirteen (13) activities in eight (8) countries, with a value of US$ 6,908,000 will be submitted in 2008. Among these, one TPMP, one fumigant phase-out plan, one MDI project preparation activity for a phase out plan and one MDI
phase out plan, as well as a number of HCFC phase out initiatives including three project preparation, three investment activity, three phase out management plan are planned.

The following projects are planned to be prepared and submitted in 2008:

**Argentina**
Funds will be requested for HCFC project preparation and investment activities.

**Honduras**
A TPMP will be prepared in cooperation with UNEP. In addition, funds will be requested to prepare an HCFC phase out management plan.

**Mexico**
In order to assist the country to comply with the methyl bromide control measures, a complete methyl bromide phase-out plan in the soil fumigation will be prepared by UNIDO. Furthermore, HCFC project preparation and investment activities are planned.

**Nicaragua**
Funds will be requested for an HCFC phase out management plan.

**Venezuela**
Funds will be requested to address the CFC consumption in the MDI sector for MDI project preparation and an MDI phase out plan. In addition funds will be requested for HCFC project preparation, investment activities and a phase out management plan.

**Uruguay**
Funds for HCFC project preparation will be requested.

**Regional Latin America**
Technical assistance to countries to assist in rescheduling the phase out of methyl bromide is planned with Argentina and Uruguay.

**ODS destruction technologies and HCFC activities**

The 19th Meeting of the Parties, which took place in Montreal last September agree to accelerate the phase-out of HCFC and calls for urgent action taking into account the limited period between now and the baseline years for HCFCs. The Parties gave guidance to the Executive Committee to assist Article 5 Parties in conducting surveys. It is our understanding that the Executive Committee will examine the Agencies’ requests in this amended context and determine the appropriate action to be taken in line with the spirit of the decision of Meeting of Parties.
In follow up to Decision XIX/6 the Executive Committee of the Multilateral Fund for the Implementation of the Montreal Protocol addressed the issue accelerated HCFC phase-out management plans and HCFC surveys during its 53rd Meeting in Montreal from 26 to 30 November 2007. The Executive Committee adopted a decision in which it requests the Multilateral Fund Secretariat to work with the Implementing Agencies to examine the existing guidelines and propose draft guidelines to the 54th Meeting of the Executive Committee for the preparation of HCFC phase-out management plans incorporating HCFCs surveys.

Following also the discussions at the Executive Committee and the Meeting of the Parties, UNIDO received requests for the preparation of ODS destruction demonstration projects from the following Article 5 countries.

UNIDO is planning to implement these projects in conjunction with other toxic & hazardous waste destruction initiatives, which are being formulated and implemented by UNIDO in a number of countries. This would enable cost-effective and sustainable operation of destruction facilities in many countries over a longer period of time.

5. NON-INVESTMENT PROJECTS

In 2007, UNIDO is planning the extension of institutional strengthening projects in Egypt, Mexico, Montenegro, Oman and Syria for a total budget of US$ 724,500, all including agency support costs.

In addition, a number of HCFC Management Plans and HCFC preparatory fund for preparing investment activities to enable the countries comply with the HCFC freeze are foreseen for 2008.

Furthermore, considering the discussions at the 18th MOP, MDI transitional strategies will be prepared for non-producing countries within the eligible funding level of US$ 30,000 per country. For countries, in which UNIDO is preparing a TPMP or NPP, MDI strategies will be included in the respective phase-out plans.

Finally, non-investment technical assistance components will be included in phase-out plans that have been approved as well as new phase-out plans.
B. PERFORMANCE INDICATORS

The 47th ExCom Meeting has reviewed the weighting of the existing performance indicators. The new weightings, based on decision 47/51, are indicated in the below table.

<table>
<thead>
<tr>
<th>Performance Indicator</th>
<th>Item</th>
<th>Weighting</th>
<th>Target 2008</th>

Based on Decision 49/4, the performance indicator on milestone activities for MYAs was changed as listed now in the above table.

With regard to the performance indicator on policy/regulatory assistance, UNIDO is planning to provide policy assistance, on the understanding that the countries concerned request UNIDO’s support, as follows:

1) Albania: Support in implementing the plan of action as contained in MOP Decision XV/26;
2) Bosnia and Herzegovina: Support in implementing the plan of action as contained in MOP Decision XV/30;
3) Congo DR: Support in implementing the plan of action as contained in MOP Decision XVIII/21;
4) Guatemala: Support in implementing the plan of action as contained in MOP Decision XVIII/26;
5) Honduras: Support in implementing the plan of action as contained in MOP Decision XVII/34;
6) Iran: Support in implementing the plan of action as contained in MOP Decision XVIII/27;
7) Libyan Arab Jamahiriya: Support in implementing the plan of action as contained in MOP Decision XV/36 and XVII/37;
8) Mexico: Support in implementing the plan of action as contained in MOP Decision XVIII/30;
9) Pakistan: Support in implementing the plan of action as contained in MOP Decision XVIII/31;
10) Uruguay: Support in implementing the plan of action as contained in MOP Decision XVII/39;
11) Bosnia and Herzegovina, Egypt, Libyan Arab Jamahiriya, Former Yugoslav Republic of Macedonia, Mexico, Montenegro, Oman, Qatar, Romania, Syria and Serbia: Through the institutional strengthening projects, support in various data reporting, ratification and enforcement obligations;
C. BILATERAL COOPERATION

* UNEP is the lead implementing agency. The value includes the ODP to be phase out in the entire project.

Some new activities will be submitted for consideration in 2008 on behalf of some donor countries as bilateral activities (see table below). Furthermore, conversations are ongoing with several Bilateral Agencies for future cooperation in new activities.
### D. INITIATIVES TO ENSURE COMPLIANCE

The status of ongoing projects is described in Annex I below. Successful and timely implementation of these activities is crucial in the current compliance period.

UNIDO has continued to provide supportive initiatives in order to ensure timely project completion of projects approved so far, and to facilitate compliance of the recipient countries with their MP obligations, which supported successful project implementation:

- Regular missions to ozone offices are organized to monitor with the ozone officers the implementation of national and/or sectoral phase-out plans and ongoing stand alone projects. UNIDO visits each ozone office at least once a year. When required, UNIDO fields ad-hoc missions and requests support from the field representatives, who are in regular contact with the ozone office to organize training, clear equipment from the customs, recruit experts, etc.

- Good cooperation with the national ozone offices has continued and regular follow up of the implementation process is being done by the staff of the ozone office together with UNIDO’s national and international consultants and project managers. This ensures that effective actions on critical issues such as resolving bottlenecks in site preparation, customs clearance, installation, commissioning and safety certification, monitoring of CFC-related equipment are taken.

- UNIDO is regularly attending Regional Network Meetings and respective workshops providing additional support to our counterpart countries.
• UNIDO has strengthened its field representation. Field offices have received additional professional staff, and in some offices local staff were recruited to follow up MP projects. The new staff was trained on Montreal Protocol issues as well as on other relevant matters.

• One staff member implementing Montreal Protocol projects was transferred to UNIDO’s Regional China Bureau to provide direct on-site assistance in the Asia and Pacific Region enabling closer follow-up on project implementation.

