Executive Committee of
the Multilateral Fund for the
Implementation of the Montreal Protocol

Seventeenth Meeting
Montreal, 26-28 July 1995

Corrigendum

PROJECT PROPOSALS: CHINA

Elimination of CFCs in the Manufacture of Domestic Refrigerators at Guangdong Kelon

Replace paragraph 11 (page 5) of the Secretariat's Recommendations with the following:

11. The Fund Secretariat recommends approval of US \$4,483,050 for the implementation of the project at Guangdong Kelon, and recommends US \$582,796 in support costs for UNDP.

Factory production conversion from CFC-12 to HFC-134a MAC systems at: Guangzhou Haohua Automobile Parts Co. Ltd., Shanghai Ek Chor General Machinery Co., Ltd., Yueyang Hengli Air Conditioning Equipment Co. Ltd., and Shanghai Automobile Air Conditioner Co.

Add the following new paragraph 26 (page 15) to the Secretariat's Comments:

26. The World Bank has responded to the questions raised by the Secretariat. The costs of the projects are similar to those already approved by the Executive Committee for this sector. However, it should be noted that the recently completed government strategy for this sector estimates an amount of US \$26 million for converting the entire sector.

Replace the existing paragraph 26 (page 15) of the Secretariat's Recommendations with the following:

27. The Fund Secretariat recommends that the Executive Committee consider these projects within the framework of China's strategy for this sector. The Committee may wish to agree on a funding level for the implementation of this strategy and decide on the funding to be allocated to the four projects accordingly.