• Regular communication and interaction between regional and country offices about the implementation process has ensured the smooth flow of project plans. As in previous years, directors of UNIDO regional and country offices are regularly briefed at UNIDO HQs on ongoing and possible future activities. They are involved in the implementation process and are following up the progress of the programmes. In turn, the representatives brief headquarter staff working in a specific country on the regular activities in the field and problems faced, if any.

• UNIDO also provides, when requested, support such as policy assistance, putting in place relevant legislation etc.
Annex I

COUNTRY-BY-COUNTRY IMPLEMENTATION OF APPROVED ACTIVITIES

Albania

1. Phase-out of ODS

The national ODS phase-out plan is implemented by UNIDO while UNEP is in charge of institutional strengthening. The delivered refrigeration demonstration unit for training of service technicians is operational. In order to ensure successful operation of the refrigerant recovery and recycling network component, it was agreed that first an enabling environment should be established by putting more emphasis on the reuse scheme, enforcement and code of practice before purchase and distribution of the equipment. Therefore, two national experts were recruited for preparing the code of practice as well as for updating the training manual and organizing training workshops. Purchase of equipment for vocational schools was initiated which was delivered in 2007 as requested by the Ozone Unit Manager. A joint mission with UNEP was fielded in 2007. Training workshops and training related to the equipment were planned, equipment for vocational schools were delivered, the training conducted and hence this component is completed. A national consultant was recruited and international experts provided advise on technical matter and legislation. The remaining funds will be used for procurement of tools and equipment for service workshop. Implementation of the third tranche is underway, management and monitoring programme are ongoing.

Algeria

1. Phase-out of CFCs

The terminal umbrella project in the commercial refrigeration sector was approved by the Executive Committee at its 44th meeting. In 2007, the ownership of the foaming equipment which was supplied to a company, which went bankrupt after the completion of an earlier individual investment project, was planned to be transferred to the eligible enterprises under the terminal umbrella project. The foaming equipment was retrieved and is stored at the ozone office for distribution to the 2 companies. The training on development couldn't take place since the ozone office and UNIDO were trying to identify an institute that can do the training in French Language. Some institutes were identified and negotiations are ongoing to prepare for the training.

The refrigerant management plan (RMP) is complete. The monitoring activities were ongoing in 2007. The ozone office submitted to UNIDO 3 progress reports. The final report received in November 2007.
2. **Phase-out of Methyl Bromide**

A technical assistance project to phase out methyl bromide in pulses disinfestations was approved by the 50th Executive Committee. The project has an impact of 1.6 ODP tonnes. A Study Tour for some Algerian technicians was done. Terms of Reference of the equipment will be prepared. The project is expected to be complete in Jun 2008.

**Argentina**

1. **Phase-out of CFCs**

The national CFC phase-out plan was approved at the 42nd ExCom Meeting and the first, second and third funding tranches were released. The fourth tranche will be submitted to release at the 53rd ExCom Meeting for approval. The 2005 CFC consumption target was 2,047 ODP tonnes and 1,676 ODP tonnes were achieved. By the end of 2006, about 5,000 technicians have already been trained. Servicing tools and R&R equipment were distributed among the eligible service shops. In 2007 training of technicians continued. Equipment for 2 refrigeration and 9 R&R centers were purchased. Technicians received tools and R&R equipment. End user sector survey continued. Detailed report was submitted to 53rd ExCom Meeting based on which the 4th tranche was released. It is planned that the R&R and refrigeration centers will start operation in 2008. The end user sector activities will be continued. Further training and equipment for technicians will be provided. Training of customs officers was carried out. The before-mentioned activities will continue in 2007 with an increased focus on the end-users sector and a series of awareness campaigns.

2. **Phase-out of Methyl Bromide**

According to the revised agreement approved by the 45th Executive Committee, the project in strawberry, protected vegetables and cut flower production will be mainly implemented until 2010 leaving a small consumption till 2015. The project will continue with the training and secure the compliance with the phase out chronogram. The project is expected to be complete in Jan 2015.

3. **Phase-out of Solvents (CFC, CTC and TCA)**

The plan for phase-out of ODS in the solvent sector was approved in December 2003 (41st ExCom). The approved date of completion is December 2009. UNIDO issued several contracts with local Argentinian companies, which provide for consultancy services on selection material of alternative solvents and conduction of compatibility tests. Two Solvent training workshops (i.e. for textile industry on the laboratory use) were conducted in Dec.2007. The project is expected to be complete in Dec 2009.
Bosnia & Herzegovina

1. Phase-out of CFCs and TCA

The individual investment project in the foam sector was completed in December 2006. A total phase-out of 33 ODP tonnes of CFCs was achieved accordingly.

The national ODS phase-out plan was approved at the 41st ExCom Meeting. The first funding tranche was completed in December 2006 and the project is progressing with the second tranche. Equipment to phase out TCA at the only ODS consuming company was ordered, delivered, installed and commissioned, resulting in a total phase-out of 1.1 ODP tonnes of TCA in 2006. Activities under the second tranche are expected to be complete by June 2008. The request for release of the third tranche was submitted and approved at the 52nd Ex Com, following the receipt of the 2005 verification report on the ODS consumption. Implementation activities will concentrate on the procurement of training equipment as well as on customs training and training of technicians in the refrigeration servicing sector. A joint mission with UNEP was fielded in 2007. Under the third tranche, the government supported an action plan targeting the achievement of the phase out objectives in the shortest possible time frame has been prepared and accepted. Implementation activities are underway. The project is expected to be complete in Jul 2009.

2. Phase-out of Halons

At the 42nd ExCom Meeting, a technical assistance project was approved to phase out the entire halon consumption in the country. Halon awareness and training workshop was carried out in February 2007. The annual activities for 2007 have been coordinated with the NOU, which is to confirm the selection of the beneficiary for halon R&R equipment. ODP changed as per the table sent by MFS on 28 Sep 2007 after the coordination meeting. Revised impact is 4.1 ODP tonnes. The project is expected to be completed in December 2008.

Brazil

1. Phase-out of Methyl Bromide

The total phase-out of methyl bromide in tobacco, flowers, ornamentals, strawberries and other uses was approved at the 46th Meeting of the Executive Committee. Subcontract for training was awarded. The equipment (boilers and accessories) was delivered in 2006 and 2007. Training continued in 2007 the remaining equipment was purchased in 2007, but it will be delivered during 2008. As per the agreement, 84 ODP tonnes are planned to be phased out and the project will be complete in June 2008.
Cameroon

1. Phase-out of CFCs

The implementation of the refrigerant management plan approved at the 38th meeting of the ExCom, was completed in June 2007 ahead of schedule. Training of technicians as planned was completed.

3. Phase-out of CFCs and TCA

A terminal CFC/TCA phase-out management plan was approved by the 50th Executive Committee and the first funding tranche was released. In 2007, the PMU was established. A refrigeration manufacturing programme is in process as well as a TCA programme. The training of technicians and custom officers continued and a supplementary R&R programme was prepared.

China

1. Phase-out of CFCs

In the year 2006, 150 ODP tonnes of CFCs were phased out as a result of the implementation of the sector plan in tobacco fluffing. Working agreement with counterpart companies was finalized for dismantling the last CFC-11 equipment in 2007.

In the framework of the polystyrene foam umbrella project, a new phase-out agreement between SEPA and the counterpart was signed in 2006 in order to ensure sustainability of the project. All imported equipment are on site and installed. Trials started in October 2007. Conversion of one local equipment is ongoing. Physical completion is planned for end 2007. Official commissioning and verification of destructed equipment is planned for March 2008. Under the domestic refrigeration sector plan, the conversion of all domestic refrigeration companies under this project was completed. Official commissioning also took place, which enables transfer of titles to the enterprises. Technical assistance to compressor manufacturing enterprises is ongoing and planned to be finished in the first half of 2008. Ban of the use of CFCs in the sector was issued. A TUV workshop based on plant inspections was planned for end 2007, however, due to the illness of the expert, it will be held in the first quarter of 2008. Monitoring and verification of the project performance and results will continue until end 2010 to ensure sustainability of the project.

The refrigeration servicing sector plan was approved by the 44th ExCom. The request for release of the third tranche was approved at the 51st ExCom meeting in March 2007. The 4th tranche was approved by the 53rd ExCom in Nov 2007. The verification of national consumption was submitted to and accepted by ExCom each year. The implementation plan are being completed without delay. Technicians are trained and receiving recovery and service tools. The organizational framework and operating mechanism of C&C reclamation centers has started. These activities will continue in 2008 for the domestic refrigeration, industrial refrigeration and MAC sectors.
2. Phase-out of Methyl Bromide Consumption Sector

The national phase-out of methyl bromide was approved by the 41st ExCom and the first funding tranche was released. Total MB consumption in 2006 was 516.7 ODP tonnes; the maximum allowable consumption agreed with the MLF for the same year was 723 ODP tonnes, therefore China, as for end of 2006, was 206 ODP tonnes ahead the agreed phase-out schedule. Activities foreseen is in 2007 have been completed: a) in the commodity sector complete the training programme, monitoring alternatives application, b) in tobacco sector, procurement of last sets of equipment due to the present project. The final report due to this project is going to be submitted to UNIDO by 31st December 2007 and the project completed. Under the second tranche of the national phase-out, methyl bromide consumption in the tobacco seedling production is going to be achieved in December 2007. Equipment procurement for the tobacco seedling sector is still on going and will be completed by the first trimester of 2008, in time for the crop season 2008.

3. Phase-out of Methyl Bromide Production Sector

The sector plan for the methyl bromide production sector was approved by the 47th ExCom. A subcontract was issued to SEPA in March 2006. The training plan was implemented and a working arrangement contract was signed with the counterpart companies. A phase-out of 21 ODP tonnes was achieved. The following activities have been implemented in 2007: a) Monitor the methyl bromide production, b) inspect the manufacturers and perform technical verification, c) management of production quota and d) signed agreement with producers for compensation against production reduction quota achieved and verified. The 2005’ production quotas have been verified and compensation will be disbursed by middle of 2008. The 2006 and 2007 production quotas will be verified during 2008 and compensated accordingly. The total production target agreed with the MLF had been achieved.

Cote d’Ivoire

1. Phase-out of Methyl Bromide

The phase-out of methyl bromide in the commodities and storage fumigation sectors was approved at the 42nd ExCom Meeting. Due to the very tense political situation, procurement of the last set of equipment was postponed till 2007. Procurement and delivery of the last set of equipment was done. The project is expected to be complete in June 2008, phasing out the remaining consumption of 3.8 ODP tonnes.
2. Phase-out of CFCs

At the 46th Executive Committee Meeting, a terminal aerosol sector project was approved for UNIDO with a total phase-out of 43.4 ODP tonnes of CFCs. Redeployment of equipment from Alkaloid, Macedonia (cancelled aerosol project) to COPACI, Abidjan was discussed with the subcontractor. It has turned out that equipment redeployment is not feasible since the technicians of the supplier are not allowed to travel to Cote d'Ivoire and the British Consulate in Abidjan has been closed. All attempts to restart implementation of the project have failed. The government is going to request cancellation of the project.

The PRP for TPMP was approved in September 2006 by the 48th ExCom in Apr 2006. The project is under preparation in coordination with UNEP and is submitted at the 54th ExCom.

Croatia

1. Phase-out of CFCs

The terminal CFC phase-out management plan was approved in 2003 and has been implemented in cooperation with Sweden. The project is progressing with the third and the fourth tranche which was released by the 49th Executive Committee in July 2006. Under the last funding tranche the bidding for the monitoring component was conducted. The contract is planned to be awarded till 2nd quarter of 2008.

Cuba

1. Phase-out of Methyl Bromide

At the 44th ExCom Meeting, a total phase-out project in soil, substrate, storage and structure fumigation was approved. The project has an impact of 24.1 ODP tonnes and is planned to be completed in 2008. Training continued in most of the sectors without problems. The purchased fumigation equipment was delivered and training on fumigation is done. The remaining equipment would be purchased during 2008. The project is expected to be complete in December 2008.

Democratic People’s Republic of Korea

1. Phase-out of CFCs

The refrigeration sector phase-out plan for Korea was approved in 2003. The project is progressing with the second tranche. Remaining equipment for the conversion of the compressor factory is being ordered. Procurement of additional safety equipment is planned. The project is expected to be complete in June 2008.

UNIDO is in charge of the recovery and recycling component of the national CFC phase-out plan which was approved by the 47th Executive Committee and which is being implemented together with UNEP. The partial purchase of the remaining recovery and recycling equipment is
in completed. Installation and commissioning of equipment will follow. The project is expected to be complete in December 2008.

2. Phase-out of CTC

The CTC terminal phase-out plan was approved at the 41st ExCom Meeting to assist Korea in complying with the 85 per cent reduction target. Under this activity, equipment for pilot pesticide plant will be delivered in April 2008. UNIDO is putting efforts to find solutions to solve the problems for process agent projects equipment procurement. This activity is expected to be complete in July 2008. Within the fourth tranche of the CTC terminal phase out plan, all projects in the Cleaning Solvent sub-sector and the four projects in the Process Agent sub-sector have been completed. Temporary phase-out in the Fumigation Sector has been achieved by importing the proposed replacement chemicals. The fourth tranche totaling US$ 500,000 was used to bring the funds available for this sub-sector to the level necessary to implement the remaining fumigation project and to cover the cost of equipment for the establishment of pesticide plant and the project is expected to be completed in Jul 2008.

Under the fifth tranche of the plan for terminal phase out of CTC, UNIDO was urged to find a solution, compliant with United nations Security Council Resolution 1718 (2006) and the conditions of the Chemical Weapons Convention, to overcome the related impediments and complete the implementation of the process agent sector activities. UNIDO was also requested to provide a status report on the progress achieved with the activities at the 2.8 Vinalon Factory Complex and the Sinuiju Chemical Fibre Complex to the 54th Meeting of the Executive Committee. Such a Report was submitted to the 54th ExCom partially to be used for procurement of equipment for pesticide plant and organization of training workshops in the fumigation sector and process sector. The project is expected to be complete in December 2008.

Under the supplementary plan for terminal phase out of CTC as a process agent, the international bidding for project equipment for two companies Hungnam and Lanam Pharmaceutical factories was conducted and technical evaluation has been done. A phase-out of 229.9 ODP tonnes of the substantial stockpile achieved upon confirmation from the Government of Korea to a zero level import of CTC. The project is expected to be complete in December 2008.

Dominican Republic

1. Phase-out of Methyl Bromide

Under the phase-out project in melon, flowers and tobacco, agreements with methyl bromide consumer farmers have already been made. Most of the supplies (chemicals, substrates, small equipment) agreed upon with the farmers, were purchased. In the flowers sector, methyl bromide has already been phased out. Thus, a partial phase-out of 20 ODP tonnes was achieved. The project, which is planned to be complete by December 2008, is now providing technical support to the flower sector on the use of steaming and in horticulture in general.
Egypt

1. Phase-out of Solvents (CFC, CTC and TCA)

The terminal solvent sector umbrella project was approved at the 44th meeting of the ExCom. The planned survey was conducted and 42 small-scale companies using ozone-depleting solvents were identified. A partial phase-out of 31 ODP tonnes was achieved in 2006. Fire protection equipment for one Egyptian company was procured. Solvent training workshop was organized in July 2007. The remaining 10 ODP tonnes of CFC-113 were phased out through the conduction of two solvents training workshops.

2. Phase-out of CFCs

The national CFC phase-out plan was approved by the 46th Executive Committee and the first funding tranche was released. The first part of the refrigeration service equipment was purchased and delivered. The training programme of 1,200 technicians was accomplished. As part of the second tranche which was released by the 50th ExCom Meeting, a work plan for 2007/2008 has been prepared. The industrial refrigeration and chillers as well as the remaining commercial refrigeration manufacturers will be addressed providing a package of technical assistance, equipment, training services and eligible incentives aimed to achieve the phase out target. The project is expected to be completed July 2008.

3. Phase-out of CFC Consumption Sector

The phase-out of CFC consumption in the manufacture of aerosol metered dose inhalers was approved by the 50th ExCom Meeting. The project has an impact of 159.5 ODP tonnes and is expected to be completed by December 2010. UNIDO contract for equipment procurement and technology transfer in the value of 5.1 million USD was awarded. After the completion of the int. bidding the selected Contractor, i.e. Impopharma, Canada suddenly withdraw from the contractual commitments. Two new bidding have been started (one for equipment, another for technology transfer).

4. Phase-out of Methyl Bromide

The project objective is to phase-out 377.7 ODP tones of MB consumed in soil fumigation, structures and commodities fumigation sector. The 20% reduction target was achieved in 2005 as a result of the implementation of the national phase-out plan for methyl bromide in horticulture and commodities fumigation.

Project activities for 2006 and 2007 were focused on keeping the achieved reduction permanent and sustainable. Major activities during 2007 were concentrated on purchases of the planned Methyl bromide alternatives in Egypt. The planned chemicals and equipment for the year 2007 were delivered. A detailed report was submitted to the 52nd ExCom Meeting. The availability and reliability of new technologies has improved dramatically since the project document was drafted and approved. The success of grafting technologies introduced by UNIDO phase-out projects in Turkey and Morocco, which have been successful revealed to the Egyptian Large-scale farmers that there were other better ways and means of producing export
horticultural crops with none or reduced use of soil pesticides. This resulted in the finalization of the decision to purchase the nursery units for the production of grafted seedlings. The bidding process for the purchase of nursery (greenhouse) units for the main Egyptian Stakeholders was organized, evaluated and the purchase order issued in December, 2007. Completion of Phase 1 of this Project is expected in December, 2008.

Georgia

1. Phase-out of Methyl Bromide

The second phase of the technical assistance project which provided direct assistance to farmers in the adoption of the alternatives, was completed in December 2006. A total phase-out of 6 ODP tonnes of methyl bromide was achieved.

At the 47th ExCom Meeting, technical assistance for the elimination of methyl bromide in grain and storage facilities was approved for UNIDO. Equipment have been delivered. First training session was done in October 2007 correct, a second training session would be done in January 2008, the project is expected to be completed in Dec 2009. The phase-out of 7.2 ODP tonnes is expected for the period after 2008.

2. Phase-out of Halons

The halon banking management programme was approved by the 47th Executive Committee in November 2005. The programme has an impact of 37.4 ODP tonnes and is planned to be completed in 2008. The project site for the establishment of a halon recovery and recycling centre was selected and equipment was ordered. In 2007, arrangement of the halon awareness and training workshop started and as well as the installation and commissioning of halon R&R equipment was completed. The project is expected to be completed in first half of 2008.

Guatemala

1. Phase-out of Methyl Bromide

The cut flower and melon sectors were monitored. Although the phase-out target of 25 ODP tonnes was achieved in 2006, Guatemala reported a higher consumption. Following the decision of the 49th Executive Committee, UNIDO worked very closely with the Government of Guatemala in preparing a revised plan of action which was approved by the Parties at their XVIIIth Meeting in November 2006. While UNIDO in cooperation with UNEP, are ensuring compliance of the melon growers with the agreed reduction plan, UNIDO supported the other sectors to be phased out. A detailed report on the status and forthcoming activities of the project were submitted to the 51st Meeting of the ExCom.

In 2008, the project will continue supporting the melon growers in the elimination of the methyl bromide Agreement with melon farmers have been reached for the implementation of the remaining funds during 2007 and 2008. The project is expected to be complete in Dec 2008.
Honduras

1. Phase-out of Methyl Bromide

A new phase-out schedule was approved by the 47th Executive Committee for the methyl bromide sector plan in order to reach the 20 per cent reduction target by 2008 giving time to further develop and softly apply the new technology. Phase I of the programme was completed in December 2006. Phase II was approved by the 50th ExCom and the first funding tranche was released. Project implementation will start in January 2007 with the preparation of relevant terms of reference for equipment procurement and training. The first tranche is currently complete. All the equipment is in process of purchase or delivery. The report for the second tranche was submitted in 2007 and approved. It is expected in 2008 to request the third tranche. The project preparation for a terminal phase-out management plan was approved in March 2007 on the understanding that, in developing and subsequently implementing the TPMP, UNIDO should take into account decision 47/10(e) regarding the inclusion in licensing systems of import controls for MB, CTC and/or TCA, as well as CFCs. The project document was prepared and would be submitted at the 55th ExCom.

India

1. Phase-out of CFCs

The refrigeration sector phase-out plan was approved at the 38th ExCom Meeting with UNDP as the lead implementing agency. UNIDO is implementing the transportation refrigeration portion of this sector plan. The first tranche was successfully completed in November 2006 with a total phase-out of 59 ODP tonnes of CFCs. The project is now progressing with the second tranche, which was released by the 41st ExCom. Refrigerant evacuation/charging equipment was distributed among 34 eligible enterprises. The new foaming equipment which equipment that was delivered with some delay in June 2006, was also distributed among eligible enterprises. A phase-out of 50 ODP tonnes of CFCs was achieved in 2006 and additional 27 ODP tonnes were phased-out upon final commissioning of the remaining foaming machines. The project has been completed. will be phased out in 2007 upon final commissioning of the remaining foaming machines.

2. Phase-out of CTC Consumption and Production Sectors

The 2005 and 2006 annual programmes of the CTC phase-out project were released by the 45th and 49th Executive Committee, respectively. Contracts with Kemix and Nikava were finalized. Under the 2005 annual programme, delivery and installation of final equipment, conversion at Kemix and Nikava, assistance for new 3 enterprises and SHES assessment were made. The project is expected to be complete in July 2008. Under the 2006 annual programme an SHES assessment was made. The project is expected to be complete in July 2008.
Indonesia

1. Phase-out of Methyl Bromide

At the 44th ExCom Meeting, a phase-out project in grain storage was approved for UNIDO. The project has an impact of 37.8 ODP tonnes and is planned to be completed in 2008. All activities like procurement of the second set of equipment (phosphine meters, phosphine calibrators and plastic films) through international bidding; procurement of office equipment (desktop computer, printer, backup memory stick) for KLH based national consultant; accomplishment of the delivery of the first set of equipment including sand snakes from Biotrop to beneficiaries; regional training on Phosphine Fumigation and Integrated Storage Pest Management at 8 locations; public awareness activities (seminar, Book of Regulations related to MB, homepage update); and project monitoring activities were done. The project is expected to be complete in July 2008.

2. Phase-out of Solvents (CTC, TCA and CFC)

At the 44th ExCom Meeting, a terminal ODS phase-out plan was approved. UNIDO is in charge of the total phase-out in the solvents sector. The project is aiming at eliminating 5.6 ODP tonnes of TCA, 16.5 ODP tonnes of CTC and 78 ODP tonnes of CFC, out of which 57 ODP tonnes of CFC, 3 ODP tonnes of TCA and 16.5 ODP tonnes of CTC were phased out in 2005. In 2006, terms of reference for non-investment activities were consented with the National Ozone Unit. Activities like delivery and installation of equipment for CTC consuming company; survey to identify other (remaining) consumers of ODS solvents eligible for funding; workshop on new technologies in the solvent sector in July 2007; public awareness, empowerment of import legislation campaign/seminars; and the exchange of information and experience through south-south cooperation were done. Technical assistance/investment projects for eligible counterparts is in progress and the project is expected to be completed in Jul 2008.

Iran

1. Phase-out of CFCs

Currently, there are two foam projects under implementation by UNIDO which are expected to be completed in April 2008. The total impact of the two projects is 174.1 ODP tonnes. Under the activity on phasing out ODS in manufacturing of flexible PU slabstock foam through the use of liquid CO2 blowing technology at Bahman Plastic Co, the installation did not take place because the enterprise did not provide the supplier with information required prior to the installation despite numerous follow ups. If the enterprise provides the information, the installation will be done in April 2008. The project is expected to be complete in August 2008. The activity on phasing out of ODS in the manufacture of flexible slabstock foam through the use of LCD blowing technology at Esfanj Shirvan Co., site preparation is completed. Installation and commissioning was planned for November 2007. The supplier is claiming additional funds related to the EUR-USD exchange rate losses however no funds are available to accommodate these losses. Negotiations are in process with the supplier. The project is expected to be completed in August 2008.
The national CFC phase-out plan was approved at the 41st Meeting of the ExCom in December 2003. All activities under the 2005 annual implementation programme were successfully completed by December 2006. The third tranche was released by the 48th Executive Committee. Implementation of this tranche was completed in April 2007. Under the latest and last tranche, monitoring activities for 2007 were initiated and completed. One monitoring cell was established in each of the provinces. The project is expected to be complete in April 2008.

Under the Replacement of CFC-12 refrigerant by HFC-134a at Iran Compressor Manufacturing Company (ICMC) the supplier is not ready to install the equipment. The project is expected to be completed in August 2008.

Under the project on phase-out of CFC consumption in the manufacture of aerosol MDIs, the amount of US$232,750 should be deducted from the project budget as agreed with the Iranian Government. Equipment procurement was done. The TOR for Technology Transfer has been prepared and an international bidding has been started. The project is expected to be complete in December 2010.

2. Phase-out of Methyl Bromide

The project, which was assisting seven fumigation chambers in improving the efficiency of the alternative selected (phosphine), was completed in December 2006, phasing out the remaining consumption of 2.4 ODP tonnes of methyl bromide.

The 47th Executive Committee Meeting approved a total phase-out project in soil fumigation for UNIDO. The impact of the project is 14.4 ODP tonnes. Boilers were purchased in 2006. Delivery of the boilers were done and the training in the use of them is under progress. The project is expected to be complete in December 2010.

3. Phase-out of Solvents (CTC and TCA)

A terminal solvent sector umbrella project was approved by the 50th Executive Committee Meeting. The project deals with the phase out of 52.7 ODP tones of CTC and TCA. It covers 6 small scale industries. UNIDO has procured equipment for three companies and TORs are being prepared for three other remaining companies. The project is expected to be complete in July 2008.

Kenya

1. Phase-out of Methyl Bromide

At its 53rd Meeting, the ExCom approved the request by the Government of Kenya to transfer responsibility for implementation of all remaining activities associated with the completion of the phase-out of methyl bromide in the cut-flower sector from UNDP to UNIDO.

As reported to the Ozone Secretariat and consistent with information in the project document presented to the ExCom, the MB baseline for compliance for Kenya is 202 ODP tonnes and the MB consumption in 2001 was 111 ODP tones, excluding 21 ODP tonnes which Kenya states that
it uses for quarantine and pre-shipment applications. Maximum levels of MB, excluding QPS will be 29 ODP tonnes at the end of 2008, 14 ODP tonnes at the end of 2009 and complete phase-out at the end of 2010.

The project will phase-out all soil uses of MB in Kenya and commits to permanently sustaining the consumption levels indicated above through the use of import restrictions and other policies it may deem necessary.

Kuwait

1. Phase-out of CFCs

The recovery and recycling component of the RMP for Kuwait was completed in December 2006. A total phase-out of 64 ODP tonnes of CFCs was achieved.

The project document for a TPMP was approved at the 52nd meeting of the Executive Committee and approved in July 2007. The first tranche for a TPMP for annex A group I substances was disbursed in July 2007. The Annual Implementation programme for 2007/2008 was prepared and agreed upon with the NOU and UNEP. The project is expected to be completed in Nov 2008.

Lebanon

1. Phase-out of Methyl Bromide

The methyl bromide phase-out project follows the ratification of the Montreal Protocol by the Government of Lebanon, which had planned a schedule for phasing out Ozone Depleting Substances (ODS). The Ministry of Environment (MoE), in collaboration with the United Nations Industrial Development Organization (UNIDO), implements the project funded by the Multilateral Fund (MLF) of the Montreal Protocol. Its duration is five years, starting from 2002.

The goal of the project is to phase out 50.4 ODP tonnes of methyl bromide (MeBr) used for strawberry production in Lebanon. As per the decision 43/27 of the Executive Committee of the Montreal Protocol, July 2004, methyl bromide soil fumigation shall be replaced by the introduction of various MeBr alternatives, together with an integrated pest management (IPM) programme.

From 2002 to 2005, the project team has successfully phased out the 41.4 ODP tonnes of MeBr scheduled for these years using crop rotation, soil solarization, soil solarization + chemicals, chemicals, soil steaming and a reduced rate of MeBr application. All of the above soil disinfection methods were applied in the context of the IPM programme.

In summer 2006, Lebanon has experienced a dramatic war, which devastated the country between July 12 and August 14, 2006 and paralyzed it with a total embargo imposed on Lebanon during the war and for one month after it. During the hostilities, the project team could not
access farmers for security reasons. Furthermore, for the first time since its launching, the project could not achieve its 2006 MeBr phase target of 9.0 ODP tons. In its 52nd meeting, the Executive Committee of the Montreal Protocol approved in July 2007 the extension of project activities until the end of 2008 given the difficulties encountered by the project as a result of July 2006 war. The 2006 MeBr phase out target has been rescheduled over 2007 (5 ODP tons) and 2008 (4 ODP tons).

Libya

1. **Phase-out of CFCs**

The second tranche of the national CFC phase-out plan was released in April 2005. Main foam equipment as well as delivered recovery and recycling equipment were installed and commissioned in 2006. Remaining equipment will be ordered after approval of the third tranche. The third tranche was not requested by the government. The project is expected to be complete in Dec 2008.

2. **Phase-out of Methyl Bromide**

At the 47th Executive Committee Meeting, a phase-out project in horticulture was approved for UNIDO. The impact of the first tranche of the project is 56 ODP tonnes. The project is being implemented with Spain and the second/final funding tranche is planned for 2007 with Spanish contribution. Terms of reference for procurement of equipment were agreed upon and subcontract for provision of technical assistance and logistic services was signed. However, equipment was not procured in 2006 since timely delivery would not have been possible for the 2006 season. Equipment will be procured according to the agreed terms of reference. The project is expected to be completed in July 2008.

3. **Phase-out of Halons**

The plan for the phase-out of import and net consumption of halons in the fire-fighting sector was approved by the 47th Executive Committee. The project has a total impact of 653.9 ODP tonnes. An international consultant was recruited and the respective report giving recommendations on the business model, was submitted to the Multilateral Fund Secretariat. Project activities will start upon approval of the sustainability plan. Project implementation activities will start as soon as the plan is developed and approved.

Macedonia

1. **Phase-out of CFCs**

The aerosol project was cancelled by mutual agreement at the 45th ExCom in April 2005 because the company had stopped aerosol production. UNIDO was requested to consider the possibility
of equipment redeployment to the aerosol project which was approved for Cote d’Ivoire. As indicated in our comments under Cote d’Ivoire, the redeployment of equipment is not feasible. All attempt to restart implementation of the project at Cocaci, Cote d’Ivoire have failed. The government is going to request cancellation of the project thus making the requested redeployment of equipment supplied to Alkaloid not possible.

The terminal phase-out management plan was approved by the 45th Executive Committee. The first tranche which was completed in November 2006, has successfully phased out 10 ODP tonnes of CFCs. As part of the second tranche which was released by the 50th ExCom Meeting, training programmes including workshops for servicing technicians and customs officers and continuation of recovery and recycling programmes were completed. training programmes are planned to be implemented in 2007, including workshops for service technicians and customs officers. The recovery and recycling programme will continue.

Mexico

1. Phase-out of Methyl Bromide

The technical assistance project, which started immediately after its approval at the 42nd ExCom Meeting, will enable Mexico to comply with the 2005 20 per cent methyl bromide reduction target. Assistance was provided to farmers through the organization of a series of workshops in the melon, tomatoes and strawberry sectors. The UNIDO component of the project was completed in 2006 and an additional phase-out of 26.9 ODP tonnes of methyl bromide was achieved. The Spanish component will continue to provide technical assistance to voluntary farmers in the elimination of methyl bromide through the establishment of pilot cases in their respective premises. The technical assistance project is expected to be completed in Jun 2008 A total phased out project is being prepared for submission to the 54th ExCom.

2. Phase-out of CFC Consumption Sector

The national CFC phase-out plan was approved in 2004. The CFC consumption in 2006 amounted to minus 508 ODP tonnes, which is some 658 ODP tonnes lower than the established level in the agreement. The actual consumption in the refrigeration servicing sector was reduced to the level of 257 ODP tones, which is 933 ODP tones below the target. Large scale training continued and will continue in 2008. Technicians are receiving recovery and service tools upon successful completion of training. Equipment for 14 R&R centers were purchased. These centers will be put into operation in 2008. Monitoring of implementation and verification of performance is continuing until end 2010 to ensure sustainability.

3. Phase-out of CFC Production Sector

The CFC production was closed on 25 August 2005. Full phase-out took place. The CFC consumption monitoring system is ready and operational. In 2006, closure of the CFC production was monitored and audited. The audit report was submitted to and endorsed by the 50th ExCom Meeting.
The annual verification of the closure of the CFC production facilities was prepared for the year 2006 and was submitted to and approved by the 53rd ExCom. Further monitoring, policy and awareness measures as well as audits will be implemented in the future years.

4. Phase-out of Solvents (CTC)

Under the project preparation of the CTC, project preparation for the terminal phase-out in the solvent sector (CTC), UNIDO conducted a survey for OD solvents, which shows the use of CTC, however the Government of Serbia has not invited UNIDO mission to prepare project document stating that there might be no CTC consumption, except laboratory use. UNIDO mission may take place to Serbia in first half 2008. The project is expected to be completed in Jul 2008.

Under the umbrella project on for terminal phase-out of CTC UNIDO mission to Mexico completed and the TOR for equipment procurement was prepared. The tender started in Jan 2008. The activity is expected to be complete in December 2008.

Morocco

1. Phase-out of Methyl Bromide

The third tranche of the phase-out project for soil fumigation in the tomato sector was released in 2005 and a total phase-out of 39 ODP tonnes was achieved. In 2006, the fourth tranche was released by the 50th ExCom Meeting. Purchased equipment was delivered and installed. Training for grafted seedling production was implemented and production started. In 2007, purchase, delivery and installation of additional equipment are foreseen, including training.

The project in the strawberry sector, which continued to provide farmers with training on the chemicals application. Final equipment was purchased and delivered and the project was complete in 2007.

Myanmar

1. Phase-out of CFCs

UNIDO together with UNEP will in charge of preparation TPMP. The request for project preparation funds was submitted to the 54 ExCom meeting.
Nigeria

1. Phase-out of CFCs

The refrigeration manufacturing part of the national CFC phase-out plan which was implemented in cooperation with UNDP as the lead implementing agency, was completed in March 2006. The project has successfully phased out the remaining consumption of 8.25 tonnes of CFCs in 2006, thus a total phase-out of 42.9 ODP tonnes was achieved.

Under the aerosol part of the above project, the equipment was shipped and delivered to the seaport Lagos in March 2006. The customs clearance and transportation of the equipment to the end-users was delayed till July 2006 due to reorganization of the seaport authorities. After delivery, minor damage of the LPG storage tank was discovered and the end-users were requested to repair the tank. By December 2007, all equipment was delivered to the project sites and the necessary civil works were completed. The project is expected to be complete in February 2008 upon installation and commissioning.

2. Phase-out of Solvents

The terminal ODS phase-out umbrella project was approved at the 43rd ExCom Meeting to phase out 166.7 ODP tonnes of CTC and 31.3 ODP tonnes of TCA. The second tranche of the project was completed in July 2006. All activities were carried out according to the annual implementation programme. As part of the third tranche which was released by the 49th ExCom in July 2006, purchase of equipment was done. Delivery, installation and commissioning of equipment were done in 2007. The fourth tranche was approved in July 2007, a status and verification report were submitted. However, due to the ExCom decision the disbursement of the approved tranche was not possible till February 2008. The project is expected to be complete in 2010.

Oman

1. Phase-out of CFCs

The monitoring of the RMP activities was implemented and complete in 2007.

The TPMP project was approved at the 52nd ExCom. For the implementation of the first tranche of the TPMP the annual Implementation programme for 2007/2008 was prepared and agreed upon with the NOU. The project is expected to be completed in Nov 2008.
2. Phase-out of Halons

The halon consumption phase-out project was transferred from the World Bank to UNIDO at the 46th ExCom Meeting. The halon awareness and training workshop has been carried out. Selection of halon R&R equipment has been completed. The preparation of TOR and technical specification are on the way followed by the respective international bidding. ODP changed as per the table sent by MFS on 28 Sep 2007 after the coordination meeting. Revised impact is 6.85 ODP tonnes. The project is expected to be complete in Dec 2008.

Pakistan

1. Phase-out of CFCs

The second and third tranches of the RMP were released by the 44th and 47th Executive Committee, respectively. Around 320 technicians were trained/certified in Punjab. Contract with the Sindh Directorate was prepared and training started. Contract with the National Institute for Science and Technical Education was prepared for the rest of the country. Procurement of equipment for good practice and recovery operation started. In 2008, training of technicians in Punjab, Sindh and Balochistan will continue. Certified technicians will be provided with service equipment.

2. Phase-out of Solvents and Process Agents (CFC and CTC)

A local engineering company was contracted under the process agent project to update the technology in accordance with the marketing strategy of the new owner. Additional drawings and redesign (where necessary) were agreed upon to upgrade the process and to harmonize it with the commercial plan of the new owner while keeping the basic concept of the project intact. The conversion of the production plant will be completed in 2007 due to delayed contractual arrangements. There is no more CTC consumption at the company.

The national CTC phase-out plan was approved at the 41st Meeting of the ExCom. The 14 projects for verified metal cleaning industries were completed after installation and commissioning of equipment. An additional phase-out of 86 ODP tonnes was achieved. Equipment for the second package of 15 verified companies in the textile and metal cleaning subsectors was procured. Under first tranche of the sector phase out plan of CTC, investment and non investment activities pertinent to the first tranche have been accomplished. Under the second tranche installation and commissioning of equipment at 15 enterprises were done. Awareness workshops for importers and government departments concerned were done. Import and export policy enforcement, reporting and monitoring activities were completed. First two tranches of the project completed.
The project on conversion of carbon tetrachloride as process solvent to 1,2-dichloroethane at Himont Chemicals Ltd is in process, conversion technology in accordance with relevant TOR is in progress. The project is expected to be completed in April 2008.

**Qatar**

1. Phase-out of CFCs

The recovery and recycling component of the RMP which was completed in December 2006, has successfully phased out 54.1 ODP tonnes of CFCs. Monitoring activities started and will continue until the first quarter of 2008. The project is expected to be complete in April 2008.

A TPMP was approved at the 53rd meeting of the ExCom. The first tranche for the TPMP was approved in November 2007 and the project is planned to phase out of 3 ODP tonnes. A renewal of the institutional strengthening project has been done the work Programme for 2007 was received. Issuance of subcontract and national expert contract pending till receipt of financial report for completed subcontract is under previous project (Phase II, 1st year funding). The project is expected to be complete in December 2008.

**Regional Africa**

1. Phase-out of CFCs

The strategic demonstration project for accelerated conversion of CFC chillers was approved by the 48th ExCom for five African countries, i.e. Cameroon, Egypt, Namibia, Nigeria and Sudan. In order to secure the associated external resources, UNIDO drafted a project concept which was submitted to the Steering Committee of the FGEF in December 2006. The project concept was endorsed and the chiller project was included in the FGEF pipeline for 2007. To date, the external resources were mobilized since the project was approved by the FGEF Steering Committee. UNIDO and the cooperating partner agencies received the clearance from the Secretariat for disbursement of the funds under the project. The project is expected to be complete in September 2009.

**Regional Europe**

1. Phase-out of CFCs

The demonstration project on the replacement of CFC centrifugal chillers was approved by the 47th ExCom for Croatia, Macedonia, Romania, Serbia and Montenegro. Working arrangements for four counterparts (one in Serbia, one in Romania and two in Macedonia) were signed. Contracts for the supply of two chillers have already been awarded while offers for the supply of the other two are currently under review. In 2007, the four chillers were delivered and started up. One more chiller in Montenegro was procured and is expected to be delivered during the first quarter of 2008. Due to the relatively long pay back periods resulting from weather conditions in the region, the ESCO in Croatia was not interested in the project. Therefore working
arrangements for the implementation of the remaining 7 chillers (3 in Serbia and 4 in Croatia) were prepared and signed with the counterparts. The TOR were also prepared and offers are being obtained. The project is expected to be completed in Dec 2008.

**Romania**

1. **Phase-out of CFCs**

The project on the phase-out of CFC-12 in the manufacture of pharmaceutical aerosols which was approved at the 44th meeting of the ExCom, was completed ahead of schedule in June 2006. A total phase-out of 46.5 ODP tonnes of CFCs was achieved in the aerosol sector.

At the 45th Executive Committee, a national CFC phase-out plan was approved for UNIDO. The first tranche of the project was completed on Mars 2007. The project is progressing with the second tranche which was released by the 48th ExCom and the third tranche, released by the 51st ExCom. The third tranche is excepted to be completed in Mars 2008. The PMU is fully operational since the national regulation to recruit PMU staff was modified. Code of practice was also finalized. A phase-out of 40 ODP tonnes of CFCs was achieved.

2. **Sector plan for production sector (fourth tranche)**

The fourth tranche of the sector plan for production sector was approved in view of the progress already achieved in establishing the CTC incinerator in Chimcomplex and the completion of the removal of the capability to produce CTC at Oltchim. UNIDO was requested to withhold disbursement until it had verified completion of the 2007 work programme and had cleared with the Secretariat that the targets for 2007 had been achieved; and also to carry out the verification of the ODS production sector and the terminal phase-out of CTC for the process agent project in 2008 and 2009.

3. **Phase-out of CTC in the Consumption and Production of Process Agent Uses**

Under the terminal phase-out management plan of CTC production/consumption for process agent uses, approved by the 50th ExCom Meeting, project equipment was procured. The four TORs are being prepared (plant design, equipment installation, procurement of additional accessories, procurement of control equipment). The first bidding started in Jan. 2008. The project is expected to be completed in Dec 2008.

4. **Phase-out of CTC in the Consumption and Production of Process Agent Uses**

A terminal phase-out management plan for process agent uses was approved by the 50th ExCom Meeting. The project has an impact of 120.5 ODP tonnes and is planned to be completed by 2008. Project equipment has been procured in October 2007. The four TORs were prepared (plant design, equipment installation, procurement of additional accessories, procurement of control equipment).
5. Phase-out of Halons

The halon management programme was approved by the 50th ExCom in November 2006. The project has an impact of 1.8 ODP tonnes and is planned to be completed in 2008. The first halon awareness and training workshop took place in 2007. The project is expected to be completed in Nov 2008.

Saudi Arabia

The preparatory assistance project to prepare a national phase-out plan was completed by November 2007. The 53rd ExCom approved the national phase out plan intended to phase out 269.7 ODP tonnes.

Serbia

Phase-out of CFCs

The two remaining individual projects in the refrigeration and foam sectors were completed in June and December 2006 respectively, with a total phase-out of 77 ODP tonnes of CFCs.

The national CFC phase-out plan was approved for Serbia and Montenegro by the 43rd ExCom Meeting. Since Serbia and Montenegro have separated in 2006, a revised agreement for Serbia was submitted to the 50th ExCom Meeting and the third funding tranche was released. Sweden decided to withdraw from bilateral project implementation and thus, with the agreement of the Government of Serbia, the Swedish component will be implemented by UNIDO. After these changes, the following activities were undertaken in 2007: Preparation of code of practice and continuation of support for legislation and enforcement as well as customs training and customs empowerment. Implementation of investment activities in the service sector, as well as plastic foam sector, implementation of a strategy on recovery and recycling or drop-in technology, training of service technicians.

Sudan

1. Phase-out of CFC and CTC

The national CFC and CTC phase-out plan was approved at the 44th ExCom Meeting. The first tranche was completed in December 2006 and the project is progressing with the second tranche which was released by the 50th ExCom Meeting. Training of technicians and customs officers took place. Five new centers for training and recycling were established or selected in the North, West and South area. In 2007, and the regulation was updated.

The new project was approved in November 2007 for the phase out of 65 ODP tonnes. Project activities started.
Syria

1. Phase-out of CFCs

The national CFC phase-out plan was approved at the 49th Executive Committee meeting and the first funding tranche was released. In 2007, a National Coordination Team was recruited after receipt of nominations. Subsequently, public awareness activities were carried out and equipment were purchased.

The demonstration project on the replacement of CFC centrifugal chillers was approved by the 47th Executive Committee. External resources were secured and disbursement of funds was confirmed by the Secretariat. A working arrangement was signed. UNIDO launched the bidding process for the supply of three chillers at Le Meridien Latakia Hotel. In 2007, the three chillers at the Le Meridien Hotel were procured and will be delivered in April 2008. The contract for retrofitting the 4 chillers at the hospital was signed in December 2007. The project is expected to be completed in December 2008.

2. Phase-out of Methyl Bromide

The phase-out of methyl bromide in grain storage is progressing with the third tranches. Equipment for phosphine application were delivered and tested. Terms of reference for procurement of different type of equipment were finalized based on the testing results and the planned study tour.

The national phase-out plan in soil fumigation was approved by the 49th Executive Committee. The project has an impact of 48 ODP tonnes and is planned to be completed in 2010. A UNIDO mission was undertaken in November 2006. Implementation modalities and a work plan were agreed upon. Terms of reference for procurement of equipment were prepared and submitted to the National Ozone Unit for comments. In 2007, a national agency was contracted for the main activities. Subsequently, public awareness activities were planned to be carried out. The project is expected to be completed in January 2010.

Turkey

1. Phase-out of Methyl Bromide

In Turkey, methyl bromide was phased out, in all sectors, by the end of 2007 (except quarantine and pre-shipment). To achieve this goal, the Government of Turkey established a methyl bromide reduction calendar. An investment project, implemented through UNIDO, called “Phase-Out of Methyl Bromide for Soil Fumigation in Protected Horticulture and Cut-flower Production in Turkey” was approved in 2001, but was started only from the beginning of 2003 and finally received considerable impetus at the end 2004-2005 and also in 2006.

The aim of this project was to phase out 293,4 ODP tons (at the beginning projected, 2002) of methyl bromide used in protected horticulture and cut-flower production, introducing suitable alternative methods and minimizing economic losses due to the ban on methyl bromide. Turkey strictly complied with the methyl bromide phase-out programme established for the Phase II of
this project and achieved further reductions as indicated in the 2006 schedule, below. Turkey will fulfill all the obligations by project completion.

In 2006, the General Directory of Protection and Control (GDoPC) permitted 34 tons (20.4 ODP tons) of methyl bromide to be imported. Most of the methyl bromide was used, in decreasing order, in Bolu (20.056 kg), İstanbul (7.662 kg), Antalya (4.550 kg), and Hatay (2.580 kg) provinces, and on carnation (3.050 kg), eggplant (800 kg), apricot (711 kg) and tomato (600 kg) production. MeBr used in Bolu and Istanbul was for fumigation of wooden box, but not for vegetables and cut flowers.

Only a few planned purchases of materials for grower trainings, alternative applications, etc. were purchased in 2006-2007. These include basamid, metham sodium, condor, plastic sheet and some of grafted seedlings. In total, 1215 growers used some chemicals and plastic sheets that were left in 17 model farms, 48 monitored growers, and 18 supported growers in cut flower sector, and 44 model farms, 108 monitored growers, and 980 supported growers in vegetable sector. Three steam machines and one soilless culture system were provided to end users who were also trained by suppliers.

Training activities included, nine training programs (3-5 days) given by international experts on soilless culture, IPM for cut-flower growers, and trust tomato and pepper crop management for the horticulture sector, distributing leaflets, on farm trainings, extension personnel trainings, radio and TV programs. In total, 700 vegetable and cut flower growers attended the training programs.

Project completion activities are currently in place and it is envisaged that the project will end in earnest during the second quarter of 2008.

**Uruguay**

1. **Phase-out of Methyl Bromide**

An extension of the phase-out agreement was approved by the 46th Executive Committee in July 2005. According to this agreement, total phase-out of methyl bromide will be achieved by January 2013. Subcontractor (INIA) continued training and assistance to farmers. In one region, methyl bromide has already been phased out. In 2007, awareness activities to convince farmers to eliminate methyl bromide in one of the remaining regions were conducted. Some test on Iodure metane, which could be a convincing alternative were finalized. The project is expected to be completed in Dec 2010.

**Venezuela**

1. **Phase-out of CFCs**

The first tranche of the national CFC phase-out plan was successfully completed in September 2006. Since the verification reports submitted to the Secretariat for consideration by the 47th and 51st ExComs, were positively considered, implementation of the second tranche and third tranche started and a total phase-out of 50.2 ODP tonnes was achieved. A contract was signed with
FONDOIN for project monitoring and training of technicians. In 2007, the PMU was extended, a data monitoring system was established and training of technicians continue, also the recovery and recycling scheme is being implemented. FONDOIN have certified more than 2,000 refrigeration technicians and continues with the training courses at national level. The request for release of the fourth tranche will be submitted to the 55th ExCom Meeting. The second tranche is expected to be completed in December 2008.

Zimbabwe

1. Phase-out of Methyl Bromide

The project in cut flowers which was completed in December 2006, has successfully phased out 132 ODP tonnes of methyl bromide.

At the 47th ExCom, the total phase-out of methyl bromide in tobacco seedlings was approved for UNIDO and the first funding tranche was released. A plan of action was prepared in 2006 based on which most of the equipment was purchased and delivered and training to farmers was carried out. First tranche already completed, Second tranche approved. The project is expected to be completed in Dec 2009.

The total phase-out of methyl bromide in grain fumigation was approved by the 50th ExCom Meeting. The project has an impact of 10.2 ODP tonnes and is planned to be completed in 2010. All the equipment delivered and training will start soon.
